

Ryan Cho

Senior Full Stack Software Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full stack software engineer with eight years building scalable web applications across financial services and SaaS. Expert in JavaScript, React, and Java with deep experience in object-oriented design, distributed systems, and performance optimization. Led cross-team architecture discussions, mentored engineers on coding standards, and partnered with product and design to ship end-to-end features. Passionate about team-oriented solutions to complex engineering problems.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and delivered a **full-stack trading analytics platform** serving portfolio managers across multiple asset classes, reducing report generation time by 40% through optimized React dashboards and Java microservices.
- Led **cross-team technical design sessions** with product, UX, and backend engineers to define application architecture, UI component libraries, and third-party data integration patterns.
- Built a **reusable React component framework** adopted across three internal teams, standardizing state management with Redux and cutting feature delivery cycles by 25%.
- Designed and implemented **RESTful Java services** handling high-volume market data ingestion with SQL and NoSQL persistence layers, supporting sub-second query response times.
- Mentored **two junior engineers** on object-oriented design principles, test-driven development practices, and code review standards, elevating team output quality and velocity.
- Drove a **performance optimization initiative** across frontend bundle sizes and backend API latency, improving page load times by 35% and reducing server costs through efficient caching strategies.
- Partnered with product management to **translate complex business requirements** into scalable technical solutions, owning end-to-end delivery from design through production deployment.
- Implemented a **comprehensive automated testing suite** covering unit, integration, and end-to-end scenarios, increasing deployment confidence and reducing production incidents by 30%.
- Proactively identified and resolved **critical production bugs** in distributed trading workflows, establishing runbooks and monitoring alerts that improved mean time to recovery.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **full-stack internal banking applications** using Java, JavaScript, and React, supporting risk management and compliance workflows for global trading desks.
- Collaborated closely with **product managers and UX designers** to iteratively refine application interfaces based on trader feedback, improving user adoption across front-office teams.
- Implemented **data visualization tools** for portfolio analytics, enabling analysts to build custom dashboards and automate reporting pipelines.
- Designed **relational database schemas** and optimized SQL queries for high-throughput transaction processing, handling millions of daily records with consistent performance.
- Contributed to **Agile sprint planning and delivery**, managing individual project deliverables while coordinating with distributed backend and frontend engineering teams.
- Established **Git branching workflows and code review processes** that reduced merge conflicts and improved release stability across the technology group.
- Built **integration layers** connecting internal systems with third-party market data providers, applying object-oriented design patterns for maintainable, testable codebases.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **responsive web application features** using JavaScript and React, contributing to customer-facing SaaS product used by restaurant operators nationwide.
- Implemented **REST API integrations** with backend services, applying data structures and algorithms to optimize order processing workflows.
- Participated in **Agile development cycles**, collaborating with senior engineers on code reviews and learning industry-standard design techniques.
- Developed **automated unit tests** for frontend components, improving code coverage and reducing regression bugs in production releases.
- Assisted in **performance profiling** of web pages, identifying and fixing rendering bottlenecks that improved mobile load times.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed a **nonprofit organization website** using HTML, CSS, and JavaScript, delivering accessible web presence for community outreach programs.
- Implemented **content management workflows** enabling staff to update event pages and donation forms without developer assistance.
- Optimized **page load performance** through asset minification and lazy loading, improving visitor engagement metrics.
- Collaborated with **foundation stakeholders** to gather requirements and iterate on design, ensuring alignment with organizational mission.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Redux, JavaScript (ES6+), TypeScript, HTML5, CSS3, Vue.js, Webpack, Responsive Design

Backend: Java, Node.js, Spring Boot, RESTful APIs, Microservices, Object-Oriented Design

Databases: PostgreSQL, MySQL, MongoDB, Redis, SQL Query Optimization

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, Jenkins, GitHub Actions

Monitoring & Tools: Grafana, Datadog, Jest, Cypress, Git, Webpack

Workflow & PM: Agile/Scrum, Jira, Confluence, Cross-functional Collaboration, Technical Mentorship
