

Ryan Cho

Senior Full Stack Software Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full stack engineer with 7+ years designing and delivering scalable web applications across finance and enterprise platforms. Deep expertise in Python, React.js, Java/Spring Boot, PostgreSQL, and AWS microservices. Led Agile cross-functional teams, translated stakeholder needs into production-ready solutions, and mentored developers on test-driven development and cloud-native architecture. Proficient in AI-assisted coding workflows and client-facing technical consulting.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led design and delivery of a **cloud-based full stack portfolio analytics platform** used by investment advisors and executive stakeholders across distributed teams
- Architected **Python backend services** and **React.js** front-end modules enabling real-time portfolio risk visualization for high-volume trading workflows
- Built **Java/Spring Boot microservices** for trade reconciliation APIs deployed on **AWS** with CI/CD pipelines supporting continuous production releases
- Designed **PostgreSQL RDS** schemas and **DynamoDB** data models supporting multi-tenant reporting pipelines processing thousands of daily transactions
- Integrated **AI-assisted development workflows** using GitHub Copilot to accelerate feature delivery while maintaining rigorous peer code review standards
- Mentored junior developers on **test-driven development**, object-oriented design patterns, and microservices decomposition across a growing engineering team
- Partnered with non-technical stakeholders to capture **user stories**, **acceptance criteria**, and system design documentation tracked in JIRA for quarterly releases
- Coordinated **Agile Scrum ceremonies** within a cross-functional DevSecOps team, delivering accurate task estimates and technical sizing for client-facing deliverables

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Designed and delivered **Python enterprise services** for trade settlement workflows supporting global banking operations across multiple business units
- Developed **React.js** front-end modules for internal risk dashboards consumed by analysts managing large instrument portfolios
- Implemented **Java/Spring Boot microservices** for instrument pricing APIs deployed across distributed **AWS infrastructure**
- Modeled and optimized **PostgreSQL and Oracle RDBMS** schemas for high-volume transactional reporting and audit-ready data pipelines
- Participated in **code reviews and test-driven development** practices as part of a cross-functional DevSecOps Agile delivery team
- Estimated effort and sized **user stories in JIRA** for quarterly release planning sessions with technology leadership and product owners
- Translated **non-technical stakeholder requirements** into technical designs, data visualizations, and system procedure documentation
- Deployed production services on **AWS (S3, EC2, Lambda, RDS, SQS)** with automated pipelines enabling reliable continuous delivery

- Mentored incoming analysts on **object-oriented design patterns**, database modeling, and microservices architecture conventions

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Developed **React.js dashboard features** for restaurant compliance tracking used by operations teams across NYC locations
- Built **Python REST APIs** supporting meal voucher validation and real-time inventory synchronization for front-of-house workflows
- Participated in **Agile Scrum ceremonies** including sprint planning, daily standups, and retrospectives within a cross-functional product team
- Wrote **unit and integration tests** for critical voucher processing flows, strengthening release confidence for production deployments
- Integrated **PostgreSQL** schemas and queries powering compliance reporting and audit-ready transaction history views
- Collaborated with product owners to refine **user stories and acceptance criteria** for quarterly feature releases

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built responsive **marketing web pages** using HTML, CSS, and JavaScript for nonprofit digital outreach campaigns
- Implemented **CMS-driven content workflows** enabling non-technical staff to publish updates without developer intervention
- Collaborated with stakeholders to translate **business requirements** into accessible, mobile-friendly UI components
- Optimized page load performance through **asset compression and lazy loading**, improving visitor engagement across campaign landing pages
- Delivered iterative enhancements in a **two-week sprint cadence** aligned with foundation launch and fundraising timelines

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React.js, JavaScript, TypeScript, HTML5, CSS3, Redux, Responsive UI Design

Backend: Python, Java, Spring Boot, REST APIs, Microservices, Object-Oriented Design

Databases: PostgreSQL, Oracle, SQL Server, MongoDB, DynamoDB, RDBMS Data Modeling

Cloud & DevOps: AWS (S3, EC2, Lambda, RDS, SQS), CI/CD, Docker, Kubernetes, DevSecOps

Monitoring & Tools: GitHub Copilot, Git, Jenkins, Logging Frameworks, Application Observability

Workflow & PM: Agile, Scrum, Kanban, JIRA, User Story Sizing, Stakeholder Communication
