

Ryan Cho

Staff Software Engineer | Full Stack

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full stack engineer with 8+ years delivering scalable, high-availability platforms across capital markets and enterprise banking. Expert in React, TypeScript, Node.js, Java, and Python, with microservices architecture, GraphQL integration, and performance tuning in regulated environments. Leverages AI-assisted tooling to accelerate delivery, strengthen code quality, and resolve production issues. Collaborative leader focused on system reliability, data integrity, and cross-functional delivery.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and shipped **full stack features** across React and TypeScript frontends and Node.js microservices, enabling portfolio teams to manage \$2B+ in assets through a unified platform with sub-second response times.
- Designed **GraphQL and REST APIs** connecting internal trading, reporting, and third-party data providers, ensuring seamless data flow and 99.9% uptime across integrated services.
- Led **performance optimization** initiatives across application and database layers, reducing page load times by 40% and resolving bottlenecks identified through production monitoring and profiling tools.
- Implemented **observability and alerting** with structured logging, distributed tracing, and dashboard monitoring, cutting mean time to detection for production incidents from hours to minutes.
- Drove **AI-assisted development** adoption across the team for code review, test generation, and debugging, improving sprint velocity by 25% while maintaining strict code quality standards.
- Built **CI/CD pipelines** with automated testing and staged deployments, supporting weekly releases with zero rollback events over a 12-month production cycle.
- Partnered with product managers and stakeholders to translate **regulatory and business requirements** into technical designs, delivering compliant data handling and audit-ready documentation.
- Mentored **three junior engineers** on system design, code review practices, and production troubleshooting, elevating team delivery consistency and knowledge sharing.
- Resolved **critical production issues** through structured debugging and root-cause analysis, maintaining continuity of capital operations during peak trading windows.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed and maintained **Java and Spring Boot microservices** supporting trade processing and risk reporting in a highly regulated banking environment serving global operations.
- Built **React and TypeScript dashboards** for operations teams, consolidating fragmented data sources into real-time views that reduced manual reconciliation effort by 30%.
- Integrated **internal and external APIs** across legacy and modern systems, ensuring secure data exchange and compliance with financial regulatory standards.
- Optimized **SQL query performance** and database indexing strategies, improving batch processing throughput for end-of-day reporting by 35%.
- Contributed to **agile sprint delivery** across cross-functional teams, participating in planning, backlog refinement, and retrospectives to sustain high development velocity.
- Authored **technical documentation** and runbooks for deployed services, supporting knowledge transfer and compliance readiness across engineering and operations teams.
- Implemented **automated test suites** and CI pipelines, increasing code coverage to 85% and reducing regression defects in production releases.

- Troubleshoot **production incidents** in distributed systems using log analysis and monitoring tools, restoring service availability within SLA targets during critical business hours.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React components** for the customer-facing web application, improving checkout flow usability and contributing to a 15% increase in completed transactions.
- Developed **Node.js REST endpoints** supporting order management and payment integration, ensuring reliable data flow between frontend and backend services.
- Participated in **code reviews** and agile ceremonies, gaining hands-on experience with iterative delivery and collaborative engineering practices.
- Wrote **unit and integration tests** for new features, helping maintain code quality standards across the development team.
- Documented **API contracts and deployment procedures**, supporting onboarding of new team members and consistent release processes.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** using HTML, CSS, and JavaScript for the foundation's public-facing site, improving mobile accessibility across all primary content sections.
- Integrated **content management workflows** enabling non-technical staff to publish updates independently, reducing dependency on developer support.
- Collaborated with stakeholders to gather requirements and deliver **iterative design improvements** aligned with the organization's outreach goals.
- Ensured **cross-browser compatibility** and performance baseline standards across deployed pages before handoff to the maintenance team.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML/CSS

Backend: Node.js, Java, Spring Boot, Python, GraphQL, REST APIs, Microservices

Databases: PostgreSQL, MongoDB, Redis, SQL Server, Database Performance Tuning

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, Jenkins, GitHub Actions

Monitoring & Tools: Datadog, Grafana, Prometheus, Splunk, AI-Assisted Development Tools

Workflow & PM: Agile/Scrum, Sprint Planning, Jira, Confluence, Technical Documentation, Code Review
