

Ryan Cho

Senior Full Stack Software Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Senior full stack engineer with 8+ years delivering UI, API, and data platforms across financial services and investment management. Led modernization of legacy systems into Java Spring Boot microservices and TypeScript web applications while mentoring engineers, driving CI/CD adoption, and serving as production escalation lead. Skilled in cross-functional roadmap alignment, regulatory-grade security, and cloud migration in enterprise environments.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led full stack modernization of an internal portfolio analytics platform used by **200+ investment professionals**, replacing legacy .NET modules with **Java Spring Boot microservices** and a React/TypeScript UI.
- Defined **API architecture standards** across three engineering squads, reducing integration defects by 35% through shared contracts, automated contract tests, and enforced code review gates.
- Drove **CI/CD pipeline** upgrades with containerized builds and staged deployments, shortening release cycles from bi-weekly to daily while maintaining stable production operations.
- Served as **production escalation lead** for cross-stack incidents, directing rollback, hotfix, and root-cause remediation that cut repeat outages by 40% over twelve months.
- Mentored four engineers through structured coaching, feedback cycles, and **promotion readiness** reviews, strengthening full stack ownership across frontend and backend layers.
- Partnered with Product, UX, and QA to refine sprint backlogs, dependency plans, and **release readiness criteria** that improved predictable delivery for stakeholder roadmaps.
- Implemented **Python automation scripts** for data reconciliation and operational reporting, eliminating 15+ hours of weekly manual processing across reporting workflows.
- Guided **cloud migration planning** from on-prem workloads toward containerized infrastructure, aligning access controls and audit logging with regulatory compliance requirements.
- Established testing benchmarks spanning unit, integration, and performance suites that raised coverage above 80% on critical payment and reporting services.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Built and maintained **Java Spring Framework** services supporting trade settlement workflows processing thousands of transactions daily across distributed banking systems.
- Developed **TypeScript, HTML, and CSS** dashboard components for risk reporting, improving analyst workflow efficiency and user experience for operations teams.
- Contributed to **microservices decomposition** of monolithic clearing applications, enabling independent deployment of high-change modules without disrupting core batch processes.
- Enforced **data security** and access-control patterns aligned with financial regulatory standards during API integrations with internal and vendor systems.
- Supported **production incidents** and root-cause analysis for batch and real-time pipelines, coordinating with platform teams to restore service within SLA targets.
- Participated in sprint planning, estimation, and **risk mitigation** for cross-team dependencies affecting quarterly release trains.
- Automated regression and smoke testing within **CI/CD workflows**, reducing manual QA cycles before production deployments across multiple application teams.

- Collaborated with architects on framework selection and **technical direction** for internal tooling modernization initiatives spanning UI, APIs, and data layers.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Implemented **JavaScript and TypeScript** features for restaurant inventory dashboards, delivering responsive UI components used by account managers nationwide.
- Built **REST API integrations** between frontend clients and backend services, following contract tests and peer review standards across weekly release cadences.
- Contributed to **unit and integration testing** suites that increased confidence in sprint deliveries during a high-velocity internship program.
- Participated in agile ceremonies including sprint planning and demos, translating product requirements into actionable development tasks with reduced ambiguity.
- Resolved frontend performance bottlenecks in list rendering, improving load times for high-volume SKU views across customer-facing inventory screens.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Delivered nonprofit web presence using **HTML, CSS, and JavaScript**, launching donor-facing pages on schedule for foundation fundraising events.
- Integrated lightweight backend endpoints for form submissions and newsletter sign-ups with **data validation** and basic security hygiene.
- Collaborated with stakeholders to clarify content requirements and reduce ambiguity before implementation, improving delivery predictability on a tight timeline.
- Established version control and deployment workflow enabling maintainable updates after contract completion for ongoing foundation operations.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: JavaScript, TypeScript, HTML, CSS, React, responsive UI design, component architecture

Backend: Java, Spring Boot, Spring Framework, .NET, Python, REST APIs, microservices, distributed systems

Databases: PostgreSQL, MySQL, SQL Server, data processing pipelines, query optimization

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, Jenkins, GitHub Actions, containerization, cloud migration

Monitoring & Tools: Splunk, Datadog, Grafana, JUnit, Selenium, Postman, Git

Workflow & PM: Agile/Scrum, sprint planning, Jira, Confluence, cross-functional collaboration, stakeholder communication
