PROFESSIONAL SUMMARY

Full stack software engineer with 6+ years building scalable web applications and microservices across finance and enterprise environments. Experienced in React, TypeScript, Node.js, Java, and Python with AWS cloud delivery. Known for cross-functional collaboration, secure API design, and mentoring engineers through code review and pair programming.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected **full-stack microservices** supporting portfolio analytics workflows, enabling investment teams to access real-time risk data through unified REST APIs serving 12 internal product surfaces.
- Built **React and TypeScript** dashboard modules with memoization and lazy-loading patterns, reducing initial page load latency by 35% across high-traffic reporting applications.
- Designed **fault-tolerant Node.js services** with circuit-breaker patterns and async messaging, maintaining 99.9% uptime during peak trading and reconciliation windows.
- Led **code reviews and pair programming** for a team of 6 engineers, establishing shared standards for API contracts, test coverage, and secure coding practices.
- Implemented **CI/CD pipelines** via GitHub Actions with automated integration tests, shortening release cycles from weekly to daily for core platform services.
- Partnered with product and architecture stakeholders to align **technical roadmaps** with business priorities, translating requirements into incremental, testable delivery milestones.
- Integrated **AWS cloud services** including Lambda, ECS, and S3 within event-driven processing pipelines handling 500K+ daily financial transactions.
- Troubleshoot complex defects across **distributed environments** using structured logging and distributed tracing, achieving median sub-2-hour recovery for production incidents.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Java-based microservices** for trade lifecycle processing, supporting secure REST integrations across 8 downstream banking and compliance systems.
- Built internal tooling with **React and TypeScript** to modernize analyst workflows, replacing manual spreadsheet processes for 200+ operations users.
- Contributed to **RESTful API design** for cross-team platform services, ensuring backward compatibility during phased legacy system migrations.
- Participated in **code reviews and knowledge-sharing** sessions, authoring runbooks and debugging guides for distributed batch and reconciliation workloads.
- Deployed services to **AWS** with Jenkins-based CI/CD pipelines, automating regression suites across staging and production release environments.
- Diagnosed and resolved **production defects** in high-volume transaction pipelines, collaborating with operations teams to restore service within SLA targets.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Implemented **React components** for customer-facing receipt management flows, improving form validation and mobile accessibility across key user journeys.

- Developed **Node.js API endpoints** for document ingestion and metadata extraction, supporting integrations with third-party payment providers.
- Wrote unit and integration tests with **Jest and Mocha**, raising coverage on core service modules to 80%+ and reducing regression defects in sprint releases.
- Collaborated in **Agile sprint ceremonies** and pair programming sessions, delivering backlog features aligned with product milestones and acceptance criteria.
- Refactored legacy **JavaScript modules** into TypeScript with explicit type contracts, reducing runtime errors in shared utility libraries used across the codebase.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built responsive **HTML/CSS layouts** for nonprofit fundraising pages, ensuring cross-browser compatibility and mobile-first presentation standards.
- Implemented **JavaScript interactions** for donation forms and newsletter sign-ups integrated with third-party CRM workflows.
- Maintained content updates across **WordPress-backed** site sections, coordinating with stakeholders on publish schedules and QA review.
- Optimized page assets and image delivery, improving **Lighthouse performance scores** on primary landing pages used in outreach campaigns.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, Vue, Responsive Design

Backend: Node.js, Java, Python, Go, RESTful APIs, Microservices, Event-Driven Architecture

Databases: PostgreSQL, MongoDB, Redis, MySQL

Cloud & DevOps: AWS, Azure, GitHub Actions, Jenkins, Docker, Terraform, Serverless

Monitoring & Tools: Datadog, Prometheus, ELK Stack, Git, Postman

Workflow & PM: Agile, Scrum, Jira, Confluence, Code Review, Pair Programming
