PROFESSIONAL SUMMARY

Full stack software engineer with 5+ years building responsive web applications, cross-platform mobile apps, and API-driven platforms across fintech and SaaS. Expert in React, TypeScript, GraphQL, and modern JavaScript with end-to-end ownership from UI implementation to backend services and database design. Track record delivering performance-optimized, A/B-tested product experiences while collaborating with designers and backend teams in remote, cross-functional environments.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led **end-to-end delivery** of React and TypeScript web applications supporting portfolio analytics used by **40+ investment professionals**, owning UI, API integration, and PostgreSQL data layer
- Built and shipped **React Native** modules for iOS and Android, enabling portfolio managers to review positions and approvals on mobile with **sub-2-second load times** across device profiles
- Designed and implemented **GraphQL schemas** and client queries replacing fragmented REST calls, reducing over-fetching and cutting average page data payloads by **35%**
- Ran **A/B experiments** on onboarding and dashboard flows using feature flags and event analytics, informing product decisions that improved **feature adoption by 22%**
- Optimized front-end performance through **code splitting**, lazy loading, and CSS refinements, improving Lighthouse performance scores from **62 to 91** on core application routes
- Partnered with UI/UX designers to translate **wireframes and design systems** into accessible, responsive interfaces using Sass and component libraries aligned to brand standards
- Integrated REST and GraphQL **APIs** with backend services, establishing typed client contracts and error handling patterns adopted across **three product squads**
- Mentored junior engineers on **Git workflow**, pull request reviews, and component architecture, raising deployment frequency while maintaining stable release quality

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **full-stack web applications** for internal risk and reporting tools used by trading desks across North America, spanning React front ends and Node.js services
- Implemented **TypeScript** services and shared type definitions across front-end and back-end codebases, reducing integration defects during cross-team releases
- Built **responsive dashboards** with modern JavaScript, HTML, and CSS, ensuring consistent behavior across Chrome, Firefox, Safari, and Edge for **500+ daily users**
- Contributed to **GraphQL adoption** for a client reporting portal, defining schema extensions and resolver logic that simplified data access for downstream UI teams
- Collaborated with backend developers to integrate **REST and messaging APIs**, validating data flows and reconciliation logic for regulatory reporting pipelines
- Improved application **performance and reliability** through query optimization, caching strategies, and bundle size reductions that lowered average dashboard load time by **28%**
- Participated in **Git-based release workflows** including branching, merging, and pull request reviews within a 40-engineer technology organization
- Supported migration of legacy jQuery interfaces to **React component architecture**, delivering reusable UI modules that accelerated delivery of subsequent feature work

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Implemented **React components** from design mockups for a restaurant compliance platform, transforming wireframes into production UI used by **120+ client locations**
- Developed **JavaScript (ES6+)** features with asynchronous API integration, enabling real-time checklist updates synchronized with backend services
- Applied **responsive CSS** and Sass styling to ensure consistent layout and usability across desktop and tablet browsers
- Wrote unit tests and participated in **Git pull request reviews**, contributing to a collaborative intern team shipping weekly releases
- Assisted in **database-backed admin tooling**, writing SQL queries and validation logic for menu and inspection data management
- Profiled and fixed front-end bottlenecks, improving **page render consistency** for high-traffic reporting views during peak service hours

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built and maintained **HTML, CSS, and JavaScript** pages for a nonprofit foundation site, implementing content updates and interactive components under tight launch timelines
- Converted static design concepts into **responsive web layouts** compatible across major browsers and mobile viewports
- Integrated third-party **APIs** for newsletter signup and event registration, ensuring reliable form submission and data handoff to backend endpoints
- Used **Git** for version control and collaborative updates with a distributed volunteer engineering team
- Tuned asset delivery and script loading to improve **page load performance** on content-heavy landing pages

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, React Native, TypeScript, JavaScript (ES6+), HTML5, CSS3, Sass, Responsive Design, Component Architecture, State Management

Backend: Node.js, Express, REST APIs, GraphQL (Schema Design, Resolvers), Server-side Logic

Databases: PostgreSQL, MySQL, SQL, Database Design, Query Optimization

Cloud & DevOps: AWS, Docker, CI/CD, GitHub Actions, Deployment Pipelines

Monitoring & Tools: Git, GitHub, Jest, React Testing Library, Lighthouse, Feature Flags, A/B Testing Frameworks

Workflow & PM: Agile/Scrum, Jira, Cross-functional Collaboration, Code Review, Technical Documentation
