

Ryan Cho

Senior AI Full Stack Developer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full stack engineer with 8+ years building API-driven platforms, microservices, and AI-enabled automation across finance and enterprise SaaS. Experienced in React, Node.js, Python, and .NET with Azure/AWS deployment, CI/CD ownership, and RESTful integration with SQL Server and PostgreSQL. Led scalable backend systems, real-time processing, and generative AI workflows using LangChain and agentic orchestration.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected a **microservices-based analytics platform** on Azure serving 200+ internal users with sub-second response times across portfolio and risk dashboards.
- Built **generative AI automation pipelines** with LangChain and Python to summarize research documents, reducing manual analyst review effort by 40%.
- Developed **React and Node.js full-stack features** for client reporting portals, integrating RESTful APIs with PostgreSQL and Microsoft SQL Server backends.
- Designed **event-driven ingestion services** processing real-time market feeds via message queues, improving downstream data freshness for pricing models.
- Owned **CI/CD pipelines** with automated testing across Azure and AWS environments, shortening deployment cycles from days to hours.
- Led **RESTful API design and optimization** for internal workflow tools, standardizing authentication, pagination, and error contracts across 15+ endpoints.
- Mentored two engineers on **full-stack architecture patterns**, code review standards, and cloud deployment practices during platform modernization.
- Implemented **agentic workflow orchestration** for document classification, connecting LLM-backed decision steps with existing .NET enterprise services.
- Partnered with product and compliance stakeholders to deliver **secure, multi-tenant SaaS capabilities** with role-based access controls and audit logging.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Engineered **RESTful APIs in .NET and Python** connecting front-office applications to SQL Server databases supporting trade lifecycle and reconciliation workflows.
- Built **React operational dashboards** enabling teams to monitor real-time processing status across batch and streaming pipelines in a regulated banking environment.
- Contributed to **microservices decomposition** of monolithic reporting modules into independently deployable Node.js services with clear domain boundaries.
- Developed **automated testing suites** integrated into Azure DevOps CI/CD, increasing release confidence for weekly production deployments.
- Optimized **SQL query performance** on high-volume transactional tables, reducing batch job runtime and improving overnight reconciliation SLAs.
- Implemented **real-time event notifications** using pub/sub patterns to synchronize data across risk and compliance systems.
- Partnered with cross-functional teams to deliver **API-driven integrations** with third-party market data vendors and internal legacy platforms.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Developed **React and Node.js features** for an inventory tracking web application used by restaurant partners across the New York metro area.
- Built **RESTful service endpoints** for mobile check scanning integrations, enabling real-time validation against backend PostgreSQL records.
- Wrote **unit and integration tests** supporting team CI workflows and reducing regression defects during sprint releases.
- Assisted senior engineers with **database schema updates** and API documentation for onboarding new client integrations.
- Implemented **responsive UI components** improving mobile usability for field staff managing daily supply chain workflows.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Delivered a **WordPress-based web presence** with custom PHP templates and CSS for foundation marketing and program registration pages.
- Configured **hosting and deployment workflows** enabling non-technical staff to publish content updates independently.
- Integrated **contact and donation forms** with email notification services supporting outreach campaign tracking.
- Optimized **page load performance** through asset minification and caching, improving visitor engagement across key landing pages.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Angular, TypeScript, JavaScript, HTML5, CSS3, Responsive UI, Component Architecture

Backend: Node.js, Python, .NET, RESTful APIs, Microservices, Event-Driven Architecture, Real-Time Processing

Databases: Microsoft SQL Server, PostgreSQL, SQL, Database Design, Query Optimization, Schema Modeling

Cloud & DevOps: Microsoft Azure, AWS, CI/CD, Docker, Terraform, Automated Testing, Infrastructure as Code

Monitoring & Tools: LangChain, AutoGen, n8n, Git, Jest, Pytest, Postman, Application Performance Monitoring

Workflow & PM: Agile/Scrum, Jira, Cross-Functional Collaboration, Technical Mentorship, Stakeholder Communication
