PROFESSIONAL SUMMARY

Full-stack engineer with 7+ years building scalable web applications and cloud-native platforms across finance and enterprise SaaS. Led design and delivery of Python microservices, React frontends, and AWS-backed systems supporting portfolio and trading workflows. Mentors engineers, drives architecture reviews, CI/CD pipelines, and engineering standards while partnering with product and stakeholders on reliable, high-performance releases.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led full-stack delivery of a **Python and React investment platform** used by 40+ portfolio professionals, owning API contracts, frontend workflows, and AWS deployment strategy across production environments.
- Architected **containerized microservices on AWS** (ECS, Lambda, RDS, S3) with Docker-based CI/CD pipelines that shortened release cycles from weekly to daily while improving deployment stability.
- Built responsive **React dashboards and shared component libraries** with performance tuning that reduced load times by 35% on data-intensive analytics views.
- Designed **RESTful APIs and event-driven integrations** connecting fund accounting, market data, and third-party vendors, improving data freshness and reducing manual reconciliation across operations teams.
- Mentored **4 engineers** through code reviews, design sessions, and pairing, strengthening test coverage, observability practices, and secure coding standards across the team.
- Partnered with product managers and business stakeholders to translate requirements into **scalable technical roadmaps**, delivering quarterly platform releases on schedule in a fully remote organization.
- Implemented **CloudWatch monitoring, structured logging, and alerting** across core services, reducing mean time to detection for production incidents affecting client reporting workflows.
- Optimized **PostgreSQL queries and Redis caching** for high-volume reporting endpoints, improving response times for institutional users during peak market activity.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Python backend services and REST APIs** supporting trade operations, regulatory reporting, and internal banking workflows used by global desk teams.
- Built internal **React and JavaScript web applications** that streamlined analyst data entry and reporting tasks across multiple business units.
- Contributed to **AWS cloud adoption and Docker-based deployments**, improving environment parity and release consistency between development and production systems.
- Participated in **system design and architecture reviews** for microservice integrations, applying modular design patterns that improved maintainability and automated test coverage.
- Enforced **Git workflows and code review standards** within a distributed engineering team, raising release quality for compliance-sensitive financial applications.
- Integrated **Oracle and PostgreSQL databases** with application layers, tuning SQL for batch processing and interactive workloads with strict latency requirements.
- Collaborated with QA, business analysts, and offshore teams in **Agile sprint cycles**, consistently delivering regulatory and operational enhancements within committed timelines.

Software Engineering Intern Chexology

Jun/2018 - May/2019

Remote | 17th Floor, New York

- Built **React UI components and REST integrations** for a partner-facing web application supporting restaurant order and payment workflows.
- Implemented **Python Flask services** for authentication, order processing, and third-party webhook handling with input validation and error logging.
- Expanded **automated test coverage** for checkout and notification flows, catching regressions before two major product releases.
- Participated in **Agile ceremonies and sprint planning**, delivering full-stack features alongside senior engineers in a remote startup environment.
- Improved **frontend performance** through lazy loading and API response caching, enhancing mobile responsiveness for field users.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** with HTML, CSS, and JavaScript for a nonprofit foundation site delivered within an 8-week launch window.
- Integrated **CMS workflows and form handling** to enable content updates and donor engagement features without developer intervention.
- Collaborated with designers to implement **accessible UI patterns** across desktop and mobile breakpoints for public-facing content.
- Deployed static assets and lightweight backend hooks to a **cloud-hosted environment**, maintaining stable uptime during fundraising campaigns.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, JavaScript, TypeScript, HTML5, CSS3, Responsive UI, Component Architecture

Backend: Python, Node.js, Flask, FastAPI, RESTful APIs, Microservices, Event-Driven Architecture

Databases: PostgreSQL, MySQL, Oracle, MongoDB, Redis, SQL Optimization

Cloud & DevOps: AWS (EC2, Lambda, ECS, S3, RDS, CloudWatch), Docker, Kubernetes, Terraform, CI/CD, GitHub Actions

Monitoring & Tools: Git, Datadog, CloudWatch, Postman, Structured Logging, Unit & Integration Testing

Workflow & PM: Agile, Scrum, Jira, Confluence, Code Review, Technical Mentorship, Cross-Functional Collaboration
