PROFESSIONAL SUMMARY

Full stack software engineer with 7+ years delivering production web applications in React, TypeScript, and Node.js. Owns features from API design through polished interfaces at financial and SaaS platforms. Applies AI-assisted development workflows to increase velocity while maintaining high standards for reliability, usability, and craft. Strong collaborator with Product and Design; drives ambiguous problems to durable solutions with clear technical judgment.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led **end-to-end delivery** of a React and TypeScript portfolio dashboard used by **120+ investment analysts**, reducing report generation time by **35%** through optimized data pipelines and lazy-loaded views.
- Architected **Node.js REST and GraphQL services** supporting trade reconciliation workflows, processing **15K+ daily transactions** with sub-200ms p95 latency and automated retry handling.
- Partnered with Product and Design to convert ambiguous requirements into **technical specs and phased rollouts**, shipping **8 major releases** across two product lines within 18 months.
- Built a **reusable TypeScript component library** adopted across three internal applications, cutting duplicate UI code by **40%** and standardizing accessibility patterns.
- Integrated **AI-assisted development workflows**—including IDE copilots, agent tools, and automated test generation—to accelerate delivery while preserving code review and verification gates.
- Owned **PostgreSQL schema migrations** and API versioning across **12 microservices**, enabling zero-downtime deployments and backward-compatible service upgrades.
- Mentored **two junior engineers** on React architecture, testing discipline, and incident response, improving team on-call resolution times by **30%**.
- Drove **performance audits** on critical user paths, reducing initial page load from 4.2s to **1.8s** via code splitting, CDN caching, and query optimization.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **React and TypeScript interfaces** for internal risk reporting tools used by **500+ analysts** across global trading desks.
- Built **Node.js middleware services** integrating legacy banking systems with modern REST APIs, processing **millions of records nightly** with validated error handling.
- Collaborated with cross-functional stakeholders to define **API contracts and integration layers** supporting regulatory compliance and internal operations workflows.
- Implemented **automated test suites** covering critical payment processing paths, reducing production defects by **20%** across quarterly releases.
- Participated in **on-call rotation** for distributed trading platforms, diagnosing latency spikes and deploying caching improvements to stabilize peak-hour traffic.
- Contributed to **internal developer tooling** that streamlined local environment setup, cutting new-hire ramp time from two weeks to **four days**.
- Refactored monolithic reporting modules into **modular service boundaries**, improving deployment independence and reducing merge conflicts across a team of **8 engineers**.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Shipped **React features** for a mobile-first SaaS checklist product supporting **2K+ monthly active restaurant users**.
- Built **Node.js API endpoints** for authentication and session management using JWT-based security and input validation middleware.
- Wrote **unit and integration tests** with Jest, achieving **85% coverage** on new modules before production release.
- Refactored legacy jQuery components into **TypeScript React modules**, improving maintainability and enabling shared state patterns across the app.
- Participated in agile ceremonies and code reviews, delivering **12+ merged pull requests** across frontend and backend surfaces during the internship.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built **responsive marketing pages** with HTML, CSS, and JavaScript for nonprofit fundraising campaigns reaching **thousands of monthly visitors**.
- Implemented **contact forms and CRM integrations** that increased volunteer signup conversion by **15%** through streamlined submission flows.
- Optimized **page load performance** via asset compression and lazy loading, improving mobile Lighthouse scores across key landing pages.
- Collaborated with stakeholders to iterate on **UX wireframes** and deploy content updates on a weekly release cadence.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Redux, Next.js, Responsive Design, Web Accessibility (WCAG), Webpack

Backend: Node.js, Express, REST APIs, GraphQL, Microservices, JWT Authentication, API Design, Integration Layers

Databases: PostgreSQL, MongoDB, Redis, SQL, Schema Design, Query Optimization, Data Migrations

Cloud & DevOps: AWS, Docker, CI/CD, GitHub Actions, Kubernetes, Infrastructure as Code, Zero-Downtime Deployments

Monitoring & Tools: Datadog, Sentry, Grafana, Jest, Cypress, ESLint, Prettier, Git, AI-Assisted Development Workflows

Workflow & PM: Agile/Scrum, Jira, Code Review, Technical Documentation, Cross-functional Collaboration, Product Discovery
