PROFESSIONAL SUMMARY

Full-stack software engineer with 7+ years building scalable web applications across finance and SaaS. Experienced in React, JavaScript, and Java with end-to-end ownership from architecture through deployment. Led cross-functional design discussions, mentored engineers, and shipped performant platforms for high-volume users. Thrives in dynamic environments and values team-oriented solutions to complex engineering problems.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and maintained a **full-stack portfolio analytics platform** used daily by investment teams across multiple distributed product groups
- Built **React and Redux dashboards** with a shared UI component library that accelerated feature delivery across customer-facing and internal surfaces
- Led **cross-team technical design discussions** on API contracts, third-party integrations, and testing strategy with product, design, and backend engineers
- Developed **Java and Node.js backend services** for real-time market data workflows, applying data structure and query optimizations to improve response latency
- Mentored **junior engineers on code review standards**, object-oriented design patterns, and test-driven development during feature delivery cycles
- Proactively triaged and resolved **production incidents**, strengthening logging and monitoring instrumentation to shorten incident diagnosis cycles
- Partnered with product management to translate requirements into **scalable SaaS capabilities**, owning individual deliverables across quarterly release milestones
- Introduced **CI pipelines and performance profiling practices** that improved build reliability and supported more frequent, lower-risk deployments

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Delivered **internal banking web applications** supporting trade operations and risk reporting for global technology and business stakeholders
- Implemented **JavaScript and React front-end modules** integrated with Java microservices to automate enterprise workflow and reporting tasks
- Collaborated with UX designers and business analysts to refine **user interaction patterns** through iterative feedback from cross-functional partners
- Applied **object-oriented design and data structures** to refactor legacy modules, improving maintainability of mission-critical reporting systems
- Participated in **Agile sprint ceremonies** and managed version-controlled deliverables with Git across shared, multi-team codebases
- Built **SQL-backed data services and REST APIs** connecting third-party vendors to internal clearing, settlement, and reconciliation tools
- Contributed to **architectural discussions on distributed integration**, caching boundaries, and service decomposition for platform scalability
- Resolved **high-priority production defects** under regulatory deadlines while preserving code quality and release readiness

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Developed **full-stack web features** for a food-tech platform using React and Node.js under guidance from senior engineering mentors
- Wrote **unit and integration tests** following test-driven development practices to improve confidence in iterative releases
- Integrated **third-party payment APIs** and REST endpoints supporting order processing and inventory management workflows
- Participated in **code reviews and Agile standups**, incorporating feedback from product management and design partners
- Optimized **database queries and API handlers** to reduce load times on customer-facing application surfaces
- Documented **reusable component patterns** to support onboarding and knowledge transfer for subsequent engineering interns

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built **responsive web pages** for a nonprofit foundation using HTML, CSS, and JavaScript across donor-facing properties
- Implemented **content publishing workflows** enabling non-technical staff to update site content without engineering support
- Gathered requirements from stakeholders and delivered **iterative UX improvements** to foundation outreach and donation portals
- Deployed and maintained **web assets on cloud-hosted infrastructure** with disciplined version control and change tracking
- Conducted **cross-browser compatibility and accessibility testing** to ensure consistent experiences across foundation web properties

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Redux, JavaScript, TypeScript, HTML5, CSS3, Vue, Angular, Responsive UI Components

Backend: Java, Node.js, REST APIs, Microservices, Object-Oriented Programming

Databases: PostgreSQL, MySQL, MongoDB, Redis, SQL Query Optimization

Cloud & DevOps: AWS, Docker, CI/CD, Git, Linux

Monitoring & Tools: Datadog, Jest, Webpack, Performance Profiling

Workflow & PM: Agile/Scrum, Jira, Cross-functional Collaboration, Technical Mentorship
