

Ryan Cho

Full Stack Software Engineer | TypeScript, React & Node.js

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full-stack software engineer with professional experience building TypeScript web applications, REST APIs, and AWS-backed services in fintech and capital markets. Delivers secure, testable features across React frontends and Node.js backends with strong cross-stack debugging and B2B integration support. Improves internal tooling, observability, and partner-facing documentation. Active practitioner of AI-assisted development in remote, high-ownership teams shipping reliable production systems.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and delivered **full-stack TypeScript features** across React dashboards and Node.js REST APIs supporting capital allocation workflows used by portfolio operations teams daily
- Built **secure B2B integration endpoints** and webhook handlers enabling external partners to sync transaction data, reducing manual reconciliation effort by **35%** across onboarding cohorts
- Deployed and maintained **AWS-hosted services** (Lambda, ECS, S3) with CI/CD pipelines, improving release cadence while sustaining **99.9% uptime** for production APIs
- Led **cross-stack debugging** for production incidents spanning frontend state, API contracts, and database queries, cutting mean time to resolution by **40%** through structured runbooks
- Developed **internal admin tools** and event history dashboards giving operations teams real-time visibility into payment-adjacent workflows and audit trails
- Partnered with product and QA to ship **testable, compliance-aligned modules** with unit and integration coverage exceeding **80%** on critical financial paths
- Embedded **AI-assisted development workflows** into team practices for code review, test generation, and documentation, accelerating feature delivery across the engineering org
- Mentored **two junior engineers** on TypeScript patterns, REST API design, and production troubleshooting during platform modernization initiatives

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Implemented **REST API services** in Node.js and Java supporting trade settlement and cash management interfaces consumed by internal banking applications
- Contributed to **regulatory-compliant financial systems** with encryption, role-based access controls, and audit logging aligned to enterprise security standards
- Debugged **cross-tier production issues** across web clients, middleware, and SQL databases during market-hours incidents with strict SLA requirements
- Built **internal tooling dashboards** for operations teams to monitor batch job status and exception queues across payment processing pipelines
- Collaborated with **partner technology teams** during vendor integration rollouts, documenting API contracts and resolving deployment blockers before launch
- Automated **integration test suites** for API endpoints, increasing regression coverage and reducing pre-release defects by **25%**
- Supported **international wire and ACH workflow** enhancements, aligning backend validation rules with treasury and compliance requirements

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Developed **React and TypeScript components** for a SaaS checklist platform, improving page load performance by **30%** through code splitting and memoization
- Built **Node.js REST endpoints** for user authentication and document metadata, integrating with PostgreSQL persistence layers
- Wrote **integration tests** and participated in peer code reviews to maintain code quality across a small remote engineering team
- Resolved **frontend-backend contract mismatches** during API versioning, preventing data display errors in production releases
- Contributed to **CI pipeline configuration** enabling automated builds and deployments for staging environments

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built **responsive web pages** using HTML, CSS, and JavaScript for a nonprofit foundation site serving donors and program stakeholders
- Integrated **third-party form and analytics APIs** to capture engagement metrics and streamline volunteer sign-up flows
- Optimized **page rendering and asset delivery**, improving mobile load times across key landing pages
- Collaborated with stakeholders remotely to iterate on **content layouts and accessibility** improvements

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: TypeScript, JavaScript, React, Next.js, HTML5, CSS3, Responsive UI, Component Architecture, State Management

Backend: Node.js, NestJS, Express, REST APIs, Webhooks, Microservices, API Design, Authentication & Authorization

Databases: PostgreSQL, MySQL, SQL, Redis, Query Optimization, Schema Design

Cloud & DevOps: AWS (Lambda, ECS, S3, CloudWatch), CI/CD, Docker, GitHub Actions, Infrastructure as Code

Monitoring & Tools: CloudWatch, Structured Logging, Dashboards, Jest, Cypress, Postman, Event History Tooling

Workflow & PM: Agile/Scrum, Jira, Technical Documentation, Runbooks, Partner Integration Support, AI-Assisted Development (Cursor, Copilot)
