PROFESSIONAL SUMMARY

Full stack software engineer with 8+ years delivering web applications, API services, and quality assurance across financial and enterprise platforms. Experienced in TypeScript and Angular frontends, C# ASP.NET Web API backends, and SQL Server data layers with regression testing and defect triage. Communicates clearly with stakeholders through requirements facilitation, technical demos, and Agile delivery of secure, user-centered releases.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Owned **full-stack** delivery for portfolio and operations web applications using **TypeScript**, **Angular**, and **ASP.NET Web API** services that support daily trade reporting and analyst workflows.
- Built and maintained **REST APIs** in **C#**, validating contracts through **Postman** collections, integration checks, and sprint-level **regression testing** prior to each production release.
- Developed **T-SQL** queries, views, and **stored procedures** in **Microsoft SQL Server** for reconciliation reporting with strict **data validation** across high-volume position and trade datasets.
- Collaborated with portfolio managers and compliance partners to **gather requirements**, facilitate **acceptance testing**, and present **feature walkthroughs** that aligned delivery with audit and usability expectations.
- Authored **user guides**, **release notes**, and internal runbooks that improved **knowledge sharing** and reduced recurring support questions from operations teams.
- Supported **Azure**-hosted releases through **CI/CD** pipeline maintenance, **OAuth** and **SAML** authentication updates, and secure coding practices grounded in **OWASP** principles.
- Drove **root cause analysis** for production defects, reproduced issues across environments, and guided stakeholders through **manual** and **automated test** validation tracked to closure in **JIRA**.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Enhanced enterprise **web applications** for risk and operations teams using **HTML**, **CSS**, **TypeScript**, and **ASP.NET MVC** components within a regulated banking environment.
- Implemented **Web API** endpoints and backend services in **C#** that exchanged structured data with upstream trading, reference, and middleware platforms under audit controls.
- Wrote and optimized **SQL Server** scripts, **stored procedures**, and transactional queries powering reconciliation dashboards and regulatory reporting extracts.
- Executed **manual**, **regression**, and **API QA** cycles each sprint, maintaining defect logs, test evidence, and **release notes** shared with program stakeholders.
- Worked with **UI/UX** designers and business analysts during **requirements elicitation** to translate workflow needs into development tasks and **user acceptance** criteria.
- Participated in **Agile/Scrum** ceremonies and coordinated parallel workstreams in **JIRA** while balancing incident response with planned feature delivery.
- Contributed to **Angular** and **.NET migration** efforts that modernized legacy modules while preserving **authentication** and **authorization** behavior across integrated systems.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Shipped customer-facing **web application** enhancements using **JavaScript**, **HTML**, and **CSS** under code review in a remote product startup environment.

- Integrated lightweight **REST API** calls and verified payloads with **Postman** against documented service contracts before merge.
- Developed **test scripts** and checklist-driven **regression** passes for checkout flows, logging reproducible defects with steps and environment details.
- Updated onboarding **documentation** covering local setup, **Git** branching, and pull request workflows for incoming contributors.
- Assisted **usability testing** by preparing demo builds and synthesizing participant feedback for product and design partners.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built nonprofit **website** pages and responsive layouts with **HTML**, **CSS**, and CMS templates supporting program outreach campaigns.
- Resolved **cross-browser** rendering defects and improved **page load performance** through asset optimization and semantic markup refinements.
- Coordinated content updates with program stakeholders and verified published changes using structured **manual testing** checklists.
- Maintained **Git**-versioned source and deployment notes for volunteer maintainers handoff.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: TypeScript, Angular, AngularJS, HTML, CSS, JavaScript, Responsive UI

Backend: C#, ASP.NET MVC, ASP.NET Web API, .NET, REST APIs

Databases: Microsoft SQL Server, T-SQL, Stored Procedures, SSMS, RDBMS

Cloud & DevOps: Microsoft Azure, App Service, CI/CD Pipelines, Git, Azure DevOps

Monitoring & Tools: Postman, Application Insights, JIRA, Automated Testing, Manual Testing, Regression Testing

Workflow & PM: Agile, Scrum, SAFe, Requirements Elicitation, Stakeholder Engagement, Documentation, User Guides
