PROFESSIONAL SUMMARY

Full stack engineer with 7+ years building intuitive React and TypeScript interfaces and scalable APIs for finance and SaaS platforms. Partners with product and design to ship end-to-end features from concept to production. Experienced architecting component systems, data-driven dashboards, and CRUD workflows that simplify complex data for non-technical users. Brings strong API design, cross-functional collaboration, and ownership of frontend architecture across remote, distributed teams.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led end-to-end development of **React and TypeScript** dashboard modules enabling portfolio managers to configure investment workflows through **intuitive CRUD interfaces**, reducing manual reconciliation steps across **12 analyst teams**.
- Architected a **reusable component library** with shared state patterns and design tokens, cutting feature delivery time for new product surfaces by **35%** while maintaining consistency across **8 application zones**.
- Designed and implemented **RESTful APIs** and data models in TypeScript for client reporting features, partnering with backend engineers to establish contracts that supported **sub-200ms p95 response times** at peak load.
- Collaborated with **product managers and designers** in weekly design reviews to translate wireframes into production-ready flows, shipping **15+ major features** with zero critical accessibility regressions.
- Built **data visualization layers** surfacing portfolio performance metrics and alerts, helping non-technical stakeholders interpret complex datasets without SQL or backend tooling.
- Mentored **3 junior engineers** on frontend architecture, testing practices, and code review standards, improving team PR throughput and reducing rework on UI-heavy tickets.
- Introduced **automated integration tests** and Storybook documentation for shared components, decreasing regression bugs in release cycles by **40%** across the investor portal.
- Optimized **client-side rendering** and bundle splitting strategies that reduced initial page load by **28%** on analytics-heavy views used daily by fund operations staff.
- Partnered with security and compliance teams to implement **role-based access controls** and audit-friendly UI patterns aligned with financial services requirements.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **internal React applications** supporting trading desk operations, delivering CRUD workflows that streamlined reference data updates across **4 business units**.
- Integrated **REST APIs** with front-office platforms, implementing error handling and loading states that improved operator confidence during high-volume market sessions.
- Contributed to **TypeScript** service layers and shared utilities adopted by **6 engineering squads**, standardizing pagination and filtering patterns across internal tools.
- Supported **technology summer analyst** initiatives by prototyping UI concepts for risk dashboards, receiving mentorship from senior engineers on production-grade component design.
- Built **automated data validation interfaces** that surfaced discrepancies to operations teams, reducing manual exception handling time during month-end close cycles.
- Participated in **cross-functional requirements sessions** with business analysts and product owners, translating regulatory reporting needs into actionable frontend specifications.

- Maintained and enhanced legacy web modules while incrementally migrating screens to modern **component-based architecture**, preserving uptime during phased rollouts.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Implemented **React** UI components for restaurant inventory management, enabling staff to complete stock updates through guided forms without backend exposure.
- Extended **Node.js APIs** with validation middleware and structured JSON responses, supporting new mobile client integrations during the internship program.
- Wrote unit tests for **critical checkout flows**, catching edge cases before production releases and establishing testing conventions for subsequent intern cohorts.
- Refactored styling into **modular CSS patterns**, improving maintainability across **5 customer-facing screens** deployed to production environments.
- Documented API contracts and component usage in team wikis, accelerating onboarding for engineers joining the **remote-first** engineering team.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built **responsive web pages** for nonprofit program outreach using HTML, CSS, and JavaScript, ensuring accessibility across desktop and mobile donors.
- Integrated **third-party donation APIs** with client-side form validation, improving submission success rates during fundraising campaign launches.
- Collaborated with stakeholders to iterate on **landing page layouts** based on analytics feedback, increasing visitor engagement on key program pages.
- Deployed site updates through **Git-based workflows** with peer review, maintaining content accuracy during a rapid three-month development cycle.
- Established baseline **SEO and performance optimizations** that improved load times and search visibility for foundation initiative pages.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React.js, TypeScript, JavaScript, HTML5, CSS3, Redux, Storybook, Responsive Design, Component Architecture, Accessibility (WCAG)

Backend: Node.js, TypeScript, Go, REST APIs, GraphQL, Express, API Design, Microservices

Databases: PostgreSQL, MongoDB, Redis, SQL, Data Modeling

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, GitHub Actions, Terraform

Monitoring & Tools: Datadog, Sentry, Jest, Cypress, Webpack, Vite, ESLint

Workflow & PM: Agile/Scrum, Jira, Cross-functional Collaboration, Technical Documentation, Code Review
