PROFESSIONAL SUMMARY

Software engineer with experience spanning fintech platforms and enterprise banking systems. Builds production software with TypeScript, React, and Node.js, backed by PostgreSQL data models, automated testing, and containerized CI/CD pipelines. Known for owning API design, authentication flows, and cross-functional delivery from architecture discussions through reliable releases.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Owned **end-to-end delivery** of TypeScript features across React client applications and Node.js services powering portfolio and risk workflows for investment teams.
- Designed **RESTful APIs** with JWT-based authentication, schema validation, and consistent error contracts that became the standard for three downstream product modules.
- Modeled **PostgreSQL schemas** and tuned query execution plans for analytics endpoints, improving report generation performance on large holdings datasets.
- Embedded **unit, integration, and end-to-end tests** into feature workflows, enabling predictable weekly releases through automated CI gates.
- Packaged services with **Docker** and promoted builds through **GitHub Actions pipelines**, reducing manual deployment steps across staging and production environments.
- Introduced **Redis-backed caching** for frequently accessed reference data, relieving pressure on core database read paths during market hours.
- Collaborated with product and engineering leadership on **platform architecture**, separating tenant configuration from shared domain services in a growing SaaS codebase.
- Migrated selected customer surfaces to **Next.js** with **Tailwind CSS**, improving maintainability of shared UI primitives and accelerating feature iteration.
- Mentored engineers on **API design, testing strategy, and code review quality**, raising team consistency on production-ready pull requests.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Built **TypeScript services** on Node.js supporting internal banking tools used by operations and technology teams across multiple business lines.
- Implemented **REST APIs** with OAuth flows and granular authorization for cross-desk applications subject to internal compliance review.
- Refactored **PostgreSQL** data access layers and indexing strategy for regulatory reporting jobs processing high-volume transactional history.
- Wrote **automated tests** alongside new features, strengthening reliability of payment-adjacent modules before production promotion.
- Containerized application workloads with **Docker** and integrated them into **Jenkins-based CI/CD** workflows for repeatable environment promotion.
- Contributed **Fastify middleware** patterns for logging, validation, and centralized exception handling reused across microservice teams.
- Supported adoption of **monorepo practices** to share typed utilities and reduce duplicated business logic between sibling repositories.

- Documented runbooks and service dependencies for **production support rotations**, shortening incident triage for on-call engineers.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Developed **React interfaces** for warehouse inventory workflows, replacing manual spreadsheet steps for daily operations staff.
- Built **Node.js endpoints** with session management and input validation for internal administrative tooling.
- Added **Jest coverage** for critical UI and API paths, catching regressions prior to QA cycles.
- Helped **containerize** local development stacks so intern and full-time contributors shared consistent runtime environments.
- Converted legacy **JavaScript modules to TypeScript**, improving compile-time safety across shared frontend utilities.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Shipped **responsive web experiences** with HTML, CSS, and JavaScript for nonprofit campaign landing pages.
- Consumed **REST endpoints** to render donation activity summaries on organizer-facing dashboards.
- Resolved **cross-browser layout issues**, preserving readable presentation on mobile and desktop form factors.
- Used **Git-based workflows** to coordinate incremental releases with designers and volunteer stakeholders.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, component libraries, responsive design

Backend: Node.js, Fastify, Express, RESTful API design, JWT, OAuth, validation middleware

Databases: PostgreSQL, schema design, query optimization, Redis, SQL

Cloud & DevOps: Docker, CI/CD, GitHub Actions, Jenkins, Nginx, SSL/TLS, cloud deployment

Monitoring & Tools: Jest, Playwright, logging frameworks, APM tooling, Git

Workflow & PM: Agile/Scrum, Jira, technical documentation, code review, cross-functional collaboration
