PROFESSIONAL SUMMARY

Senior full-stack engineer specializing in TypeScript, React, and production web platforms for capital markets and trading operations. Delivers end-to-end ownership of user-facing features, REST and WebSocket integrations, and PostgreSQL data layers with strong UI judgment. Partners with product and engineering leaders to ship reliable, observable software in startup-paced environments.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Owned full-stack delivery of **React and TypeScript** trading workflow applications serving portfolio analysts across multiple fund strategies
- Designed reusable **component architecture** and page-level patterns that accelerated delivery of new market data and pricing views
- Built **REST API integrations** with backend services for pricing, positions, and settlement data through contract-first collaboration across teams
- Implemented **WebSocket-driven real-time updates** for live market feeds and order status, keeping trading dashboards current during market hours
- Partnered with product stakeholders to translate complex **fixed income and derivatives requirements** into intuitive, responsive application workflows
- Optimized frontend performance through **state management refinements** and selective rendering on data-heavy dashboards used by trading desks
- Worked with **PostgreSQL-backed application data** to design reliable features with clear schema boundaries and migration-safe query patterns
- Led production debugging across client, API, and data layers; drove **observability improvements** that shortened incident resolution for platform workflows

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **TypeScript and React** interfaces for capital markets tooling used by trading and operations teams across global desks
- Built internal web applications supporting **fixed income and credit workflow** automation within a regulated banking environment
- Integrated frontend modules with **REST APIs** exposing trade lifecycle, reference data, and compliance checkpoints
- Delivered **real-time market data displays** using WebSocket connections for intraday pricing and position monitoring
- Collaborated with backend engineers to define **API contracts and data models** for service-based integrations across platform boundaries
- Improved **usability and reliability** of workflow-heavy tools processing high-volume trading and operational requests
- Supported **PostgreSQL and relational database** features for reporting dashboards and operational audit trails
- Mentored junior analysts on **Git workflows**, code review standards, and full-stack debugging in production systems

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React and JavaScript** web features for a payments product, contributing to customer-facing checkout and account flows
- Integrated frontend components with **REST APIs** for order management, validation, and transactional state updates
- Implemented responsive UI patterns improving **usability** across mobile and desktop form factors for core user journeys
- Participated in **Git-based collaborative development**, peer reviews, and iterative feature releases in a remote startup team
- Assisted with **PostgreSQL-backed admin tooling** supporting internal operations and data review workflows

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **JavaScript web application** pages for a nonprofit platform using component-driven frontend patterns
- Built responsive layouts and **UI components** aligned to accessibility and cross-browser compatibility standards
- Connected frontend forms to backend services through **REST API endpoints** for content management and user data
- Supported **Git version control** and deployment practices within a small remote engineering team

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: TypeScript, JavaScript, React.js, Next.js, HTML5, CSS3, Responsive UI, Component Architecture, State Management, WebSocket Clients

Backend: Node.js, REST APIs, API Design, Service Integration, Web Applications, Microservices

Databases: PostgreSQL, Relational Databases, SQL, Schema Design, Query Optimization

Cloud & DevOps: AWS, CI/CD, Docker, Git, Automated Deployments, Linux

Monitoring & Tools: Application Observability, Production Debugging, Performance Profiling, Jest, Chrome DevTools

Workflow & PM: Agile, Cross-functional Collaboration, Technical Documentation, Code Review, Startup Execution
