PROFESSIONAL SUMMARY

Full stack engineer with 7+ years building cloud-native applications on AWS using Node.js, TypeScript, and React. Led design and delivery of microservices handling enterprise data exchange, test automation pipelines, and CI/CD workflows across distributed systems. Strong hands-on experience with Lambda, SQS, S3, DynamoDB, and infrastructure-as-code. Combines analytical problem-solving with Agile collaboration to ship reliable, observable platform services at scale.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and deployed **12+ Node.js microservices** on **AWS Lambda** behind **ALB**, processing portfolio and market data exchanges for internal SaaS platforms serving **200+ analysts**.
- Built **React** and **TypeScript** dashboards with reusable component libraries, reducing feature delivery cycles by **35%** while standardizing enterprise UI patterns across product teams.
- Implemented **event-driven data pipelines** using **SQS**, **SNS**, and **S3** to automate batch ingestion and reconciliation workflows, cutting manual data handling by **60%**.
- Designed **DynamoDB** and **RDS** data models supporting high-frequency trading analytics, optimizing query paths to sustain **sub-100ms read latency** under peak load.
- Established **CI/CD pipelines** with **Jenkins** and **AWS CDK**, enabling zero-downtime releases and consistent **infrastructure-as-code** provisioning across dev, staging, and production VPCs.
- Led **test automation** framework expansion covering API contracts and integration suites, raising deployment confidence and reducing regression defects by **40%** release-over-release.
- Configured **CloudWatch** alarms, dashboards, and distributed tracing to monitor microservice health, improving **MTTR** for production incidents across cross-functional on-call rotations.
- Partnered with security and infrastructure teams to enforce **IAM**, **KMS**, and **Route 53** standards, hardening perimeter access while maintaining developer self-service via **AWS CLI** and SDK tooling.
- Mentored **3 engineers** on distributed design patterns, code review practices, and Agile delivery, elevating team throughput on platform modernization initiatives.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Node.js** services within an **AWS** cloud environment supporting trade reporting and regulatory data exchange across global banking operations.
- Built **React** interfaces for internal risk dashboards, translating complex financial datasets into actionable views used by **50+ business stakeholders** daily.
- Automated **data exchange** workflows between legacy mainframe systems and modern APIs using **SQS**-backed message queues, improving throughput by **3x** during month-end processing.
- Contributed to **microservices** decomposition of monolithic reporting apps, applying **object-oriented design** principles and domain-driven boundaries to reduce deployment risk.
- Integrated **S3**-based document storage and **Lambda** functions for serverless transform jobs, lowering infrastructure costs by **25%** versus prior EC2-hosted workloads.
- Participated in **Agile** scrum ceremonies and cross-team design reviews, delivering sprint commitments with consistent velocity across a **12-person engineering pod**.
- Implemented monitoring hooks with **CloudWatch** metrics and structured logging, enabling proactive detection of pipeline failures before downstream impact.

- Supported **CI/CD** adoption with **Jenkins** pipelines and scripted deployments, establishing repeatable release processes aligned with enterprise compliance gates.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **JavaScript** and **Node.js** REST APIs supporting inventory and order management features for a hospitality SaaS product used by **30+ client venues**.
- Developed **React** front-end modules for admin workflows, delivering **8 reusable components** that accelerated feature development across the intern engineering pod.
- Wrote unit and integration tests expanding **test automation** coverage for critical payment and checkout paths, increasing API test coverage by **45%** before production releases.
- Assisted in deploying services to **AWS** using **S3** static hosting and lightweight compute, supporting **3 environment** deployments across staging and production workflows.
- Participated in **Agile** standups and code reviews, delivering **15+ sprint stories** on schedule while documenting API changes for downstream consumers.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed responsive **JavaScript** web pages and forms for nonprofit community programs, improving mobile accessibility across **5 active campaign sites**.
- Integrated third-party donation APIs and lightweight **Node.js** middleware to streamline contribution data collection, processing **500+ monthly transactions** for back-office reporting.
- Collaborated with design volunteers in an **Agile**-style iteration cycle, shipping **4 incremental UX releases** based on stakeholder feedback each sprint.
- Maintained cross-browser compatibility and performance tuning for content-heavy pages, reducing average load times by **30%** through asset optimization.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React.js, TypeScript, JavaScript, HTML5, CSS3, Component Architecture, Responsive UI

Backend: Node.js, Python, REST APIs, Microservices, Event-Driven Architecture, SDK Integration

Databases: Amazon DynamoDB, Amazon RDS, NoSQL, Relational Databases, Data Modeling, Query Optimization

Cloud & DevOps: AWS (Lambda, S3, SQS, SNS, IAM, VPC, Route 53, KMS, ALB/ELB), AWS CDK, CloudFormation, Jenkins, CI/CD, Infrastructure as Code

Monitoring & Tools: Amazon CloudWatch, AWS CLI, Distributed Tracing, Structured Logging, Alerting Dashboards, Performance Tuning

Workflow & PM: Agile, Scrum, Cross-Functional Collaboration, Technical Documentation, Code Review, Mentorship
