

# Ryan Cho

Senior Software Engineer, Full Stack

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

## PROFESSIONAL SUMMARY

---

Software engineer with experience building full-stack web applications, backend services at scale, and AI-enabled prototypes across fintech and capital markets. Skilled in Python, React, AWS, and Kubernetes with a product-minded approach to rapid experimentation, cross-functional collaboration, and technical leadership. Known for owning ambiguous problems end to end, raising code quality through review standards, and mentoring engineers while shipping reliable systems.

## WORK EXPERIENCE

---

### Software Engineer

May/2022 - May/2026

#### Aspen Capital

Remote | 10th Floor, New York

- Led end-to-end delivery of a **React-based investor portal** for portfolio teams, partnering with product and design to enable self-service reporting and reduce manual data coordination across fund operations.
- Designed and shipped **Python microservices on AWS and Kubernetes** to automate portfolio reconciliation, supporting high-volume transaction processing with observability dashboards for on-call rotation.
- Built **AI-assisted internal tooling** using agentic coding workflows to accelerate prototype development, shortening feature validation cycles for experimental trading analytics initiatives.
- Established **code review and design standards** across the engineering team, mentoring developers through structured feedback and tech talks on safe refactoring within a large legacy codebase.
- Architected a **MySQL-backed data pipeline** with extensible schema design to ingest third-party market feeds, ensuring idempotent processing and clear rollback paths during production incidents.
- Partnered with senior stakeholders during **rapid sprint cycles** to translate ambiguous business hypotheses into functional prototypes, contributing to kill-or-scale decisions on new product initiatives.
- Implemented **Vue.js dashboard components** for real-time risk monitoring, collaborating with analytics partners to surface actionable metrics and escalate operational issues before user impact.
- Drove **technical planning for a loan origination integration**, defining API contracts and deployment strategy that enabled safe incremental rollout across staging and production environments.
- Proactively identified **gaps in CI/CD and release practices**, advocated for automated testing improvements, and led adoption of containerized deployment workflows that improved release reliability.

### Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

#### Summer Analyst,

#### BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Python backend services** supporting trade lifecycle workflows, integrating with internal systems to automate settlement reporting for global equity operations.
- Built **React web applications** for operations teams to monitor loan and securities data, refining UI workflows through iterative feedback from business analysts and stakeholders.
- Deployed services on **AWS infrastructure** with containerized workloads, contributing to migration efforts that improved deployment consistency across development and production environments.
- Participated in **cross-functional ideation sessions** with product owners, articulating technical constraints and trade-offs for features spanning multiple downstream systems.
- Maintained and extended **MySQL databases** backing critical reporting tools, writing optimized queries and supporting schema changes during quarterly release cycles.
- Contributed to **team code review practices** by providing constructive pull request feedback and documenting API patterns to support onboarding and knowledge sharing.

## Software Engineering Intern

Jun/2018 - May/2019

### Chexology

Remote | 17th Floor, New York

- Shipped **React components** for a food-service compliance platform, implementing responsive UI patterns from design mockups under senior engineer mentorship.
- Assisted in building **REST API integrations in Python** to synchronize checklist data between mobile clients and backend services.
- Supported **automated testing efforts** by writing unit tests and participating in sprint retrospectives to improve team delivery practices.
- Prototyped **internal admin dashboards** using modern JavaScript frameworks, enabling faster iteration on feature concepts during product discovery.
- Collaborated with product and engineering peers in **agile sprint cycles**, translating user stories into working increments with clear acceptance criteria.

## Web Developer

Sep/2017 - Nov/2017

### Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** for a nonprofit foundation site, implementing accessible HTML and CSS layouts aligned with brand guidelines.
- Integrated **JavaScript interactions** to improve navigation and content discoverability across informational site sections.
- Collaborated with stakeholders to **gather requirements** and iterate on content structure before production deployment.
- Applied **Git-based version control workflows** for feature branches and peer review of front-end changes.
- Delivered **mobile-friendly layouts** tested across browsers, ensuring consistent rendering for foundation outreach campaigns.

## EDUCATION

---

### New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

## SKILLS

---

**Frontend:** React.js, Vue.js, JavaScript, TypeScript, HTML5, CSS3, Responsive UI, Component Architecture

**Backend:** Python, Kotlin, REST APIs, Microservices, Node.js, System Design, API Integration

**Databases:** MySQL, PostgreSQL, Schema Design, Query Optimization, Data Pipelines

**Cloud & DevOps:** Amazon Web Services, Kubernetes, Docker, CI/CD, Containerized Deployments, Infrastructure as Code

**Monitoring & Tools:** Observability Dashboards, On-Call Support, AI-Assisted Development, Agentic Workflows, Automation, Git

**Workflow & PM:** Agile, Sprint Planning, Product Development, Code Review, Technical Writing, Cross-Functional Collaboration, Mentorship
