PROFESSIONAL SUMMARY

Full stack software engineer with 8+ years building scalable web applications across finance and SaaS. Strong in JavaScript, React, and Java with end-to-end ownership from architecture through production. Led cross-functional design discussions, mentored engineers on coding standards, and shipped performant interfaces and APIs used by thousands of daily users. Thrives in dynamic environments with a focus on team-oriented solutions to complex problems.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and maintained **full-stack React and Node.js applications** supporting portfolio management workflows for 200+ internal users across distributed teams
- Led **cross-team technical design discussions** on UI component architecture, REST API contracts, third-party integrations, and testing strategy with product and design partners
- Built **interactive data visualization tools** enabling analysts to configure dashboards and automate reporting pipelines without dedicated engineering support
- Mentored **two junior engineers** on object-oriented design, code review standards, and test-driven development practices adopted across the engineering organization
- Optimized **database queries and API response paths**, reducing average page load latency by 40% through indexing strategies, Redis caching, and frontend bundle splitting
- Drove **end-to-end feature delivery** from requirements through production deployment, coordinating with PM and UX on iterative releases in two-week Agile sprints
- Implemented **automated test suites** with Jest and Cypress covering critical user flows, cutting regression defects in production releases by 35%
- Refactored monolithic modules into **modular service boundaries**, improving deployment independence and enabling parallel feature development across three engineering squads

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **JavaScript and React dashboards** for risk analytics teams, presenting real-time market data to 150+ traders and analysts daily
- Collaborated with **product managers, UX designers, and backend engineers** to translate business requirements into scalable web application features
- Designed **RESTful Java services** integrated with SQL databases supporting trade reporting, compliance workflows, and internal audit tooling
- Contributed to **Agile sprint planning and architectural reviews** for trading platform components spanning front-end, back-end, and third-party data feeds
- Resolved **production incidents across distributed systems**, documenting root causes and implementing monitoring improvements to reduce repeat failures
- Built **reusable UI component libraries** adopted across four internal applications, reducing duplicate front-end development effort by an estimated 25%
- Applied **data structures and algorithmic optimizations** to batch processing jobs handling high-volume financial transaction data with improved throughput

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Implemented **React features and Redux state management** for a restaurant inspection platform used by hospitality clients across the New York market
- Integrated **REST APIs** to deliver responsive, data-driven interfaces with form validation and real-time status updates for field inspectors
- Wrote **unit and integration tests** following team coding standards and participated in peer code reviews throughout the development lifecycle
- Fixed **frontend defects and UX friction points** based on product and QA feedback, improving completion rates on multi-step inspection workflows
- Used **Git branching workflows** for feature development, pull requests, and collaborative delivery alongside senior engineers in a remote environment

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built **responsive web pages** for a nonprofit foundation using HTML, CSS, and JavaScript aligned to stakeholder content requirements
- Collaborated with foundation leadership to iterate on **content management layouts** and navigation structure for public-facing program information
- Ensured **cross-browser compatibility and accessibility basics** across desktop and mobile viewports before each deployment cycle
- Delivered all project milestones within a **two-month remote engagement**, meeting weekly review checkpoints with distributed stakeholders

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Redux, Vue, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive Design, Webpack

Backend: Node.js, Java, REST APIs, GraphQL, Microservices, Object-Oriented Design, Data Structures & Algorithms

Databases: PostgreSQL, MongoDB, Redis, SQL, NoSQL, Query Optimization, Schema Design

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD Pipelines, Git, Infrastructure as Code

Monitoring & Tools: Jest, Cypress, Chrome DevTools, Application Performance Monitoring, Logging & Alerting

Workflow & PM: Agile/Scrum, Jira, Cross-Functional Collaboration, Technical Mentorship, Code Review, Sprint Planning
