PROFESSIONAL SUMMARY

Senior full stack engineer with 7+ years building scalable web applications, REST APIs, and React frontends in regulated industries. Owns production systems end-to-end—from API design and automated testing to incident triage and postmortem-driven improvements. Mentors engineers, leads technical design reviews, and partners with product and stakeholders to deliver reliable SaaS platforms. Proficient in Ruby on Rails, JavaScript, Postman, and RSpec across remote, cross-functional teams.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led full stack delivery across **Ruby on Rails** services and **React** SPAs supporting portfolio analytics used by **40+ investment professionals** daily
- Designed and implemented **RESTful APIs** with versioning, validation, and contract testing, reducing integration defects across **8 downstream consumer services**
- Owned **production incident response** for tier-1 trading and reporting workflows, improving mean time to recovery through runbooks, **Datadog** dashboards, and blameless postmortems
- Mentored **3 junior engineers** through code reviews, pairing sessions, and structured onboarding, accelerating time-to-first pull request from weeks to days
- Drove **RSpec** and **Jest** test coverage for critical payment and reconciliation paths, enabling safer weekly releases without scheduled downtime
- Partnered with product and compliance stakeholders to translate regulatory requirements into **technical design documents** presented to engineering and business leaders
- Refactored legacy monolith modules into **modular service boundaries**, improving deploy independence and reducing cross-team merge conflicts through scoped ownership
- Implemented **Postman**-based API collections and environment configs for QA and partner teams, standardizing integration testing across release cycles
- Optimized **PostgreSQL** queries and caching layers handling **2M+ daily records**, improving dashboard load times for executive reporting views
- Led small project teams through **agile sprints**, coordinating scope, estimates, and delivery commitments with minimal oversight from engineering leadership

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Built internal tools and **API integrations** connecting risk, operations, and reporting platforms across global finance technology stacks
- Developed **React** and **JavaScript** interfaces for analyst workflows, improving data entry accuracy through client-side validation and accessible UI patterns
- Supported **production triage** for batch and API failures, diagnosing root causes and coordinating fixes with upstream system owners across time zones
- Authored **technical documentation** and runbooks for handoffs between global teams in a fully remote delivery model
- Collaborated with business analysts during design reviews to refine requirements and propose alternative **technical approaches** to complex workflow problems
- Implemented automated tests and **CI pipelines** aligned with RSpec-style conventions, catching regressions before promotion to production environments

- Participated in **technical interviews** and intern mentorship, evaluating candidates and guiding summer analysts on coding standards and git workflows

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Contributed to **full stack features** for a restaurant technology platform using React, JavaScript, and backend API services
- Wrote unit and integration tests improving confidence in **checkout and order management** flows before production deployment
- Assisted senior engineers with bug fixes and code reviews, learning **Rails conventions** and REST API design patterns
- Built responsive **HTML/CSS** layouts aligned with design specs across mobile and desktop breakpoints
- Documented local development setup and **API usage** for onboarding future interns on the engineering team

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed and maintained the nonprofit organization's **public-facing website** with HTML, CSS, and JavaScript
- Implemented content updates and **performance improvements** for donor-facing pages during a remote contract engagement
- Collaborated with stakeholders to clarify requirements and deliver **iterative improvements** within tight timelines
- Ensured **cross-browser compatibility** and mobile responsiveness for accessibility across visitor devices

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Redux, JavaScript (ES6+), HTML5, CSS3, Responsive Design, Accessibility

Backend: Ruby on Rails, REST API Design, Node.js, RSpec, JSON, Microservices

Databases: PostgreSQL, Oracle, Redis, SQL, Schema Design, Query Optimization

Cloud & DevOps: AWS, Docker, CI/CD, GitHub Actions, Infrastructure as Code, Linux

Monitoring & Tools: Datadog, Postman, Git, Jira, Swagger, Chrome DevTools

Workflow & PM: Agile, Scrum, Technical Design Reviews, Mentorship, Stakeholder Communication, Incident Management
