PROFESSIONAL SUMMARY

Full stack engineer with 8+ years delivering production Node.js and TypeScript applications using Angular, React, and modern cloud infrastructure. Builds configurable front and back end platforms, workflow automation, and AI-assisted features that improve decision-making and digital service quality. Experienced across financial services with strengths in PostgreSQL, AWS, Docker, and cross-team delivery from requirements through deployment.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led **full-stack delivery** of an internal operations platform using **Node.js, TypeScript, and Angular**, serving **200+ analysts** with configurable workflows and role-based dashboards
- Architected **modular front and back end services** with shared configuration layers, enabling teams to **deploy feature changes independently** without cross-service regressions
- Built **REST and event-driven APIs** on Node.js integrated with **PostgreSQL**, standardizing validation rules and reducing duplicate data entry across portfolio reporting tools
- Implemented an **AI-assisted document parsing** pipeline that extracted structured fields from unstructured PDFs, cutting manual review effort for operations staff
- Designed **Docker-containerized microservices** deployed on **AWS (Lambda, S3)** with infrastructure defined in **Terraform**, improving release consistency across environments
- Partnered with stakeholders to translate **customer support workflows** into self-service web modules, decreasing routine configuration escalations to engineering
- Established **CloudWatch monitoring**, structured logging, and alerting for production services, improving mean time to detection for integration failures
- Mentored **two junior engineers** on TypeScript patterns, testing practices, and code review standards while leading sprint planning for a four-person squad
- Drove **cross-functional design reviews** with product and compliance teams to ship accessible, responsive UI components aligned with data governance policies

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Angular and TypeScript** front-end modules for trade operations dashboards consumed by **150+ users** across global markets desks
- Built **Node.js services** exposing internal APIs for reference data, entitlements, and batch job orchestration with **PostgreSQL** persistence
- Automated **repetitive reconciliation workflows** using scheduled jobs and notification hooks, reducing manual touchpoints in daily control processes
- Contributed to **AWS-hosted deployment pipelines** integrating Docker builds with environment promotion gates and rollback procedures
- Collaborated with business analysts to **design tactful solutions** for evolving regulatory reporting requirements without disrupting legacy integrations
- Integrated third-party **contact and ticketing systems** with internal status portals, giving operators unified visibility into open incidents and SLA metrics
- Participated in **on-call rotation** for production services, diagnosing latency and data consistency issues using CloudWatch metrics and application logs

- Supported **ServiceNow request intake automation** by linking approved change tickets to CI/CD triggers, shortening approval-to-deployment cycles

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Implemented **React components** and **Node.js API endpoints** for a check-management SaaS prototype used in pilot deployments with restaurant partners
- Wrote unit and integration tests for **TypeScript services**, improving confidence in weekly releases throughout the internship
- Refactored authentication flows to use **JWT-based session handling**, aligning front-end route guards with server-side authorization checks
- Participated in agile ceremonies and paired with senior engineers on **PostgreSQL schema migrations** and query optimization
- Delivered responsive UI updates for mobile checkout flows, improving layout consistency across common device breakpoints
- Documented **API contracts** and local development setup, reducing onboarding time for subsequent intern cohorts

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built **responsive marketing and content pages** using HTML, CSS, and JavaScript for a nonprofit digital presence
- Integrated **third-party donation widgets** and analytics hooks while preserving accessible markup and performance budgets
- Collaborated with distributed volunteers to iterate on **information architecture** for program landing pages
- Configured lightweight **Node.js utilities** for form handling and email notifications supporting community outreach campaigns
- Delivered cross-browser compatible layouts and resolved rendering issues reported across Safari, Chrome, and mobile clients

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: Angular, React, TypeScript, JavaScript, HTML5, CSS3, Responsive Design, Component Architecture

Backend: Node.js, Express.js, REST APIs, Event-Driven Services, JWT Authentication, Microservices

Databases: PostgreSQL, SQL, Schema Design, Query Optimization, Redis

Cloud & DevOps: AWS (Lambda, S3, CloudWatch), Docker, Terraform, CI/CD, Infrastructure as Code

Monitoring & Tools: CloudWatch, Structured Logging, Git, Jest, Integration Testing, API Documentation

Workflow & PM: Agile, Scrum, ServiceNow, Jira, Cross-Functional Collaboration, Stakeholder Requirements
