PROFESSIONAL SUMMARY

Senior full stack engineer with 8+ years delivering secure, scalable applications in Python and JavaScript for financial services and lending platforms. Experienced architecting RESTful APIs, microservices, and modern frontends on AWS, leading cloud migration and modernization initiatives while partnering with architects, product owners, and cross-functional teams in remote client environments.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led **full-stack delivery** of lending workflow services and internal dashboards using **Python**, **Django**, and **Vue.js** for cross-functional product teams
- Architected **RESTful microservices** on **AWS ECS** and **RDS** supporting high-volume loan origination pipelines with resilient failure handling and audit trails
- Drove **cloud modernization** by containerizing legacy modules with **Docker** and standardizing **ECS** deployments, improving release frequency and operational consistency
- Built **API-first components** with role-based access, encryption in transit, and compliance logging aligned to **lending and financial controls**
- Partnered with **product owners**, UX designers, and platform engineers to prototype solutions, clarify requirements, and ship features in **Agile two-week sprints**
- Optimized **PostgreSQL** schemas, indexes, and ORM query paths for reporting services, reducing bottlenecks in portfolio analytics workloads
- Mentored engineers on **code review standards**, automated testing, and **AWS deployment** practices while scaling team delivery capacity
- Established **CI/CD pipelines** with automated test gates and staged rollouts, enabling frequent production releases with controlled rollback paths
- Integrated third-party credit and document providers through **resilient HTTP integrations** with retries, timeouts, and observability hooks

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Delivered **Python** and **JavaScript** services supporting trade operations and regulatory reporting workflows for **global banking** platforms
- Developed **RESTful APIs** linking front-office applications to downstream risk and settlement systems with idempotent batch processing
- Contributed to **application modernization** by decomposing legacy components into **microservices** deployed on **AWS**, improving release independence
- Collaborated with **solution architects** and business analysts to translate requirements into technical designs for **client-facing** enhancements
- Built **React** operational dashboards for exception monitoring and queue management, reducing manual follow-up across multiple desk workflows
- Expanded **pytest** and integration coverage for critical API contracts and payment flows, strengthening regression confidence before production releases
- Supported **Agile delivery**, production troubleshooting, and on-call rotations for **tier-1 banking applications** with strict availability expectations

- Hardened services for **security and performance** using input validation, secrets management via **AWS Parameter Store**, and structured logging

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Implemented **JavaScript** and **Python** features for receipt digitization workflows supporting early **SaaS product** releases
- Built **REST API** endpoints and persistence layers enabling mobile client integrations during controlled pilot rollouts
- Authored unit and integration tests with **pytest** and Jest to support **weekly sprint** release cadence
- Participated in **code reviews** and paired debugging sessions to resolve defects and improve API documentation
- Contributed **Vue.js** admin UI components with consistent validation and accessibility patterns across internal tools

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web experiences** with **HTML**, **CSS**, and **JavaScript** for nonprofit digital campaigns and donor engagement flows
- Integrated **third-party donation APIs** and secure form handlers for remote fundraising initiatives
- Collaborated with **nonprofit stakeholders** to refine requirements and iterate on **UX improvements** within compressed event launch timelines
- Maintained **site content** and resolved **cross-browser compatibility** defects to preserve mobile usability for foundation audiences

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: JavaScript, Vue.js, React, HTML5, CSS3, TypeScript, Responsive UI Development

Backend: Python, Django, Flask, FastAPI, RESTful APIs, Microservices, SQLAlchemy

Databases: PostgreSQL, Redis, SQL Optimization, Data Modeling

Cloud & DevOps: AWS (ECS, RDS, S3, Lambda, Parameter Store), Docker, Kubernetes, CI/CD, Terraform

Monitoring & Tools: CloudWatch, Datadog, Git, GitHub Actions, Postman, Structured Logging

Workflow & PM: Agile/Scrum, Jira, Confluence, Code Review, Technical Documentation, Stakeholder Collaboration
