

Ryan Cho

Senior Software Engineer | Java & Microservices

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Senior software engineer with 8 years of experience building enterprise applications in banking and financial services. Skilled in Java, Spring Boot, and microservices architecture with a track record leading Agile teams, mentoring developers, and delivering scalable real-time integrations. Proficient in REST APIs, automated testing, event-driven systems with Kafka, and containerized cloud deployments. Combines deep technical ownership with effective communication to deliver reliable, mission-critical platforms.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led a **cross-functional Scrum team of 6 engineers** delivering investment platform microservices, reducing release cycle time by 40% through **GitLab CI/CD pipelines** and automated regression suites.
- Architected **Java 11 and Spring Boot REST services** processing 2M+ daily transactions with sub-200ms latency, applying **Adapter and Facade design patterns** to integrate legacy portfolio systems.
- Drove adoption of **Apache Kafka event streaming** for real-time market data pipelines, enabling downstream consumers to scale independently across **Kubernetes** deployments.
- Built **React.js dashboards** for portfolio managers, partnering with product owners to translate complex requirements into intuitive UI workflows serving 500+ internal users.
- Established **unit and integration testing standards** with JUnit and Mockito, raising coverage from 62% to 89% across 12 microservices and cutting production defects by 35%.
- Optimized **PostgreSQL queries and Redis caching** for high-frequency reads, improving API response times by 55% during peak trading windows.
- Mentored **3 junior developers** on OOD principles, code review practices, and API design, with two promoted to mid-level roles within 18 months.
- Containerized services with **Docker** and orchestrated multi-environment deployments, maintaining 99.9% uptime for investment operations workloads.
- Partnered with architects and stakeholders to document **enterprise integration patterns** in team wikis, reducing new engineer onboarding time by 30%.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Spring Framework microservices** supporting Digital Cards and Risk platforms used by 10,000+ associates across North American banking operations.
- Led **Agile sprint ceremonies** for a team of 5 developers, coordinating backlog refinement and delivery milestones aligned with regulatory release schedules.
- Designed **real-time REST and file-based integrations** between core banking systems and merchant services, processing 500K+ records nightly with automated error reconciliation.
- Implemented **Elasticsearch indexing** for transaction search and audit trails, reducing investigator query time from minutes to seconds across three years of historical data.
- Applied **Factory, Command, and Adapter patterns** to refactor legacy Java modules into maintainable services, simplifying deployments across on-premises and **SaaS hybrid workloads**.
- Built comprehensive **JUnit and Postman test suites** for API validation, supporting continuous delivery within enterprise **Git** workflows and change management gates.
- Troubleshooted **business-critical application defects** spanning data configuration errors and cross-system messaging failures, restoring services within SLA for 99.5% of incidents.

- Collaborated with solution engineers and product owners to define **scalable database-level processing** for batch settlement jobs, improving throughput by 45% without infrastructure expansion.
- Coached **intern and junior analysts** on OOAD, secure coding practices, and enterprise design standards during the technology analyst rotation program.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React.js components** for a restaurant compliance tracking dashboard, improving page load performance by 30% through lazy loading and state optimization.
- Developed **REST API endpoints** in Java supporting mobile inspection workflows, integrating with PostgreSQL for persistent audit records.
- Wrote **unit tests with JUnit** covering 75% of backend service logic, contributing to the team's first automated testing initiative.
- Participated in **Agile standups and sprint reviews**, delivering 8 feature stories across two release cycles during the internship.
- Used **Git feature branching** and pull request workflows for peer-reviewed code integration across a 4-person engineering team.
- Documented API contracts and setup procedures in the **team wiki**, reducing new developer environment setup from 2 days to 4 hours.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** using HTML, CSS, and JavaScript for nonprofit fundraising campaigns reaching 15,000+ monthly visitors.
- Integrated **RESTful APIs** for donation processing and volunteer registration flows with client-side validation and error handling.
- Optimized **MySQL queries** and page assets, improving site load time by 25% on mobile devices.
- Collaborated with foundation stakeholders to translate content requirements into accessible, maintainable **UI layouts**.
- Maintained a version-controlled codebase using **Git**, supporting iterative releases over the three-month engagement.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React.js, JavaScript, HTML5, CSS3, Responsive UI Development

Backend: Java 11+, Spring Boot, Spring Framework, Microservices, REST APIs, OOD/OOAD, Design Patterns (Adapter, Factory, Command, Facade)

Databases: PostgreSQL, MySQL, Redis, Elasticsearch, Database Query Optimization

Cloud & DevOps: Docker, Kubernetes, GitLab CI/CD, IaaS, SaaS Deployments

Monitoring & Tools: Apache Kafka, Postman, Git, JUnit, Mockito, Automated Testing

Workflow & PM: Scrum, Agile, Team Leadership, Technical Mentorship, Wiki Documentation
