PROFESSIONAL SUMMARY

Full stack software engineer with 5+ years building responsive web applications in React and Node.js across finance and SaaS environments. Experienced designing reusable UI component libraries, integrating REST APIs, and working with PostgreSQL and SQL Server data layers. Skilled in cross-browser responsive design, asynchronous data flows, and Agile delivery with product and design partners. Strong debugging mindset across frontend and backend application layers.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led development of **responsive React dashboards** supporting portfolio analytics for **40+ internal users**, replacing legacy spreadsheet workflows with reusable chart and table components.
- Architected a **shared UI component library** in React with documented props, accessibility patterns, and CSS modules adopted across **three product teams**.
- Built **Node.js REST services** to expose portfolio and reporting data, integrating **PostgreSQL queries** with pagination and filtering for frontend consumption.
- Implemented **Redux-based state management** for complex multi-step workflows, reducing redundant API calls and improving **page load responsiveness** across key user flows.
- Partnered with product managers and designers in **Agile sprints** to translate wireframes into production features, participating in **code reviews** and frontend standards documentation.
- Diagnosed and resolved **full stack integration defects** spanning React views, API contracts, and SQL data mismatches, cutting recurring support tickets for core reporting screens.
- Established **Git branching conventions** and CI checks for frontend packages, improving release confidence for weekly deployments to **AWS-hosted environments**.
- Mentored junior developers on **React hooks patterns**, async API integration, and responsive CSS techniques during onboarding and sprint delivery.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **internal banking web applications** in React and JavaScript serving operations teams across trade processing and compliance monitoring workflows.
- Consumed and published data through **RESTful APIs**, handling asynchronous request patterns, error boundaries, and retry logic for unreliable downstream services.
- Wrote **SQL queries** against Microsoft SQL Server to insert, update, and retrieve transactional records supporting frontend data tables and audit views.
- Built **reusable form and table components** with HTML5 semantic markup and CSS3 responsive layouts validated for **cross-browser compatibility**.
- Collaborated with senior engineers, business analysts, and QA in **Agile ceremonies** to deliver incremental feature releases on two-week sprint cadences.
- Created lightweight **Node.js utilities** for data transformation and API proxying, bridging legacy services with modern React client applications.
- Investigated **API and data integration failures** in production, tracing issues from UI symptoms through service logs to database constraints.
- Contributed to **development standards** documentation covering JavaScript style guides, Git workflows, and pull request review expectations for the technology analyst cohort.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Shipped **React features** for a restaurant payment platform, integrating checkout flows with **REST API endpoints** and client-side validation logic.
- Implemented **responsive UI layouts** with CSS flexbox and media queries, ensuring consistent experience across mobile browsers and desktop form factors.
- Assisted in building **Node.js middleware** for authentication headers and request logging supporting frontend API consumption patterns.
- Retrieved and displayed transactional data via **SQL queries**, connecting React list views to backend endpoints with pagination support.
- Participated in **code reviews** and pair programming sessions, applying Git feature-branch workflows under senior engineer guidance.
- Resolved **cross-browser rendering issues** in payment summary components by refactoring component structure and standardizing CSS class conventions.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** for a nonprofit foundation site using HTML5, CSS3, and JavaScript with mobile-first layout principles.
- Integrated contact and newsletter forms with **REST endpoints**, handling asynchronous submissions and user-facing error states.
- Built **reusable navigation and content modules** to accelerate page updates for campaign launches and event announcements.
- Collaborated with stakeholders to refine UI requirements and deliver iterative updates within a **remote Agile** cadence.
- Diagnosed **client-side bugs** in form validation and API response handling, restoring reliable user submissions before launch deadlines.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Redux, Responsive Design, Component Libraries, Cross-Browser Compatibility, State Management

Backend: Node.js, Express.js, RESTful APIs, Asynchronous Programming, API Integration Patterns

Databases: PostgreSQL, Microsoft SQL Server, MySQL, SQL (CRUD Operations), MongoDB

Cloud & DevOps: AWS, Azure, Git, CI/CD, Feature Branch Workflows

Monitoring & Tools: Chrome DevTools, Postman, Jest, React Testing Library, ESLint, Webpack

Workflow & PM: Agile/Scrum, Jira, Code Reviews, Cross-Functional Collaboration, Technical Documentation
