

Ryan Cho

Senior Full Stack Software Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full-stack software engineer with 7+ years delivering React and TypeScript applications for finance and SaaS platforms. Built interactive dashboards and reusable component libraries that surface complex pricing, occupancy, and pacing data to non-technical users. Expert in Next.js, responsive CSS, and data visualization; partners closely with design in Figma, owns state management and API performance, and ships production features on weekly release cycles.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led development of **interactive portfolio dashboards** with Recharts and custom D3 visualizations, enabling analysts to monitor pacing, exposure, and benchmark comparisons across 200+ accounts.
- Redesigned **revenue and fee-setting workflows** into guided steppers and plain-language controls, reducing support tickets for configuration errors by 35% among operations users.
- Architected a **shared React component library** in TypeScript and Tailwind used across 6 product surfaces, standardizing loading, empty, and error states with consistent micro-interactions.
- Owned **state management and data-fetching strategy** (React Query, optimistic updates) for high-traffic views, cutting perceived load time by 40% on dashboard first paint.
- Partnered with product and design from **Figma prototypes** through implementation, flagging feasibility tradeoffs early and preserving UX quality without scope creep.
- Built **Next.js server-rendered pages** integrated with Ruby-backed internal APIs and PostgreSQL reporting stores, delivering weekly releases with automated CI/CD pipelines.
- Mentored **backend-leaning engineers** on CSS Grid, responsive layouts, and React hooks, raising front-end review throughput and reducing rework on UI pull requests.
- Collaborated asynchronously with **business stakeholders** to clarify pricing table rules and translate spreadsheet logic into validated, user-testable UI models.
- Drove **performance optimization** via memoization, virtualized tables, and bundle splitting, keeping core dashboard interactions under 100ms on median hardware.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Delivered **full-stack features** for capital markets tooling using React, TypeScript, and Java REST services serving 1,500+ internal banking users.
- Built **interactive reporting dashboards** with Highcharts to visualize trade activity, utilization metrics, and desk-level revenue pacing for management reviews.
- Implemented **PostgreSQL schema and query optimizations** with DBA partners, improving report generation latency by 50% on large historical datasets.
- Designed **responsive admin interfaces** with CSS modules and component patterns aligned to responsive design standards across desktop and tablet workflows.
- Simplified **complex fee and pricing tables** into filterable, sortable views with inline validation, helping non-technical operations staff self-serve routine updates.
- Participated in **cross-functional design critiques** using Figma handoffs, proposing micro-interaction and loading-state improvements adopted team-wide.
- Owned end-to-end delivery on **autonomous workstreams**, communicating progress through async standups, RFCs, and stakeholder demos without daily manager oversight.

- Supported **weekly deployment cadence** to staging and production environments with regression checks, contributing to stable release trains across multiple squads.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Developed **React features** for restaurant inspection workflows, including form validation, responsive layouts, and API-integrated status tracking used by field teams.
- Built **reusable UI components** with JavaScript and CSS Flexbox/Grid, establishing patterns later extended by the full-time engineering team.
- Implemented **client-side data fetching** and error handling for dashboard summaries, improving clarity of empty and loading states for low-connectivity users.
- Collaborated with designers on **Figma mockups**, translating spacing, typography, and interaction specs into pixel-accurate pages across mobile breakpoints.
- Contributed to **PostgreSQL-backed API integrations**, writing integration tests and documentation that accelerated onboarding for subsequent interns.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built **responsive marketing and application pages** with HTML, CSS, and JavaScript for a nonprofit foundation, improving mobile readability and accessibility scores.
- Integrated **third-party form and analytics tools**, enabling the team to track engagement without manual reporting overhead.
- Optimized **page load performance** through asset compression and lazy loading, delivering faster first contentful paint on content-heavy landing pages.
- Maintained **content updates and bug fixes** on a remote schedule, coordinating asynchronously with foundation stakeholders in New York.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, CSS Grid/Flexbox, Responsive Design, Recharts, D3.js, Highcharts, Figma

Backend: Node.js, Ruby on Rails, Java (Spring), REST APIs, GraphQL

Databases: PostgreSQL, Redis, SQL optimization

Cloud & DevOps: AWS, Docker, GitHub Actions, CI/CD

Monitoring & Tools: Datadog, Sentry, Chrome DevTools, Jest, React Testing Library

Workflow & PM: Agile/Scrum, Jira, Async communication, Technical mentorship
