PROFESSIONAL SUMMARY

Full stack engineer with 8+ years delivering end-to-end web applications across finance and SaaS environments. Deep expertise in React, Node.js, and RESTful microservices with proven SQL optimization and cloud deployment skills. Led architecture decisions, mentored engineers, and shipped scalable platform capabilities through design, implementation, and CI/CD automation.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and delivered **end-to-end React and Node.js applications** for portfolio analytics teams, owning **API design, database schema, and deployment strategy** across the full stack.
- Built **RESTful microservices** on Node.js and Express for financial data workflows, standardizing **service contracts and OpenAPI documentation** to accelerate cross-team integration.
- Led **system design reviews** for a SaaS-style analytics platform, defining **service boundaries, caching layers, and event-driven patterns** adopted across three engineering squads.
- Implemented **CI/CD pipelines** with GitHub Actions and Docker, enabling **daily deployments** with automated testing, staging validation, and rollback safeguards.
- Optimized **PostgreSQL query performance** and indexing for reporting dashboards, improving **page load times by 40%** on high-traffic portfolio views.
- Mentored **two junior engineers** on React component architecture, Node.js backend patterns, and code review practices, raising team delivery velocity and code quality.
- Integrated **AWS services** including S3, Lambda, and RDS for scalable file processing and background jobs, supporting **10x growth** in daily transaction volume without re-architecture.
- Partnered with product and compliance stakeholders to translate requirements into **technical specifications**, presenting architecture trade-offs to leadership with clear impact analysis.
- Refactored legacy monolith modules into **decoupled microservices**, enabling independent team ownership and **zero-downtime migrations** during peak reporting periods.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Java and Spring Boot REST APIs** for trade reporting and compliance dashboards used by **200+ internal users** across global operations teams.
- Built **React front-end modules** integrated with backend microservices, delivering responsive UI for **real-time risk monitoring** and data visualization.
- Designed **SQL data models** and stored procedures for high-volume transactional databases, supporting **millions of daily records** with optimized join and partition strategies.
- Contributed to **application architecture** decisions for a multi-tier banking platform, documenting service contracts and deployment topologies for cross-regional engineering teams.
- Implemented **automated test suites** and Git-based CI workflows, increasing deployment confidence and reducing production defects across release cycles.
- Collaborated with business analysts and operations leads to clarify **functional requirements**, translating complex regulatory needs into maintainable software solutions.
- Optimized batch processing pipelines for end-of-day reconciliation, cutting runtime by **35%** through parallel execution and database tuning.

- Supported **Azure cloud deployments** for internal tools, configuring environment-specific settings and monitoring alerts for production stability.
- Conducted **code reviews and knowledge-sharing sessions** on data structures, algorithms, and design patterns for incoming analyst cohorts.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React components** for a customer-facing web application, implementing responsive layouts and state management patterns under senior engineer guidance.
- Developed **Node.js API endpoints** connecting front-end features to MongoDB-backed services, enabling **real-time order tracking** for restaurant clients.
- Wrote **unit and integration tests** with Jest and Supertest, improving coverage for critical checkout and payment flows before production releases.
- Participated in **Agile sprint ceremonies** and Git-based code reviews, contributing to feature delivery across a five-person engineering team.
- Researched and prototyped **REST API integrations** with third-party POS systems, documenting authentication flows and error-handling patterns for the team.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **HTML, CSS, and JavaScript** pages for a nonprofit foundation website, improving **mobile responsiveness** and accessibility across primary user flows.
- Implemented **WordPress theme customizations** and plugin configurations, enabling content editors to publish updates without developer intervention.
- Integrated **contact forms and analytics tracking**, supporting marketing campaigns and donor engagement measurement for foundation stakeholders.
- Collaborated with designers to translate **wireframes into production-ready pages**, ensuring cross-browser compatibility and consistent branding.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Redux, Responsive UI Design

Backend: Node.js, Express, Java, Spring Boot, Python, REST APIs, Microservices Architecture

Databases: PostgreSQL, MySQL, MongoDB, SQL, Database Design, Query Optimization

Cloud & DevOps: AWS, Azure, Docker, GitHub Actions, CI/CD, Git, Containerized Deployments

Monitoring & Tools: Jest, Supertest, OpenAPI/Swagger, Postman, Grafana, Datadog

Workflow & PM: Agile/Scrum, Jira, Confluence, Technical Documentation, Code Review, Stakeholder Collaboration
