

Ryan Cho

Senior Full Stack Software Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full stack engineer with seven years delivering API-first financial applications spanning lending pipelines, capital markets tooling, and institutional banking platforms. Deep expertise in Java, Spring Boot, and React for microservices handling structured loan data, document workflows, and high-volume transaction processing. Trusted to lead technical design, strengthen CI/CD reliability, and partner with product and operations teams in Agile environments.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and maintained **full stack lending workflow modules** using Java, Spring Boot, and React, supporting origination-to-servicing features used daily by internal operations teams across multiple product surfaces.
- Built **RESTful microservices** for loan document ingestion, pricing validation, and underwriting handoffs, reducing manual reconciliation through automated API orchestration.
- Designed **PostgreSQL schemas and Hibernate/JPA data layers** for structured and unstructured financial records, improving query performance on high-volume loan portfolio tables.
- Led **unit, integration, and component testing** expansion across critical services, strengthening release reliability and reducing production regressions across quarterly deployments.
- Optimized **high-volume transaction processing** pipelines through indexing, caching, and async batching, achieving consistent sub-second response times under peak load.
- Contributed to **cloud-native architecture** initiatives and implemented API-first service boundaries deployed via Docker and CI/CD pipelines with zero-downtime release patterns.
- Resolved **production incidents** for borrower-facing and internal portals, restoring service stability through root-cause analysis, runbooks, and on-call rotation participation.
- Mentored engineers on **secure application development**, code review standards, and Agile/Scrum delivery during platform modernization efforts.
- Integrated third-party **credit verification and document management APIs**, enabling compliant data exchange aligned with institutional data protection requirements.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Java and Spring Boot microservices** supporting capital markets and lending-adjacent workflows, translating business requirements into API-driven technical solutions for front-office teams.
- Implemented **REST and SOAP integrations** connecting core banking systems with downstream pricing, risk, and reporting platforms across the trade lifecycle.
- Built **React and Angular components** for internal dashboards surfacing loan tape analytics, portfolio exposure, and operational metrics to analysts and managers.
- Managed **relational database operations** on Oracle and SQL Server, authoring optimized queries and stored procedures for financial reporting at institutional scale.
- Expanded **automated test suites** and participated in code reviews, improving software quality and adherence to SDLC gates within Agile sprint ceremonies.
- Supported **CI/CD pipeline** enhancements and deployment automation, enabling faster, more reliable releases across development and staging environments.
- Collaborated with cross-functional stakeholders to troubleshoot **production system issues**, maintaining availability for business-critical banking applications.

- Applied **secure development and data protection** practices handling sensitive customer and financial information under regulatory compliance standards.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Contributed to **full stack web application** development using JavaScript, HTML, and CSS, delivering responsive interfaces for customer-facing product workflows.
- Assisted in building **REST API endpoints** and database-backed features, gaining hands-on experience with Git-based development and peer code review processes.
- Wrote **unit and integration tests** for frontend and backend modules, supporting improved reliability during iterative Agile sprints.
- Participated in **requirement analysis sessions**, translating product specs into technical tasks and incremental delivery milestones.
- Debugged and resolved defects across the application stack, strengthening problem-solving skills in a collaborative remote engineering environment.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** for a nonprofit foundation site using HTML, CSS, and JavaScript, ensuring cross-browser compatibility and accessible layout standards.
- Collaborated with stakeholders to implement **content management updates** and lightweight interactive features aligned with organizational branding requirements.
- Maintained **front-end components** and resolved UI defects through browser debugging tools and iterative design feedback cycles.
- Used **Git version control** for feature branches and pull requests, following team code review and deployment workflows.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Angular, JavaScript, TypeScript, HTML5, CSS3, Responsive UI Design

Backend: Java, Spring Boot, Spring Cloud, RESTful APIs, Microservices, Hibernate/JPA, SOAP

Databases: PostgreSQL, Oracle, SQL Server, Redis

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, Jenkins, Git

Monitoring & Tools: Grafana, Splunk, JUnit, Mockito, SonarQube, Postman

Workflow & PM: Agile/Scrum, Jira, Confluence, SDLC, Technical Design Reviews, Code Reviews
