PROFESSIONAL SUMMARY

Senior full stack engineer with 8+ years building scalable cloud platforms in finance and SaaS. Deep expertise in JavaScript, Node.js, and AWS serverless services including Lambda, SQS, S3, and DynamoDB. Drives technical design, mentoring, and Agile delivery while improving quality standards, mitigating risk, and shipping performance-focused distributed systems with cross-functional teams.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and delivered **full-stack JavaScript applications** on AWS, supporting portfolio analytics workflows used by **40+ investment professionals** across distributed teams.
- Designed **serverless event pipelines** with Lambda, SNS/SQS, and S3 that processed **millions of market data events** daily while maintaining sub-second latency targets.
- Authored **technical design documents and flow diagrams** for new platform capabilities, accelerating cross-team alignment and reducing rework during sprint planning.
- Built **CI/CD pipelines** with Jenkins and CloudFormation, enabling **15+ weekly deployments** with automated unit testing and structured validation gates.
- Mentored **3 junior engineers** on Node.js patterns, AWS IAM best practices, and code review standards, improving sprint throughput and reducing defect escape rate.
- Implemented **relational and NoSQL data layers** on RDS and DynamoDB, optimizing query paths that cut report generation time by **35%** for high-volume trading summaries.
- Proactively identified and mitigated **technical risks** in legacy integrations, delivering remediation plans that prevented production incidents during peak settlement windows.
- Partnered with product and QA in **Agile Scrum ceremonies**, translating business requirements into shippable increments with clear acceptance criteria and quality assurance checkpoints.
- Established **Linux-based scripting utilities** and CloudWatch dashboards that improved on-call triage speed and visibility into distributed service health.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Node.js microservices** supporting trade lifecycle and reporting systems, enabling reliable processing for **high-volume banking operations** across global markets.
- Deployed **AWS Lambda and EC2 workloads** with IAM-controlled access patterns, meeting security and compliance requirements for regulated financial data.
- Created **technical documentation and sequence diagrams** for internal APIs, improving handoffs between engineering, operations, and business stakeholders.
- Built **automated unit and integration tests** within structured validation pipelines, raising code coverage on critical payment paths and reducing regression defects.
- Collaborated in **cross-functional Agile teams** on sprint planning, demos, and release coordination for multi-quarter platform modernization initiatives.
- Integrated **SQS-driven asynchronous workflows** and S3 archival patterns that decoupled batch settlement jobs from user-facing applications.
- Optimized **SQL queries and stored procedures** on RDS-backed services, improving batch reconciliation runtime for end-of-day reporting by **28%**.

- Supported **Linux server environments** and AWS CLI automation for environment provisioning, streamlining developer onboarding across distributed teams.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **JavaScript features** across customer-facing web modules, contributing to a checkout experience used by **thousands of monthly active users**.
- Implemented **REST API integrations** with Node.js services, enabling reliable order status updates between frontend clients and backend fulfillment systems.
- Wrote **unit tests** for core business logic and participated in peer code reviews that improved overall code quality across the intern cohort.
- Collaborated in **Agile sprint cycles**, delivering assigned stories on schedule while documenting implementation details for team knowledge sharing.
- Assisted with **AWS S3 asset hosting** and environment configuration, supporting staging deployments for QA validation cycles.
- Resolved **frontend performance bottlenecks** in legacy pages, reducing initial render delays through targeted component refactoring and lazy loading.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** with JavaScript and modern CSS for foundation outreach programs, supporting content updates without developer dependency.
- Integrated **third-party donation APIs** into the site backend, enabling secure transaction handling for fundraising campaigns.
- Maintained **cross-browser compatibility** and accessibility checks across key user journeys, improving usability for diverse donor audiences.
- Deployed site updates through **Git-based workflows**, coordinating release timing with nonprofit stakeholders and content editors.
- Documented **deployment steps and troubleshooting guides** that simplified knowledge transfer for volunteer maintainers after contract completion.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: JavaScript, HTML5, CSS3, React, Responsive Web Design, Component Architecture

Backend: Node.js, Express, REST APIs, Microservices, Serverless Architecture, Linux Scripting

Databases: PostgreSQL, MySQL, Amazon RDS, DynamoDB, SQL Optimization, Data Modeling

Cloud & DevOps: AWS (Lambda, SNS/SQS, S3, IAM, EC2, CloudWatch, VPC), AWS CDK, CloudFormation, Jenkins, Ansible, Bitbucket, CI/CD

Monitoring & Tools: CloudWatch, AWS CLI, Git, Selenium, Cucumber, Unit Testing Frameworks

Workflow & PM: Agile Scrum, Sprint Planning, Technical Design Documentation, Risk Assessment, Mentorship, Cross-Functional Collaboration
