PROFESSIONAL SUMMARY

Full stack software engineer with 7+ years building scalable web applications across finance and SaaS. Skilled in JavaScript, React, and object-oriented design with end-to-end ownership from architecture through production. Led cross-functional delivery with product and design partners, mentored engineers, and shipped performant platforms for data-rich workflows. Committed to test-driven development, clean abstractions, and collaborative engineering.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and delivered **full-stack capabilities** across React front ends and Node.js services, supporting portfolio analytics and reporting used daily across the investment platform.
- Led **cross-team technical design discussions** with product management, UX, and backend engineers on API contracts, shared UI components, integration patterns, and release testing strategy.
- Built **reusable React and Redux component libraries** that consolidated duplicate UI logic and accelerated feature delivery across three product squads.
- Delivered **interactive data visualization and reporting tools** that enabled analysts to configure dashboards without engineering support, expanding self-service analytics adoption.
- Optimized **API performance and database access patterns**, improving responsiveness for high-traffic dashboards during peak market hours.
- Mentored **junior engineers** on code review standards, object-oriented design, and test-driven development, strengthening overall pull request quality and onboarding.
- Owned **end-to-end project delivery** from requirements through production deployment, including rollback planning, observability, and stakeholder sign-off.
- Proactively diagnosed and resolved **production defects**, tightening logging and alerting workflows to shorten incident response and prevent repeat failures.
- Championed **Git-based workflows and Agile practices** that improved sprint predictability and communication across engineering, product, and QA partners.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Java and JavaScript applications** supporting trade operations and risk dashboards used across multiple global banking desks.
- Implemented **React-based internal tools** that streamlined analyst workflows and reduced manual steps in daily reporting processes.
- Collaborated with **front-end and back-end engineers** to integrate REST APIs with legacy banking systems while meeting strict security and compliance requirements.
- Applied **data structures and algorithms** to refine batch processing jobs, improving throughput for overnight reconciliation of high-volume transaction feeds.
- Contributed to **application architecture discussions** on modular service design, promoting testable object-oriented patterns in regulated environments.
- Authored **unit and integration tests** using test-driven development practices, increasing coverage on critical payment-path services and reducing regressions.
- Managed **individual project deliverables** across Agile sprints, coordinating with product owners and QA to ship features on schedule.

- Supported **SQL and NoSQL reporting pipelines** that aggregated trading and position data for operational dashboards under tight delivery windows.
- Partnered with stakeholders to **rapidly resolve defects** and harden web applications, improving reliability of tools relied on during market hours.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React components** for customer-facing web features, integrating REST APIs and aligning implementation with the shared design system.
- Contributed to **full-stack bug fixes** across JavaScript services and PostgreSQL-backed endpoints under senior engineer mentorship.
- Used **Git version control** and Agile sprint ceremonies to deliver incremental improvements to checkout and inventory management flows.
- Implemented **Redux state management and form validation**, improving reliability of user input handling across mobile and desktop experiences.
- Wrote **unit tests** for utility modules and UI logic, supporting team quality goals during peer code reviews.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** with HTML, CSS, and JavaScript for nonprofit outreach campaigns with consistent cross-browser behavior.
- Integrated **third-party embeds and analytics** to measure engagement and support foundation fundraising initiatives.
- Collaborated with stakeholders to **translate content requirements** into maintainable front-end templates aligned with brand guidelines.
- Applied **accessibility and performance improvements** that reduced page weight and improved mobile visitor experience.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Redux, JavaScript (ES6+), TypeScript, HTML5, CSS3, Vue.js, Component Architecture, Responsive Design, Data Visualization

Backend: Node.js, Java, REST APIs, Express.js, Object-Oriented Design, Microservices, API Integration

Databases: PostgreSQL, MongoDB, SQL, Redis, Schema Design, Query Optimization

Cloud & DevOps: AWS, Docker, CI/CD Pipelines, Git, GitHub Actions, Linux

Monitoring & Tools: Datadog, Grafana, Jest, Cypress, Webpack, ESLint, Performance Profiling

Workflow & PM: Agile/Scrum, Jira, Cross-functional Collaboration, Technical Mentorship, Code Review, Sprint Planning
