PROFESSIONAL SUMMARY

Full stack software engineer with eight years building production web platforms across finance and enterprise SaaS. Designs scalable REST APIs, relational data models, and React interfaces with end-to-end ownership from architecture through operation. Leads technical trade-off discussions, coaching code reviews, and disciplined test coverage for high-traffic services. Partners with product and design while applying AI-assisted workflows to ship maintainable, documented systems.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led **full-stack feature delivery** across React dashboards, Node.js services, and PostgreSQL schemas for portfolio analytics used by 120+ internal users daily
- Owned **API design and versioning** for data-intensive reporting endpoints, reducing p95 latency by 35% through query optimization and selective caching
- Established **unit and integration test standards** across the team, increasing coverage on critical payment flows from 62% to 91%
- Conducted **coaching-oriented code reviews** for a team of six engineers, surfacing architectural trade-offs before they reached production
- Partnered with Product and Customer Success to translate **business requirements** into technical specs for three major platform releases
- Integrated **AI-assisted development workflows** into team practices, including structured prompts for test generation and review checklists
- Maintained **technical documentation** for service boundaries, deployment runbooks, and schema migration procedures
- Architected **event-driven data pipelines** connecting internal ledger systems with external market data feeds handling 2M+ daily records
- Evaluated **performance versus maintainability** trade-offs in schema redesigns, presenting options to non-technical stakeholders with clear impact summaries

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Built and maintained **RESTful APIs** supporting trading and risk workflows for 40+ downstream applications across the bank's technology stack
- Designed **relational database models** in PostgreSQL and Oracle, enforcing normalization patterns that simplified cross-team reporting
- Developed **React and JavaScript interfaces** for operational dashboards monitoring batch job health and regulatory reporting status
- Implemented comprehensive **automated test suites** covering API contracts, edge cases, and regression paths for quarterly release cycles
- Participated in **solution design sessions** for large initiatives, documenting trade-offs between batch processing windows and real-time availability
- Performed thorough **code reviews** with actionable feedback focused on error handling, testability, and long-term maintainability
- Collaborated with business analysts and compliance teams to ensure **technical solutions** met audit and data governance requirements

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Contributed to **full-stack features** on a receipt management platform using JavaScript, CSS, and backend APIs for restaurant clients
- Wrote **unit tests** for API endpoints and frontend components, helping stabilize releases during weekly deployment cycles
- Refactored legacy **JavaScript modules** into reusable components, improving page load times on the admin portal by 28%
- Documented **API integration patterns** and onboarding guides used by subsequent engineering interns
- Supported **code review cycles** by addressing feedback on pull requests and suggesting improvements for error handling consistency

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed responsive **web pages** and landing experiences for a nonprofit foundation using HTML, CSS, and JavaScript
- Integrated a **contact form backend** with email notification services, enabling reliable inquiry routing for program coordinators
- Implemented **cross-browser compatibility** fixes across Safari, Chrome, and Firefox for donor-facing pages
- Collaborated with a remote design volunteer to translate mockups into **accessible, mobile-first layouts**
- Maintained **site content updates** and basic analytics tracking through Google Analytics integration

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive UI Design

Backend: Ruby, Ruby on Rails, Node.js, Python, RESTful API Design, Microservices

Databases: PostgreSQL, Oracle, Redis, Relational Schema Design, Query Optimization

Cloud & DevOps: AWS, Docker, CI/CD Pipelines, GitHub Actions, Infrastructure as Code

Monitoring & Tools: Datadog, Grafana, Git, Postman, AI-Assisted Development Tools

Workflow & PM: Agile/Scrum, Technical Documentation, Code Review, Cross-Functional Collaboration
