

Ryan Cho

Senior Full-Stack Software Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full-stack software engineer with 5+ years delivering scalable web applications across finance and investment platforms. Proficient in TypeScript, React, Node.js, Python, and Java with SQL, NoSQL, and ETL experience. Built cloud-native services on AWS and Azure using Docker, CI/CD, automated testing, and observability. Skilled in LLM integration, prompt orchestration, and agent workflows. Collaborative Agile practitioner experienced in pair programming and cross-functional communication.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected a **full-stack investment analytics platform** with **TypeScript**, **React**, and **Node.js**, supporting portfolio managers across 12+ desk workflows with sub-second data refresh
- Built **REST and GraphQL APIs** in **Python** and **Node.js** backed by **SQL and NoSQL** stores, automating reconciliation workflows that previously required daily manual review
- Integrated **LLM-powered research assistants** with **prompt orchestration** and evaluation hooks, enabling analysts to query unstructured market documents through a governed internal interface
- Established **Docker-based CI/CD pipelines** on **AWS** with automated unit, integration, and end-to-end tests, reducing deployment lead time from days to under two hours
- Led **cross-team design reviews** for microservice boundaries and API contracts, mentoring three engineers on testable, maintainable coding standards
- Implemented **centralized logging and monitoring** with structured metrics and alerting, cutting mean time to detection for production incidents across core trading services
- Partnered with product and compliance stakeholders in **Agile sprints**, facilitating **pair programming** sessions that accelerated feature delivery without sacrificing audit readiness
- Migrated legacy reporting modules to **React with TypeScript** and a shared **Tailwind** component library, improving UI consistency across eight internal applications

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Java Spring Boot** microservices for trade settlement workflows, maintaining ledger consistency through **SQL-backed** transactional processing at peak market volumes
- Built **React and TypeScript** dashboards for risk analysts, surfacing real-time exposure metrics across multi-region trading desks
- Designed **ETL pipelines** extracting data from legacy sources into **PostgreSQL** and **MongoDB**, supporting regulatory reporting deadlines with repeatable validation checks
- Deployed containerized services to **Azure** and **AWS** using **Docker** and **CI/CD** automation, sustaining high availability during peak trading hours
- Participated in **Agile sprint ceremonies** and **pair programming**, collaborating with business analysts and QA to ship features with comprehensive automated test coverage
- Implemented **API orchestration layers** in **Node.js** connecting internal banking systems, reducing integration defects through contract-first development
- Enhanced **observability** with application logging, distributed tracing, and on-call runbooks, shortening incident triage during production support rotations
- Contributed to **C#.NET** internal tooling for operations teams, delivering readable, testable modules aligned with enterprise architecture standards

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React.js** features for a restaurant check-management SaaS product, improving order tracking visibility for staff across 50+ client locations
- Developed **Node.js API endpoints** with **MongoDB** persistence, enabling real-time sync between POS integrations and the web dashboard
- Wrote **automated unit and integration tests** with Jest, raising coverage on core modules and catching regressions before release
- Collaborated in **Agile sprints** through **pair programming** with senior engineers, shipping incremental releases on two-week cadences
- Refactored legacy **JavaScript** components to **TypeScript**, improving type safety and reducing runtime errors in production

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** using HTML, CSS, and **JavaScript** for nonprofit fundraising campaigns delivered on fixed timelines
- Integrated **SQL database** queries into dynamic content modules, enabling staff to update donation tracking without developer intervention
- Optimized page load performance through asset minification and caching, improving Lighthouse performance scores on key landing pages
- Collaborated remotely with stakeholders to translate requirements into **maintainable front-end code** with consistent cross-browser behavior
- Implemented form validation and accessibility improvements, aligning public-facing pages with **WCAG** usability standards

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: TypeScript, React.js, AngularJS, Vue.js, Next.js, Tailwind CSS, JavaScript, HTML5, CSS3

Backend: Node.js, Python, Java, Spring Framework, C#, .NET, REST APIs, GraphQL

Databases: SQL, PostgreSQL, MongoDB, NoSQL, Redis, Vector Databases, ETL Pipelines

Cloud & DevOps: AWS, Microsoft Azure, Google Cloud Platform, Docker, CI/CD, Kubernetes

Monitoring & Tools: Automated Testing, Jest, JUnit, Logging, Distributed Tracing, Application Monitoring

Workflow & PM: Agile, Scrum, Sprint Planning, Pair Programming, Jira, Git, Code Review
