

Ryan Cho

Senior Full Stack Software Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full stack software engineer with production experience building scalable APIs, relational data models, and React interfaces. Owns solutions end-to-end—from design and trade-off evaluation through deployment, testing, and operations. Applies systems thinking across platform decisions while partnering with product and design on business-critical features. Coaches through code review, maintains test coverage, and uses AI-assisted workflows to accelerate delivery without sacrificing quality or documentation.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led **end-to-end delivery** of customer-facing SaaS features spanning **REST APIs**, **PostgreSQL** schemas, and **React** interfaces used across multiple business units.
- Designed and scaled **high-traffic API endpoints** for portfolio and reporting workloads, applying **query optimization** and caching patterns that improved response consistency under peak load.
- Facilitated **solution design sessions** for large initiatives, documenting trade-offs across **performance, maintainability, and testability** for product and engineering stakeholders.
- Established **unit and integration test** standards across the stack, pairing **Jest** and **Cypress** coverage with CI gates that reduced regression risk on frequent releases.
- Conducted **coaching-oriented code reviews** across the team, reinforcing patterns for **service boundaries**, error handling, and accessible **CSS** implementation.
- Partnered with **Product, Design, and Customer Success** to clarify requirements, prototype workflows, and ship iterative improvements aligned with revenue and retention goals.
- Maintained **technical documentation** for services and data models, enabling faster onboarding and safer extension of shared platform components.
- Introduced deliberate **AI-assisted planning and review** practices, helping engineers adopt repeatable habits for spec refinement, test generation, and diff validation.
- Owned **production operations** for assigned services, including incident triage, observability dashboards, and post-release monitoring of critical user journeys.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Built and maintained **internal banking platforms** supporting trade operations, working across **Java** services and relational data layers consumed by analyst-facing tools.
- Developed **data-intensive reporting APIs** that aggregated market and position data, emphasizing **schema design** and indexing strategies for reliable query performance.
- Collaborated with senior engineers on **cross-team architecture** decisions, evaluating how feature changes affected shared middleware and downstream consumers.
- Wrote **automated unit tests** and supported regression suites that guarded core settlement workflows during quarterly release cycles.
- Participated in **structured code reviews**, incorporating feedback on API contracts, validation logic, and error semantics across service boundaries.
- Translated business requirements from operations teams into **technical specifications** and incremental delivery plans for compliance-sensitive features.
- Contributed to **runbook and API documentation** used by support and engineering teams during handoffs and production troubleshooting.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Implemented **full stack features** for a document workflow product using **Node.js** services and a **React** client consumed by enterprise customers.
- Modeled **relational database** entities and migrations supporting check processing pipelines, aligning storage design with reporting needs.
- Added **unit test coverage** for service and UI modules, catching edge cases in validation and state transitions before release.
- Supported **code review** cycles with senior engineers, refactoring components for clearer separation of concerns and reusable UI patterns.
- Partnered with product stakeholders to refine acceptance criteria and deliver **iterative enhancements** within a remote-first Agile cadence.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Delivered **responsive web pages** and content updates for a nonprofit foundation site using **HTML, CSS, and JavaScript**.
- Integrated **third-party form and analytics** tools while preserving accessibility and consistent branding across published pages.
- Resolved **cross-browser layout** issues and performance bottlenecks on media-heavy landing pages used in fundraising campaigns.
- Coordinated with remote stakeholders to translate **content requirements** into lightweight, maintainable front-end implementations.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, JavaScript, TypeScript, HTML5, CSS3, Node.js, Responsive Design

Backend: Ruby on Rails, Node.js, REST APIs, Service-Oriented Architecture, API Design

Databases: PostgreSQL, Relational Schema Design, Query Optimization, Redis

Cloud & DevOps: AWS, Docker, GitHub Actions, CI/CD Pipelines, Infrastructure as Code

Monitoring & Tools: Jest, Cypress, Datadog, Git, AI-Assisted Development Tools

Workflow & PM: Agile/Scrum, Jira, Technical Documentation, Code Review, Stakeholder Collaboration
