PROFESSIONAL SUMMARY

Full-stack software engineer with 8+ years building responsive web applications and scalable backend services across fintech and enterprise environments. Expert in TypeScript, React, Python, Flask, and SQLAlchemy, delivering end-to-end features from API design through polished user interfaces. Proven track record owning full feature lifecycles, collaborating with designers and product managers, and scaling systems under rapid growth. Experienced with AWS, Kubernetes, and SQL databases in production SaaS platforms.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Owned **end-to-end delivery** of portfolio analytics features using **React**, **TypeScript**, and **Python/Flask** APIs, reducing client reporting turnaround by **40%**
- Architected **SQLAlchemy** data models and REST services supporting **500K+ daily transactions** with sub-200ms query response times
- Partnered with **product managers and designers** to translate complex financial workflows into intuitive multi-step UI flows
- Built reusable **React component library** adopted across 6 internal dashboards, standardizing UX patterns and cutting frontend development time
- Scaled backend services on **AWS** with containerized deployments, improving release cadence from monthly to weekly cycles
- Implemented caching and query optimization strategies that **reduced API latency by 35%** during peak trading hours
- Led code reviews and mentored 3 engineers on **full-stack best practices**, TypeScript patterns, and test coverage standards
- Integrated third-party market data feeds into unified dashboards, consolidating **12 data sources** into a single client view
- Drove **Kubernetes** migration for staging environments, enabling parallel feature testing and faster rollback cycles

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed internal risk reporting tools with **Python** and **Flask**, processing **2M+ trade records** nightly for regulatory compliance
- Built **React** dashboards surfacing real-time counterparty exposure metrics for front-office trading desks
- Designed **SQLAlchemy** ORM layers abstracting legacy Oracle schemas, enabling safer migrations without downtime
- Collaborated with business analysts and UX teams to refine workflow requirements for **trade confirmation automation**
- Optimized stored procedures and API endpoints, cutting batch job runtime from **4 hours to 90 minutes**
- Implemented role-based access controls and audit logging for **SOX-compliant** financial applications
- Contributed to cross-team API standards initiative adopted by **8 technology groups** across the global markets division
- Automated reconciliation pipelines reducing manual review effort by **60%** for operations teams

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built customer-facing inventory management UI with **React** and **JavaScript**, supporting real-time stock level updates
- Implemented **Python/Flask** REST endpoints for order tracking, integrating with PostgreSQL via **SQLAlchemy**
- Collaborated with design team to implement responsive layouts improving **mobile checkout completion by 22%**
- Wrote unit and integration tests achieving **85% coverage** on core payment workflow modules
- Refactored legacy jQuery components to **React**, reducing page load times and simplifying state management

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed nonprofit donation portal using **HTML**, **CSS**, and **JavaScript**, enabling online contributions for fundraising campaigns
- Integrated payment gateway APIs to process secure transactions with **PCI-aware** form handling
- Built admin dashboard for tracking donor metrics and campaign performance in **real time**
- Optimized static assets and image delivery, improving **page load speed by 30%** on mobile devices

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: TypeScript, React, JavaScript, HTML5, CSS3, Redux, Responsive Design, Component Architecture

Backend: Python, Flask, SQLAlchemy, REST APIs, Node.js, Microservices

Databases: PostgreSQL, MySQL, Oracle, Redis, Query Optimization

Cloud & DevOps: AWS, Kubernetes, Docker, CI/CD, Terraform, Container Orchestration

Monitoring & Tools: Git, Jenkins, Datadog, Jest, Pytest, Swagger

Workflow & PM: Agile/Scrum, Jira, Cross-functional Collaboration, Technical Documentation, Code Review
