

Ryan Cho

Senior Full Stack Software Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full stack software engineer with 8+ years delivering scalable web applications across fintech and enterprise platforms. Strong expertise in JavaScript, React, and object-oriented architecture, with a track record of leading cross-team design discussions and shipping performant features from concept to production. Mentors junior engineers, collaborates closely with product and design, and takes end-to-end ownership of complex technical initiatives in dynamic, fast-paced environments.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and delivered **full-stack React applications** serving 12K+ monthly active users, partnering with product and UX to iterate on features that improved session engagement by 28%.
- Led **cross-team technical design sessions** on application architecture, API contracts, and third-party integrations, aligning front-end, back-end, and platform engineers on scalable implementation patterns.
- Built **internal visual tooling** for workflow configuration and data exploration, enabling non-engineers to prototype application flows and reducing routine engineering dependencies.
- Drove **performance optimization** across critical page loads and API endpoints, cutting average response times by 35% through query tuning, code splitting, and targeted caching strategies.
- Established **test-driven development practices** with Jest and Cypress, raising unit test coverage from 42% to 78% and reducing regression defects in production releases.
- Mentored **two junior engineers** on object-oriented design, code review standards, and React component patterns, accelerating their ramp-up and contribution to sprint deliverables.
- Owned end-to-end delivery of **high-priority project milestones**, coordinating with stakeholders to scope work, manage trade-offs, and ship on schedule across multiple release cycles.
- Proactively diagnosed and resolved **production incidents** in distributed services, implementing monitoring alerts and runbooks that shortened mean time to recovery.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Java-based web applications** supporting capital markets operations, delivering features used daily by 200+ internal analysts across trading and risk workflows.
- Collaborated with **product managers and front-end engineers** to translate business requirements into technical specifications, ensuring alignment on UI behavior and back-end data models.
- Implemented **RESTful services and data access layers** with strong object-oriented design, improving code maintainability across a modular enterprise codebase shared by multiple teams.
- Optimized **SQL queries and database interactions** for high-volume reporting pipelines, reducing batch processing windows by 22% without additional infrastructure spend.
- Participated in **Agile sprint ceremonies** and peer code reviews, contributing to consistent release cadence and shared coding standards across the technology organization.
- Integrated **third-party market data APIs** into internal platforms, handling error recovery and validation logic to improve data reliability for downstream consumers.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **JavaScript and React features** for a document-processing platform, implementing responsive UI components that improved task completion rates for end users.

- Worked closely with **senior engineers and designers** to incorporate feedback on component APIs, state management, and accessibility across the application front end.
- Wrote **unit and integration tests** for core modules, helping the team catch regressions early and maintain quality during rapid feature iteration.
- Contributed to **REST API integrations** between the front end and back-end services, documenting contracts and edge cases for team handoff.
- Applied **data structures and algorithms** to optimize search and filtering logic on large document sets, reducing client-side processing time on list views.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** for a nonprofit foundation site using HTML, CSS, and JavaScript, ensuring cross-browser compatibility and mobile-friendly layouts.
- Implemented **content management workflows** that allowed stakeholders to update site sections without developer assistance for routine changes.
- Collaborated with a **remote engineering team** to fix front-end defects and refine UI polish based on stakeholder feedback before launch deadlines.
- Applied **web application fundamentals** including semantic markup, form validation, and basic performance practices to deliver a stable public-facing presence.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Redux, JavaScript (ES6+), TypeScript, HTML5, CSS3, Vue, Angular, Webpack

Backend: Node.js, Java, Spring Boot, REST APIs, GraphQL, Python, Object-Oriented Design

Databases: PostgreSQL, MySQL, MongoDB, Redis, SQL, NoSQL

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, GitHub Actions, Terraform

Monitoring & Tools: Datadog, Jest, Cypress, Git, ESLint, Chrome DevTools

Workflow & PM: Agile, Scrum, Jira, Confluence, Code Review, Technical Design Documentation
