PROFESSIONAL SUMMARY

Full stack software engineer with 6+ years delivering enterprise web platforms in financial services and investment technology. Deep experience architecting Java 17 and Spring Boot microservices with REST APIs, paired with React and TypeScript frontends on AWS. Drives Agile feature delivery, test automation with JUnit, and code quality through SonarQube while mentoring teams on secure, accessible user experiences. Proven collaborator across product, engineering, and stakeholder groups on multi-tier systems.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected **Spring Boot microservices** in Java 17 with **REST endpoints** powering portfolio analytics and risk dashboards used by 200+ investment operations staff daily.
- Built **reusable React and Redux components** in TypeScript and SCSS, delivering **cross-browser UIs** validated with assistive technology for enterprise accessibility requirements.
- Designed **PostgreSQL schemas** and ORM data layers for trade and reporting workloads, tuning queries to cut average report generation time by 35%.
- Integrated **AWS Lambda, S3, and event-driven pipelines** for document ingestion and batch reconciliation, increasing nightly processing throughput by 40%.
- Established **JUnit test suites** and SonarQube quality gates requiring 80%+ coverage on new Java services before production deployment.
- Led **Agile ceremonies** and sprint planning for an 8-person cross-functional team, coordinating estimates across backend and frontend delivery tracks.
- Partnered with security stakeholders to embed **secure coding practices** and SDLC controls across microservice releases in a regulated financial environment.
- Mentored 3 engineers on **REST design patterns**, webpack/npm tooling, and GitHub review workflows, shortening onboarding time by 50%.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **multi-tier enterprise applications** with Java EE and Spring Boot supporting capital markets trading and operational reporting for regional banking desks.
- Implemented **RESTful web services** with JSON payloads connecting front-office platforms to risk and settlement systems handling 50K+ daily transactions.
- Created **React and JavaScript ES6** interfaces and shared component libraries adopted by 4 internal product teams for analytics and workflow tooling.
- Managed **PostgreSQL and RDBMS** models with ORM frameworks, optimizing stored procedures to meet regulatory reporting deadlines under tight batch windows.
- Executed **Agile estimation and release planning** for complex initiatives spanning 6-month roadmaps, coordinating dependencies across multiple engineering groups.
- Authored **JUnit verification tests** for payment and reconciliation modules, reducing production defects by 30% in targeted service areas.
- Supported **accessibility reviews** for internal portals, validating HTML5 semantics, keyboard navigation, and screen-reader compatibility before release.
- Collaborated with business analysts and non-technical stakeholders to translate requirements into **technical designs** across 12+ sprint cycles.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React UI components** integrated with REST APIs for inventory and order management features deployed in production pilot environments.
- Implemented **JavaScript and TypeScript** modules using ES6 patterns, contributing to shared npm packages consumed by the core web application.
- Defined **JSON API contracts** and integration tests validating backend responses across development and staging environments.
- Participated in **Agile standups and sprint reviews**, consistently delivering assigned story points across 3 release cycles.
- Applied **HTML5, CSS3, and responsive layouts** ensuring consistent rendering across Chrome, Firefox, and Safari during QA validation.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **HTML5, CSS3, and JavaScript** pages for nonprofit fundraising campaigns, improving load performance through asset optimization.
- Integrated **REST API endpoints** for donation form submissions with client-side validation and structured error handling.
- Collaborated with designers to implement **responsive web layouts** supporting mobile and desktop viewports for community outreach programs.
- Used **Git version control** for feature branches and peer code reviews within a remote distributed team.
- Resolved **cross-browser compatibility** issues through targeted testing and fixes reported by site administrators.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Redux, TypeScript, JavaScript ES6, HTML5, CSS3, SCSS, Webpack, npm, Storybook

Backend: Java 17, Spring Boot, Java EE, REST, Microservices, JUnit, Wildfly, Apache POI

Databases: PostgreSQL, SQL, RDBMS, ORM, Hibernate

Cloud & DevOps: AWS (Lambda, S3, Kafka), GitHub, CI/CD Pipelines, Docker

Monitoring & Tools: SonarQube, HTTP/REST Design Patterns, Accessibility Testing, MS Office

Workflow & PM: Agile/Scrum, Sprint Planning, Estimation, Cross-Team Collaboration, Stakeholder Communication
