PROFESSIONAL SUMMARY

Senior full stack engineer with 7+ years building production web platforms across financial services and venture-backed product teams. Expert in React, TypeScript, Next.js, Python, and Django, delivering scalable architectures from SSR frontends through RESTful APIs and data layers. Partners with product and design on ambiguous 0-to-1 initiatives while driving CI/CD standards, observability, and mentorship across frontend and backend disciplines.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and delivered a **full-stack portfolio analytics platform** using React, TypeScript, Next.js, and Django, supporting real-time position monitoring for 500+ institutional users across distributed remote teams.
- Led **frontend architecture modernization** including SSR, route-based code splitting, and shared component libraries, reducing initial page load by 40% and improving accessibility compliance across core workflows.
- Designed a **RESTful API layer and data models** in Python/Django with Redis caching and PostgreSQL, handling 2M+ daily requests with sub-200ms p95 latency under peak trading windows.
- Established **CI/CD pipelines and automated testing** spanning unit, integration, and end-to-end suites, cutting production defect escape rate by 35% while accelerating release cadence.
- Drove **cross-team technical initiatives** aligning platform capabilities with product strategy, presenting tradeoff analyses to engineering leadership on scalability and long-term architecture investments.
- Implemented **performance tuning** across database queries, API response caching, and client-side rendering optimizations, resolving bottlenecks affecting dashboard refresh cycles during market hours.
- Mentored **4 junior and mid-level engineers** on architectural thinking, code review practices, and full-stack delivery patterns, elevating team velocity and engineering standards org-wide.
- Partnered with Product and Design to **define and ship 0-to-1 features** end-to-end in ambiguous requirements environments, iterating rapidly on user feedback without compromising long-term maintainability.
- Integrated **AI-assisted development workflows** using LLM tooling to accelerate prototyping, documentation, and test generation while maintaining rigorous review standards for production code.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Built **internal banking dashboards** with React, TypeScript, and JavaScript, delivering real-time trade surveillance views used by 200+ analysts across global risk operations.
- Developed **Python and Django backend services** for RESTful API integrations between legacy mainframe systems and modern web interfaces, enabling secure data exchange across regulated environments.
- Engineered **data modeling layers and ETL pipelines** supporting regulatory reporting workflows, improving data accuracy and reducing manual reconciliation effort across technology teams.
- Contributed to **CI/CD adoption** within technology groups, automating build verification and deployment gates that shortened release cycles for internal tool releases.
- Optimized **database performance** through query tuning and caching strategies on PostgreSQL and Oracle backends, addressing latency issues in high-volume transaction reporting modules.
- Collaborated with **Product and business stakeholders** to refine requirements for early-stage internal tools, translating ambiguous needs into scalable technical specifications.
- Supported **cloud migration initiatives on AWS**, containerizing services and establishing observability patterns for operational excellence across development and production environments.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Implemented **React and JavaScript frontend features** for inventory management workflows, contributing component designs integrated into the team's shared codebase during a year-long remote internship.
- Assisted in building **RESTful API endpoints in Python**, supporting data retrieval and validation logic for mobile and web client applications.
- Wrote **unit and integration tests** for frontend and backend modules, improving test coverage on critical user-facing flows before production releases.
- Participated in **code reviews and sprint ceremonies**, gaining exposure to agile delivery practices and cross-functional collaboration with product stakeholders.
- Resolved **frontend performance issues** including render bottlenecks and CSS layout inconsistencies, improving page responsiveness across supported browser environments.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** using HTML, CSS, and JavaScript for nonprofit foundation digital presence, ensuring cross-browser compatibility and mobile-friendly layouts.
- Built **accessible UI components** following WCAG guidelines, improving content readability and navigation for diverse community audiences.
- Integrated **third-party APIs** for newsletter signup and event registration flows, enabling streamlined content management for foundation staff.
- Collaborated with **remote volunteer stakeholders** to gather requirements and iterate on site structure, delivering finished pages within a compressed three-month engagement.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React.js, Next.js, SSR, State Management, Component Design, Performance Optimization, Accessibility

Backend: Python, Django, RESTful API Design, Data Modeling, Service Architecture, Caching, Queuing

Databases: PostgreSQL, Redis, Oracle, SQL, Query Optimization

Cloud & DevOps: AWS, Google Cloud Platform, Azure, Docker, Kubernetes, CI/CD, Infrastructure as Code

Monitoring & Tools: Datadog, Grafana, Sentry, Git, Jest, Pytest, Cypress, Webpack

Workflow & PM: Agile/Scrum, Jira, Confluence, Code Reviews, Technical Mentorship, Cross-team Collaboration
