PROFESSIONAL SUMMARY

Full stack software engineer with eight years building responsive web applications across fintech and investment platforms. Expert in React, TypeScript, Node.js, and API design, delivering pixel-perfect UI from design to production. Led features in agile teams with product, design, and engineering stakeholders. AI-native developer using Cursor, Claude Code, and agent workflows to accelerate quality. Strong background in secure financial workflows, compliance systems, and scalable SaaS architecture.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led end-to-end development of an investment portfolio web platform using **React, TypeScript, and Node.js**, delivering seamless desktop and mobile experiences for portfolio managers and analysts
- Translated Figma designs into **pixel-perfect, responsive SCSS components** with shared design tokens, maintaining site-wide visual consistency across the full product surface
- Architected **REST and GraphQL API integrations** with authentication, role-based access, and audit logging for compliance-sensitive financial and payment workflows
- Built **real-time holdings and transaction dashboards** consuming market data services, enabling analysts to monitor positions and reconcile activity without manual refresh cycles
- Partnered with the CTO and product leadership on **technology stack direction**, evaluating Next.js adoption, ORM selection, and front-end architecture for long-term platform scalability
- Established **AI-native development practices** with Cursor, Claude Code, and MCP-driven agent workflows, accelerating feature delivery while preserving code review and quality standards
- Served as **technical lead on payment reconciliation features**, coordinating design, QA, and backend engineers through lean agile sprints from requirements to production deployment
- Diagnosed and resolved **production performance bottlenecks** in React rendering and API query patterns, improving load times and stability for high-traffic portfolio views
- Mentored engineers on **React patterns, API best practices, and CSS architecture**, raising pull request quality and front-end consistency across the engineering team

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **internal trading and risk web applications** with React and JavaScript for front-office teams across fixed income and equities business lines
- Implemented **responsive dashboard interfaces** using SCSS modules, converting business requirements and wireframes into production-ready UI for desk analysts
- Integrated **secure REST APIs** with backend services supporting trade settlement, regulatory reporting, and compliance validation across financial workflows
- Collaborated with product owners, UX designers, and QA in **agile two-week sprints** to ship regulatory platform enhancements under firm deadline pressure
- Built **data visualization components** for exposure and P&L reporting, giving risk managers faster access to portfolio metrics and exception indicators
- Maintained a **shared component library and CSS standards** adopted across multiple internal applications, reducing UI inconsistency and duplicate styling effort
- Isolated and resolved **cross-browser and API integration defects** in production environments, restoring service reliability for business-critical trading tools

- Drove **TypeScript adoption** across front-end modules, improving type safety and reducing runtime errors in sensitive financial application codepaths

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React components** for a customer-facing web application, implementing responsive layouts aligned with product and design specifications
- Developed **Node.js API endpoints** supporting checkout flows, inventory updates, and third-party service integrations for restaurant clients
- Authored **SCSS stylesheets** with mobile-first breakpoints, ensuring accurate rendering across desktop and mobile web browsers
- Participated in **agile standups, code reviews, and QA handoffs**, delivering scoped features across multiple sprint cycles with the product team
- Added **Jest unit and integration tests** for core checkout modules, improving confidence in payment and order workflow releases
- Debugged **frontend-to-API integration issues** with payment providers, tracing failures through network layers to root cause and patch deployment

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** with HTML, CSS, and JavaScript for a nonprofit fundraising platform serving donor acquisition campaigns
- Implemented **donor contribution flows** with client-side validation and secure form submission handling aligned to campaign requirements
- Collaborated with designers to enforce **consistent visual and layout standards** across landing pages and event microsites
- Integrated **third-party APIs** for email notifications and payment processing within the donation experience
- Improved **page load performance** through asset optimization and lazy loading, supporting faster access on mobile connections

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React.js, TypeScript, JavaScript, Next.js, HTML5, CSS/SCSS, Tailwind CSS, Responsive Design, Component Libraries

Backend: Node.js, NestJS, REST APIs, GraphQL, API Design, Authentication & Authorization

Databases: PostgreSQL, Prisma ORM, MongoDB, Redis, SQL Query Optimization

Cloud & DevOps: AWS, Docker, CI/CD Pipelines, GitHub Actions, Infrastructure as Code

Monitoring & Tools: Cursor, Claude Code, MCP, Jest, Cypress, Webpack, Git, Chrome DevTools

Workflow & PM: Agile/Scrum, Technical Leadership, Cross-functional Collaboration, Jira, Code Review
