PROFESSIONAL SUMMARY

Full-stack software engineer with seven years of experience delivering customer-facing web applications across finance and capital markets. Ships production features across React frontends, Ruby on Rails services, and PostgreSQL on AWS, with hands-on work embedding LLM-assisted workflows into reliable product experiences. Partners with product and design to translate ambiguous requirements into scalable SaaS capabilities, emphasizing UX quality, observability, and iterative delivery.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led end-to-end delivery of **customer-facing portfolio dashboards** in React and Rails, serving 200+ active users across distributed investment teams with consistently fast page loads.
- Designed and shipped an **LLM-powered document summarization pipeline** using embeddings and retrieval, pairing model outputs with observability, evaluation checks, and human-in-the-loop review before production release.
- Owned **PostgreSQL schema evolution and API contracts** for multi-tenant investment workflows, coordinating zero-downtime migrations and backward-compatible service releases.
- Built **real-time notification and messaging capabilities** with WebSockets and event-driven background jobs, improving cross-team visibility on deal pipeline and allocation updates.
- Partnered with product and design to **scope roadmap priorities** for internal SaaS tooling, breaking ambiguous initiatives into shippable increments tracked through adoption and usage metrics.
- Strengthened **AWS deployment reliability** by introducing CI/CD quality gates, automated integration tests, and CloudWatch dashboards that accelerated incident detection and rollback decisions.
- Mentored two engineers through **structured code review and pairing**, improving pull request turnaround while reducing regression defects across quarterly release trains.
- Integrated external **CRM and marketing data sources** into unified client profiles for go-to-market reporting, applying privacy controls and auditable access patterns for sensitive financial data.
- Refactored legacy monolith endpoints into **modular service boundaries**, enabling parallel feature development and clearer ownership across frontend, backend, and data layers.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **full-stack internal banking applications** on React and service-oriented backends, supporting compliance and operations teams processing high daily transaction volumes.
- Implemented **workflow automation modules** that standardized approval routing across regional teams, reducing manual handoffs in credit review and exception handling processes.
- Built **RESTful APIs and PostgreSQL-backed data models** for client onboarding, preserving audit trails and role-based access aligned with enterprise security requirements.
- Collaborated with business analysts and stakeholders to **define product requirements** for regulatory reporting tools, delivering scoped releases aligned to quarterly roadmaps.
- Optimized **SQL performance and indexing strategies** on ledger tables, improving end-of-day report generation for time-sensitive operational batches.
- Contributed to **code review and engineering standards** across a 12-person technology pod, documenting reusable patterns for error handling, testing, and release readiness.
- Deployed services to **AWS environments** with infrastructure-as-code practices, partnering with platform teams on environment parity, release checklists, and rollback procedures.

- Delivered **customer-facing portal enhancements** for institutional clients, improving self-service access to statements and transaction history through responsive UI patterns.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React components** for restaurant check-management workflows, improving tablet UI responsiveness for front-of-house staff during peak service periods.
- Implemented **Ruby on Rails API endpoints** for order sync and receipt metadata, supporting reliable data capture across mobile clients in production.
- Expanded **automated test coverage** for checkout and payment flows, catching edge cases before releases and stabilizing weekly deployment cadence.
- Participated in **agile sprint ceremonies** with product and design, translating user feedback into iterative UI improvements shipped on short iteration cycles.
- Assisted with **PostgreSQL query tuning** for operations reporting views, reducing load times on historical transaction lists used by internal teams.
- Documented **API contracts and deployment runbooks** for engineering handoff, enabling smoother onboarding for full-time developers joining the codebase.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive public web pages** for nonprofit program content using HTML, CSS, and JavaScript, ensuring consistent layout across mobile and desktop browsers.
- Integrated **contact and donation forms** with backend handlers, allowing staff to capture participant inquiries without manual data re-entry.
- Collaborated with stakeholders to **refine site information architecture**, aligning page structure with fundraising campaign priorities and content updates.
- Maintained **cross-browser compatibility and page performance** for launch-critical pages during a compressed delivery timeline.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive UI, Component Architecture, UX Collaboration

Backend: Ruby on Rails, Node.js, REST APIs, GraphQL, Microservices, Event-Driven Architecture, WebSockets

Databases: PostgreSQL, Redis, SQL Optimization, Schema Design, Data Modeling, Migrations

Cloud & DevOps: Amazon Web Services (EC2, S3, Lambda, RDS), CI/CD, Docker, Infrastructure as Code, Zero-Downtime Deployments

Monitoring & Tools: CloudWatch, Datadog, Git, Jest, RSpec, Cypress, Feature Flags, Observability Dashboards

Workflow & PM: Agile/Scrum, Jira, Product Roadmapping, Code Review, Cross-Functional Collaboration, Technical Scoping
