PROFESSIONAL SUMMARY

Full stack software engineer with 8+ years building production web applications across finance and SaaS. Proficient in Python and JavaScript, delivering from cloud infrastructure through React and Vue interfaces. Experienced on AWS and GCP with Terraform and containerized deployments. Uses AI-assisted tools while enforcing code review and testing on all contributions. Strong communicator who thrives in fast-paced environments and turns ambiguous business requests into reliable, scalable systems.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Owned end-to-end delivery of **full stack features** spanning **Python APIs**, **React dashboards**, and **PostgreSQL** data models supporting portfolio operations for 40+ internal users.
- Architected and deployed **microservices on AWS** using **ECS**, **Lambda**, and **RDS**, automating reconciliation workflows and shortening monthly reporting cycles.
- Built **Vue.js** administration interfaces with reusable component libraries, consolidating shared UI patterns across three product surfaces.
- Integrated **GCP BigQuery** analytics pipelines after a platform migration, enabling finance teams to query **multi-terabyte datasets** without impacting production workloads.
- Applied **Claude** and **ChatGPT** for prototyping and boilerplate generation while requiring **peer review**, unit tests, and security validation on all AI-assisted code.
- Designed **REST** and **GraphQL APIs** with authentication, rate limiting, and observability hooks consumed by risk and operations teams across the organization.
- Led **infrastructure-as-code** adoption with **Terraform** and **CI/CD pipelines**, standardizing staging and production releases across four application repositories.
- Mentored two junior engineers on **system design**, code quality, and incident response, improving on-call documentation and reducing recurring production defects.
- Partnered with product and business stakeholders in a **fast-paced delivery cadence**, translating loosely defined requests into scoped technical plans and iterative releases.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Delivered **full stack applications** for capital markets tooling using **Python**, **React**, and internal **Java services** supporting trading desk operations.
- Built automated **data ingestion pipelines** processing daily trade and reference feeds, improving data availability for downstream risk and reporting systems.
- Developed **React portfolio monitoring dashboards** adopted by 25+ analysts, surfacing real-time positions and exception alerts during market hours.
- Migrated legacy reporting modules to **AWS-hosted services** with **Docker** containers and **API Gateway**, reducing deployment friction for the technology team.
- Implemented **PostgreSQL** and **Redis** caching layers for high-read workloads, lowering average API latency on market data queries.
- Collaborated with business analysts to clarify requirements under tight deadlines, consistently meeting sprint commitments in a **high-pressure environment**.
- Established **unit and integration testing** standards across the team repository, increasing regression coverage for critical pricing calculations.

- Supported **production incident resolution** and root-cause analysis for tier-1 applications, documenting runbooks used by global operations teams.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Developed **React features** for a document compliance platform, implementing form workflows and client-side validation shipped in production releases.
- Built **Python Flask** endpoints for document metadata storage and retrieval, integrating with **PostgreSQL** backend services.
- Wrote **unit tests** and participated in code reviews, following team conventions for Git branching and pull request quality.
- Assisted with **AWS S3** integration for secure document uploads, configuring bucket policies and lifecycle rules alongside senior engineers.
- Improved **UI responsiveness** across mobile breakpoints, resolving layout issues identified during QA cycles before release.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built the organization website using **HTML**, **CSS**, and **JavaScript**, delivering responsive layouts for fundraising and event pages.
- Integrated **CMS-style content updates** enabling non-technical staff to publish announcements without developer involvement.
- Optimized page load performance through **asset minification** and image compression, improving mobile accessibility scores.
- Collaborated with foundation leadership to iterate on design requirements throughout a **two-month engagement**.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Vue.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive Design

Backend: Python, Flask, FastAPI, Node.js, REST APIs, GraphQL, Java

Databases: PostgreSQL, Redis, BigQuery, MySQL, MongoDB

Cloud & DevOps: AWS (ECS, Lambda, RDS, S3, API Gateway), GCP (BigQuery, Cloud Run), Docker, Terraform, CI/CD, GitHub Actions

Monitoring & Tools: Datadog, CloudWatch, Sentry, Claude, ChatGPT, Git, Jira

Workflow & PM: Agile/Scrum, Cross-functional Collaboration, Technical Documentation, Code Review, Stakeholder Communication
