

Ryan Cho

Senior Software Engineer | Analytics & Data Platform

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Analytics-focused software engineer with 7+ years delivering production data models, ELT pipelines, and full-stack dashboards across finance and investment operations. Deep expertise in SQL, Python, and cloud warehouses, with proven ability to translate complex datasets into actionable insights. Implements privacy-aware RBAC, automated testing, and data contracts. Uses generative AI tools to accelerate modeling, UI development, and cross-team delivery.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Owned the end-to-end **analytics data platform** supporting portfolio management and operational reporting for **investment teams** across 12+ business units
- Designed and maintained **ELT pipelines** ingesting data from CRM, accounting, and HR systems into a **cloud data warehouse** with automated freshness monitoring and alerting
- Built a governed transformation layer with **dbt-style models**, unit tests, lineage documentation, and **data contracts** ensuring reliable metrics for executive dashboards
- Developed **full-stack analytics applications** with React and Python APIs surfacing KPI trends, cohort analysis, and **root cause drill-downs** for non-technical stakeholders
- Implemented **RBAC and PII minimization** controls across semantic layers, reducing sensitive field exposure while preserving analytical utility for compliance reviews
- Led **cross-functional workshops** with finance and operations leaders to define canonical metrics and iterate **KPI definitions** during quarterly business reviews
- Accelerated delivery cycles using **generative AI tools** for SQL generation, schema documentation, and rapid UI prototyping of dashboard components across release trains
- Established **CI/CD pipelines** for data and application deployments with automated SQL linting, integration tests, and staged production rollouts

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Delivered **production-grade SQL data models** and reporting solutions supporting treasury, risk, and capital markets operations on a **global banking platform**
- Built **dimensional and event-temporal models** consolidating trade, position, and reference data from heterogeneous source systems into governed analytical schemas
- Automated **ETL ingestion workflows** processing millions of daily records with reconciliation checks, alerting, and **downstream lineage tracking**
- Created **interactive dashboards** and ad-hoc analysis tools enabling portfolio managers to monitor exposures, **P&L drivers**, and regulatory reporting metrics
- Partnered with **Data Platform and IT teams** to harden ingestion from identity, HR, and payroll-adjacent systems while enforcing **role-based access controls**
- Performed **root cause analysis** on data quality anomalies affecting executive reporting, reducing recurring discrepancies through targeted validation rules
- Developed **Python automation scripts** for statistical analysis, batch transformations, and scheduled report generation replacing manual spreadsheet workflows
- Contributed to **CI/CD pipeline** improvements for database migrations and analytics deployments with peer review standards and automated regression testing

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **full-stack web features** for a mobile-first SaaS platform using JavaScript, Node.js, and MongoDB supporting real-time operational workflows
- Implemented **RESTful APIs** and optimized database queries improving response times for high-traffic customer-facing modules
- Collaborated with product and design teams to deliver **polished UI components** and responsive layouts that improved user engagement across key flows
- Wrote **unit and integration tests** integrated into CI workflows ensuring stable releases across two-week sprint cycles
- Participated in code reviews and maintained **technical documentation** to onboard new engineers to shared application codebases

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web applications** using HTML, CSS, and JavaScript for nonprofit foundation digital initiatives
- Integrated third-party APIs and **CMS content workflows** supporting editorial and community outreach programs
- Optimized page load performance and **accessibility standards** across foundation web properties serving diverse audiences
- Collaborated remotely with stakeholders to translate requirements into deployable **frontend deliverables** delivered on schedule

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, TypeScript, JavaScript, HTML/CSS, D3.js, Chart.js, Responsive UI Design, Data Visualization

Backend: Python, Node.js, REST APIs, FastAPI, Flask, ETL/ELT Pipeline Design, Statistical Analysis

Databases: SQL, PostgreSQL, Snowflake, MongoDB, Dimensional Modeling, dbt, Data Contracts, Semantic Layers

Cloud & DevOps: AWS, Docker, CI/CD, GitHub Actions, Airflow, Terraform, Staged Deployments

Monitoring & Tools: Grafana, Datadog, dbt Tests, SQL Linting, Generative AI (Claude, GitHub Copilot), Git

Workflow & PM: Agile/Scrum, Cross-functional Collaboration, Technical Documentation, Stakeholder Communication, KPI Definition
