

Ryan Cho

Senior Full Stack Software Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full stack software engineer with 8+ years building scalable web applications across finance and enterprise environments. Experienced in React, JavaScript, and Java with end-to-end ownership from architecture through deployment. Led cross-team design discussions, mentored junior engineers, and delivered performant platforms for internal and client-facing workflows. Committed to collaborative engineering, rapid iteration, and reliable systems at scale.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and delivered **full-stack React and Redux applications** supporting portfolio analytics and investment workflow tools used by 40+ analysts across distributed teams.
- Led **cross-team technical design discussions** spanning UI components, REST API contracts, and third-party data integrations with product management and design partners.
- Built **interactive data visualization modules** enabling analysts to configure portfolio metrics and reporting views without engineering support.
- Mentored **3 junior engineers** on code review standards, test-driven development practices, and reusable component architecture patterns.
- Optimized critical API endpoints and **SQL query performance**, reducing dashboard load times by 35% for high-traffic portfolio views.
- Implemented **automated test suites and CI pipelines** that improved release confidence and reduced regression defects across production deployments.
- Partnered with backend engineers to define **microservice boundaries and event-driven integrations** supporting real-time market data ingestion.
- Proactively triaged production incidents and shipped targeted fixes maintaining **99.9% uptime** for client-facing reporting portals.
- Owned end-to-end delivery of sprint features from requirement refinement through staged rollout within an **Agile development environment**.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **scalable Java and JavaScript web applications** supporting trade operations and regulatory reporting for global banking teams.
- Collaborated with front-end and back-end engineers to implement **React-based dashboards** surfacing real-time risk and compliance metrics.
- Contributed to architecture reviews defining **service interfaces, data models, and integration patterns** across distributed banking systems.
- Built **RESTful APIs and middleware layers** connecting legacy mainframe services with modern web client applications.
- Applied **object-oriented design and algorithmic optimizations** to process high-volume transaction batches with consistent sub-second latency.
- Adopted **test-driven development practices** with unit and integration tests increasing coverage across critical payment processing modules.
- Translated business requirements from product management into **technical specifications and phased delivery plans** for multi-squad initiatives.

- Supported production deployments and on-call rotations, rapidly diagnosing defects and delivering fixes across **multi-region environments**.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Contributed to **React and Redux features** for a restaurant management platform serving 50+ active merchant locations.
- Implemented **responsive UI components** aligned with design specifications and web accessibility best practices.
- Assisted backend engineers in building **Node.js API endpoints** for order tracking and inventory synchronization workflows.
- Participated in Agile standups and code reviews, applying **industry coding standards** under guidance from senior engineers.
- Resolved **cross-browser compatibility issues** and improved form validation flows, reducing customer-reported UI defects.
- Integrated **third-party payment SDK hooks** enabling secure checkout experiences across web and mobile-responsive views.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built **responsive marketing and donation pages** using HTML, CSS, and JavaScript for a nonprofit foundation website.
- Collaborated with stakeholders to gather content requirements and iterate on **layout prototypes** before public launch.
- Implemented contact and newsletter signup forms with **client-side validation** and backend email integration.
- Optimized page assets and image compression improving **initial load performance** on mobile devices.
- Maintained **cross-browser compatibility and accessibility standards** across public-facing web properties.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Redux, JavaScript (ES6+), TypeScript, HTML5, CSS3, Vue, Responsive Design, Data Visualization, Web Accessibility

Backend: Node.js, Java, RESTful APIs, Microservices, Object-Oriented Programming, Event-Driven Architecture, GraphQL

Databases: PostgreSQL, MySQL, MongoDB, Redis, SQL Query Optimization, Schema Design, NoSQL Data Modeling

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD Pipelines, Git, Infrastructure as Code, Automated Deployment

Monitoring & Tools: Jest, Cypress, Unit and Integration Testing, Performance Profiling, Logging, Application Monitoring, Webpack

Workflow & PM: Agile/Scrum, Cross-Functional Collaboration, Technical Design Reviews, Mentorship, Sprint Planning, Jira
