PROFESSIONAL SUMMARY

Full stack software engineer with 4+ years building production distributed systems across finance and investment platforms. Skilled in Java, TypeScript, React, and Spring Boot with disciplined unit and integration testing. Delivers APIs, observability with Grafana and Prometheus, and cloud deployments on AWS and Azure. Thrives in agile teams through design reviews, RFCs, and incident retrospectives while shipping reliable microservices and internal tooling.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected **Java and Spring Boot microservices** for portfolio analytics workflows, enabling cross-team reuse of shared calculation and reporting APIs across the investment platform.
- Built **React and TypeScript dashboards** that surfaced near real-time holdings and performance data, improving analyst visibility into daily portfolio decisions.
- Established **Grafana and Prometheus observability** with actionable alerting across 15+ production services, shortening incident triage during on-call rotations.
- Led **design reviews and RFCs** for a message-driven reconciliation pipeline, aligning engineering, operations, and finance stakeholders on reliability requirements.
- Expanded **unit and integration test coverage** on payment and settlement services, reducing regressions in high-risk release paths.
- Deployed **AWS Lambda automation** and CI/CD pipelines that replaced manual reporting tasks and standardized secure deployment practices.
- Partnered with product and finance teams to deliver **REST API integrations** supporting month-end close and regulatory reporting workflows.
- Resolved production defects through **structured incident retrospectives**, documenting root causes and preventive monitoring improvements.
- Mentored junior engineers on **secure coding, debugging, and code review** practices while raising team delivery standards in agile sprints.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Delivered **Java services and internal tools** supporting trading and operations teams, improving turnaround on daily market support requests.
- Built **Node.js microservices** that connected legacy banking systems to modern REST APIs for downstream reporting applications.
- Contributed **Angular modules** for risk and compliance dashboards used in recurring operational review meetings.
- Participated in **design reviews and RFC processes** for a distributed batch platform handling large-scale end-of-day processing workloads.
- Instrumented services with **OpenTelemetry and Grafana dashboards**, giving teams clearer visibility into latency and failure patterns.
- Deployed applications to **Microsoft Azure** through CI/CD pipelines with peer review gates and secure coding checks.
- Authored **integration and regression tests** that stabilized release cycles for business-critical banking workflows.
- Collaborated with cross-functional partners in **Agile delivery** to ship regulatory and reporting features on predictable sprint cadences.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Developed **React components** for a customer ordering experience used by restaurant partners across web and tablet clients.
- Implemented **Node.js REST APIs** supporting menu, inventory, and order synchronization between mobile and backend services.
- Wrote **Jest unit tests** for checkout and payment validation logic, catching edge cases before production releases.
- Refactored shared modules to **TypeScript**, improving type safety and maintainability across the frontend codebase.
- Participated in **code reviews and Agile ceremonies** while resolving straightforward production issues with senior engineer guidance.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built **responsive web pages** with JavaScript, HTML, and CSS for nonprofit fundraising and community outreach campaigns.
- Integrated **third-party donation APIs** with client-side validation to support secure contribution flows.
- Partnered with designers to ship **accessible UI updates** consistent across desktop and mobile viewports.
- Diagnosed and fixed **cross-browser rendering issues** while maintaining lightweight content updates for site stakeholders.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Angular, TypeScript, JavaScript, HTML5, CSS3, Responsive UI

Backend: Java, Spring Boot, Node.js, REST APIs, Microservices, Serverless

Databases: PostgreSQL, MySQL, MongoDB, Redis, SQL

Cloud & DevOps: AWS, Microsoft Azure, Google Cloud Platform, Docker, Kubernetes, CI/CD

Monitoring & Tools: Grafana, Prometheus, OpenTelemetry, JUnit, Jest, Git, Linux

Workflow & PM: Agile, Scrum, Design Reviews, RFC, Incident Retrospectives, Jira, Stakeholder Collaboration
