PROFESSIONAL SUMMARY

Senior full stack engineer with 8+ years delivering Python, Django, React, and Next.js applications across SaaS and financial platforms. Designs REST and GraphQL APIs, optimizes PostgreSQL schemas and queries, and builds reliable ETL workflows on cloud infrastructure. Known for collaborative team programming, mentoring junior developers, and resolving complex cross-stack issues through test-driven development and disciplined code review practices.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led end-to-end delivery of **full stack SaaS capabilities** using **Python, Django, React, and Next.js**, enabling portfolio teams to manage analytics workflows for institutional investment operations.
- Architected **RESTful and GraphQL APIs** consumed by internal dashboards and partner integrations, consolidating fragmented data access patterns across **12+ application modules** and reducing redundant client-side fetching logic.
- Redesigned **PostgreSQL schema** structures and **SQL query paths** for trade and holdings reporting, improving average report generation performance by **40%** through indexing, batch retrieval, and careful normalization trade-offs.
- Built **ETL transformation workflows** in **Python** to ingest, validate, and publish financial datasets from upstream vendors, shortening data freshness cycles from daily batches to **near-real-time** updates for desk-facing tools.
- Established **pytest** and **Jest** coverage for critical backend services and UI flows, partnering in **code reviews** and **CI pipelines** to enforce automated quality gates before production releases.
- Mentored **two junior developers** through pairing, design discussions, and architecture walkthroughs, improving onboarding speed and raising delivery consistency across **cross-functional** product and risk stakeholders.
- Diagnosed and resolved **complex production issues** spanning API latency, frontend state regressions, and database contention, restoring platform stability within strict trading-window operational constraints.
- Containerized services with **Docker** and deployed to **AWS** using **GitHub Actions** build pipelines, standardizing release workflows across staging and production environments.
- Collaborated with product, compliance, and operations partners to translate **business logic** into maintainable domain models, supporting auditable workflows without sacrificing developer velocity.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Python** automation and internal tooling for trading operations and regulatory reporting, supporting analysts across **global markets** desks with repeatable workflow improvements.
- Built **React** dashboard components for risk monitoring, integrating **REST APIs** that surfaced exposure metrics and position summaries to front-office stakeholders in near real time.
- Authored and tuned **SQL** against **PostgreSQL** and enterprise data stores to power ad hoc analysis, scheduled batch reporting, and controlled extracts for compliance review cycles.
- Contributed to **unit testing** with **pytest** and participated in peer **code reviews**, improving handoff quality between development and QA teams during sprint delivery.
- Supported **Git**-based version control workflows and **Jira** ticket management within Agile sprints, helping the team ship incremental platform enhancements with predictable release cadence.
- Assisted senior engineers in debugging integration failures between legacy middleware and newer **API services** during a multi-year platform modernization initiative.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Implemented **TypeScript** and **JavaScript** UI components for a document workflow product, strengthening form validation, error handling, and accessibility across core customer submission flows.
- Integrated frontend modules with **RESTful backend services**, enabling reliable status tracking and notification updates throughout multi-step document processing pipelines.
- Authored **Jest unit tests** for shared component libraries, catching UI regressions early and improving confidence during frequent feature iteration cycles.
- Participated in **pair programming** sessions and sprint ceremonies, gaining practical experience with **Git**, continuous integration, and cross-team feature delivery practices.
- Refactored legacy view logic into reusable **React** patterns, reducing duplicated rendering code across **multiple feature screens** and simplifying future enhancements.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Delivered **responsive web pages** for foundation outreach campaigns using **HTML**, **CSS**, and **JavaScript**, ensuring consistent rendering across major browsers and mobile devices.
- Integrated contact and newsletter forms with lightweight **backend endpoints**, enabling reliable lead capture and subscriber management for program coordinators.
- Improved page load performance through **asset optimization** and lazy loading techniques, increasing mobile engagement for donor-facing content during campaign launch periods.
- Collaborated with nonprofit stakeholders to translate design mockups into **maintainable front-end** implementations aligned with brand and accessibility requirements.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Responsive UI, Component Architecture

Backend: Python, Django, FastAPI, REST APIs, GraphQL, Node.js, API Design

Databases: PostgreSQL, SQL, Schema Design, Query Optimization, Redis, Data Modeling

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, GitHub Actions, CI/CD Pipelines, Container Orchestration

Monitoring & Tools: pytest, Jest, unittest, Git, Postman, Logging Frameworks, Debugging Tooling

Workflow & PM: Jira, Agile/Scrum, Code Reviews, Pair Programming, Technical Mentorship, Cross-Functional Collaboration
