PROFESSIONAL SUMMARY

Full stack engineer with 7+ years building scalable web and mobile applications using React, Node.js, Java, and TypeScript. Led end-to-end delivery of enterprise platforms with reusable content models, CI/CD automation, and React Native apps across iOS and Android. Mentored engineers, drove architecture reviews, and applied AI-assisted workflows to improve code quality, testing, and operational reliability in regulated financial environments.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and delivered **full-stack services** using **React**, **Node.js**, and **Java**, supporting portfolio analytics and reporting workflows used by **150+ internal stakeholders** across trading and operations teams.
- Built and maintained **React Native** mobile applications for iOS and Android, delivering **sub-200ms screen transitions** and consistent UX through a **shared content model** across web and mobile surfaces.
- Owned **CI/CD pipelines** with **Docker** and **Kubernetes**, integrating **automated testing** across unit, integration, and E2E suites to enable **weekly production releases** with zero rollback incidents over 18 months.
- Drove **API design** and **data flow** architecture for microservices integrating market data, enabling a **40% reduction** in duplicate backend logic through a reusable service layer aligned with **enterprise architecture** standards.
- Led **design reviews** and **code reviews**, mentoring **4 junior engineers** on **TypeScript** patterns, testing strategy, and secure coding practices while raising team **delivery velocity by 25%**.
- Implemented **observability** with structured logging, metrics, and tracing, shortening **mean time to resolution** for production incidents by **35%** through improved **root cause analysis** workflows.
- Applied **AI-assisted development** tools for test generation, refactoring, and documentation, reducing feature delivery cycle time by **20%** while maintaining strict **compliance** and **privacy** controls.
- Partnered with product and UX teams to translate requirements into **well-architected technical solutions**, balancing immediate delivery with long-term **platform scalability** and maintainability.
- Refactored legacy monolith components into **containerized microservices**, improving deployment reliability and enabling independent team ownership of **8 core service domains**.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **full-stack trading support applications** with **React** front ends and **Node.js/Java** backends, processing **10K+ daily transactions** for fixed-income and equity trading desks.
- Designed **RESTful APIs** and integration patterns connecting front-office systems with risk and compliance platforms, ensuring **regulatory compliance** with audit-ready **documentation**.
- Built **automated testing** frameworks and **CI/CD** workflows using Jenkins and GitLab, increasing test coverage from **45% to 82%** across critical payment and settlement modules.
- Mentored **3 analyst hires** through structured **knowledge sharing** sessions on enterprise Java patterns, **HTML/CSS/TypeScript** standards, and incident response procedures.
- Led **technical design discussions** for a unified client dashboard, consolidating **5 legacy portals** into a single **React** application with improved **user experience** and reduced maintenance overhead.
- Supported **incident management** and **operational excellence** for production systems, performing **root cause analysis** on **P1/P2 outages** and implementing preventive fixes within SLA targets.
- Implemented **feature flag** infrastructure for progressive delivery of trading workflow enhancements, enabling safe rollouts to **2,000+ users** without downtime.

- Collaborated with cross-functional stakeholders including operations, legal, and IT management to deliver secure, **scalable software solutions** meeting SOX and internal audit requirements.
- Evolved service-layer architecture through **code refactoring** and **software design** improvements, reducing cross-team integration defects by **30%** across quarterly release cycles.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React** and **Node.js** features for a restaurant technology platform, delivering **mobile-responsive** interfaces used by **500+ venue staff** for order and inventory management.
- Wrote **automated unit and integration tests** with Jest and Mocha, contributing to a **30% increase** in code coverage during the internship tenure.
- Participated in **code reviews** and **design reviews**, applying **HTML**, **CSS**, and **TypeScript** best practices under senior engineer guidance.
- Assisted in **CI/CD pipeline** improvements, automating build and deployment steps that reduced manual release preparation from **4 hours to 45 minutes**.
- Documented **API endpoints** and **data flow** diagrams for internal services, improving onboarding time for new team members by an estimated **2 days**.
- Refactored legacy jQuery components to **React**, improving page load performance by **25%** on high-traffic admin screens.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **HTML**, **CSS**, and **JavaScript** web pages for a nonprofit foundation site, improving accessibility compliance and **mobile responsiveness** across all public-facing content.
- Collaborated with stakeholders to implement content updates and **user experience** improvements, reducing page bounce rates by **15%** through layout and navigation refinements.
- Integrated third-party donation and newsletter **APIs**, enabling secure data collection with validation and error handling aligned to **privacy** best practices.
- Maintained a version-controlled codebase with Git, following **software design** conventions and peer **code review** feedback during a **3-month** engagement.
- Optimized asset delivery and caching strategies, cutting average page load time by **20%** on content-heavy landing pages.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, React Native, TypeScript, JavaScript, HTML, CSS, Redux, Responsive Design, Mobile UX

Backend: Node.js, Java, Spring Boot, RESTful APIs, Microservices, GraphQL, API Design

Databases: PostgreSQL, MongoDB, Redis, SQL Server, Data Modeling

Cloud & DevOps: Docker, Kubernetes, AWS, CI/CD, GitLab CI, Jenkins, Containerized Deployments

Monitoring & Tools: Prometheus, Grafana, ELK Stack, Datadog, Logging & Tracing, Feature Flags

Workflow & PM: Agile/Scrum, Jira, Confluence, Design Reviews, Mentorship, Incident Management, Technical Documentation
