

# Ryan Cho

## Senior Full Stack Engineer

+1 608 360 1459 · [Ryanmcho100@gmail.com](mailto:Ryanmcho100@gmail.com) · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

### PROFESSIONAL SUMMARY

---

Senior Full Stack Engineer with 7+ years building scalable web platforms, workflow automation tools, and data-intensive applications across finance and SaaS. Expertise in React, TypeScript, and Python microservices with PostgreSQL and Elasticsearch. Proven track record designing intuitive interfaces for non-technical users and partnering with product, design, and ML teams to ship reliable, high-performance systems.

### WORK EXPERIENCE

---

#### Software Engineer

May/2022 - May/2026

##### Aspen Capital

Remote | 10th Floor, New York

- Architected a **configurable workflow platform** enabling portfolio managers to automate data pipelines without engineering support, reducing manual processing across 12+ investment workflows.
- Built **React and TypeScript visual editors** for rule-based automation, improving configuration throughput for operations teams handling high-volume financial document processing.
- Designed **Python REST microservices** orchestrating multi-step document ingestion, validation, and enrichment pipelines serving 40K+ daily API requests with sub-second p95 latency.
- Modeled and optimized **PostgreSQL schemas** for investment lifecycle data, introducing indexed query patterns that improved report generation performance by 35% across analytics dashboards.
- Integrated **Elasticsearch-backed search** across structured portfolio records, enabling analysts to retrieve cross-fund insights through faceted queries and full-text filters.
- Partnered with product and design to translate complex **automation requirements** into intuitive UI flows, shipping 15+ end-to-end features used by non-technical stakeholders.
- Led **cross-team code reviews** and frontend architecture discussions, establishing TypeScript patterns and component libraries adopted by a 6-engineer product squad.
- Drove **CI/CD pipeline improvements** and observability hooks across frontend and backend services, reducing production incident resolution time through structured logging and deployment guardrails.
- Exposed **ML-powered classification outputs** through configurable API layers, allowing business users to tune confidence thresholds and routing rules without redeploying services.

#### Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

##### Summer Analyst,

##### BNP Paribas

Remote | Seventh Avenue, New York

- Developed **React dashboards** for treasury operations teams, surfacing real-time liquidity metrics and trade settlement status across multiple business units.
- Implemented **Python RESTful services** supporting fixed-income trade lifecycle workflows, integrating with downstream risk and compliance systems via event-driven messaging.
- Designed **relational data models** in PostgreSQL for trade capture and reconciliation, enforcing constraints that reduced data quality exceptions during month-end close.
- Built **reusable UI component libraries** with TypeScript design patterns, accelerating feature delivery for three analyst-facing applications within the global markets group.
- Collaborated with **product managers and quants** to refine API contracts and workflow states for automated pricing feeds used by 200+ internal traders.
- Improved **application performance** by profiling React rendering bottlenecks and optimizing database query plans, cutting page load times on high-traffic reporting views.
- Participated in **agile delivery ceremonies** and peer code reviews, contributing to secure coding standards for applications handling sensitive financial data.

## Software Engineering Intern

Jun/2018 - May/2019

### Chexology

Remote | 17th Floor, New York

- Built **React frontend features** for restaurant inventory tracking, enabling managers to monitor real-time stock levels across tablet and mobile interfaces.
- Developed **REST API integrations** connecting mobile clients to backend services handling check-in and deposit reconciliation workflows.
- Wrote **unit and integration tests** for critical user flows, improving release confidence for a rapidly iterating early-stage product team.
- Collaborated with senior engineers on **database schema updates** supporting new billing and subscription management capabilities.
- Refactored legacy components into **reusable TypeScript modules**, reducing duplication across the customer-facing application surface.

## Web Developer

Sep/2017 - Nov/2017

### Bayesquare Foundation

Remote | New York

- Delivered **responsive web pages** for foundation outreach campaigns, ensuring accessibility and cross-browser compatibility for public-facing content.
- Implemented **JavaScript interactions** for donor engagement forms integrated with backend email notification services.
- Optimized **page load performance** through asset minification and lazy loading, improving time-to-interactive on content-heavy landing pages.
- Coordinated with stakeholders to translate **content requirements** into maintainable HTML/CSS templates deployed through the organization's CMS workflow.

## EDUCATION

---

### New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

## SKILLS

---

**Frontend:** React.js, TypeScript, JavaScript, HTML/CSS, Redux, Design Patterns, Component Architecture, Visual Editors, Responsive UI

**Backend:** Python, RESTful APIs, Microservices, Node.js, Event-Driven Architecture, API Design

**Databases:** PostgreSQL, Elasticsearch, Data Modeling, Query Optimization, Schema Design

**Cloud & DevOps:** AWS, Docker, Kubernetes, CI/CD, GitHub Actions, Infrastructure as Code

**Monitoring & Tools:** Datadog, Grafana, Structured Logging, Git, Jest, Pytest, Webpack

**Workflow & PM:** Agile/Scrum, Jira, Cross-Functional Collaboration, Technical Leadership, Code Review, Product Discovery
