

Ryan Cho

Senior Full Stack Software Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full stack engineer with 7+ years building scalable web and mobile platforms across fintech and high-traffic consumer systems. Owns delivery of React applications, Python and Java backend services, and cloud-native APIs from design through production. Drives cross-team technical decisions, observability improvements, and AI-assisted engineering workflows. Committed to shipping reliable features, mentoring engineers, and designing performant architectures at scale.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and shipped **full-stack portfolio and trading features** with React and Python services, unifying advisor workflows across **15+ integrated modules** with consistently sub-second page loads.
- Designed **RESTful and GraphQL APIs** consumed by web dashboards and mobile-responsive clients, eliminating duplicate backend logic by **40%** through a shared service layer.
- Built **event-driven notification pipelines** using message queues and workflow orchestration, improving delivery reliability for time-sensitive market alerts during peak trading sessions.
- Led performance tuning across **PostgreSQL and Redis** layers, reducing p95 API latency by **35%** on read-heavy paths serving **10K+ daily active users**.
- Partnered with Product and Design to own **roadmap initiatives end-to-end**, from concept and prototyping through deployment, instrumentation, and post-launch optimization.
- Established **observability standards** including structured logging, distributed tracing, and alerting that cut mean time to detection for production incidents by **50%**.
- Mentored **3 engineers** on system design, React patterns, and code review practices while documenting team conventions adopted across the engineering organization.
- Adopted **AI-assisted development workflows** with LLM tooling for test scaffolding and documentation, accelerating feature delivery without compromising code quality.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Java and Python backend services** for global markets operations, processing **millions of transactions daily** under strict audit and compliance controls.
- Built internal **React dashboards** for risk and treasury teams, aggregating real-time metrics from **RESTful microservices** deployed on cloud infrastructure.
- Contributed to **system design reviews** for messaging integrations between legacy platforms and modern APIs, improving data freshness for downstream analytics consumers.
- Optimized **SQL and NoSQL storage** patterns for regulatory reporting pipelines, reducing batch processing windows by **25%** during quarter-end volume spikes.
- Collaborated with distributed stakeholders to ship releases on aggressive timelines, maintaining **zero critical production regressions** across **8 consecutive deployments**.
- Automated integration and deployment workflows on **AWS**, shortening release cycles and improving developer productivity across the technology analyst team.
- Helped standardize **API contracts and error-handling conventions** through code reviews and engineering guild sessions adopted by sibling application teams.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Implemented **React Native and mobile-responsive web features** for a restaurant technology platform, streamlining checkout flows that improved order completion rates.
- Built **Python REST APIs** connecting POS integrations and third-party services, supporting reliable order synchronization during peak lunch service volumes.
- Expanded automated test coverage on **full-stack payment modules**, reducing escaped defects reaching QA on business-critical transaction paths.
- Collaborated with senior engineers on **database schema and caching changes** that kept mobile client payloads lean for low-bandwidth environments.
- Delivered iterative feature updates in **two-week sprint cycles**, gaining hands-on experience with code review, CI pipelines, and production releases.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Delivered **responsive web pages** and CMS updates for a nonprofit foundation site using modern JavaScript, improving mobile accessibility for donor-facing content.
- Integrated **third-party APIs** for event registration and mailing list workflows, automating manual data entry for the operations team.
- Optimized **front-end assets and image delivery**, reducing page load time and strengthening engagement on campaign landing pages.
- Translated stakeholder requirements into **deployable web features** within a compressed project timeline while working fully remote.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React.js, React Native, TypeScript, JavaScript, HTML5, CSS3, Mobile Web, Responsive Design

Backend: Python, Java, Go, Node.js, C#, RESTful APIs, GraphQL, Microservices, Event-Driven Architecture

Databases: PostgreSQL, MySQL, MongoDB, Redis, DynamoDB, SQL Server

Cloud & DevOps: AWS, Google Cloud Platform, Azure, Docker, Kubernetes, Terraform, CI/CD Pipelines

Monitoring & Tools: Datadog, Prometheus, Grafana, ELK Stack, Git, Postman

Workflow & PM: Agile/Scrum, Temporal, AWS Step Functions, Jira, Confluence, Cross-Functional Delivery
