PROFESSIONAL SUMMARY

Senior full-stack engineer with 7+ years building production web platforms across fintech and enterprise SaaS. Skilled in React, TypeScript, and Node.js with ownership of auth, payments, data integrations, and APIs. Integrates LLM workflows and agent-assisted pipelines into CI/CD with Playwright automation. Ships reliable platform primitives, mentors engineers, and partners with founders and product on early-stage products.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led **full-stack feature delivery** across a capital management platform using **React**, **TypeScript**, and **Node.js** services supporting portfolio operations used daily by internal trading teams
- Architected **authentication and permissions** layer with role-based access controls, enabling fine-grained authorization across shared platform modules and downstream client applications
- Built **payment and billing integrations** connecting third-party processors to internal ledger systems, reducing manual reconciliation effort and improving settlement accuracy
- Designed **REST and GraphQL APIs** consumed by multiple product surfaces, establishing versioning standards that minimized breaking changes across concurrent release trains
- Integrated **LLM-assisted automation** into development workflows, orchestrating agent-driven code review and test generation that accelerated feature turnaround without compromising quality gates
- Established **Playwright end-to-end testing** in CI/CD pipelines alongside unit and integration coverage, catching regressions before production deploys across critical user journeys
- Partnered with **founders and product leadership** to translate complex platform primitives into intuitive UI experiences, balancing technical constraints with stakeholder priorities
- Mentored **two junior engineers** on system design and code review practices, raising team throughput while maintaining consistent security and data-handling standards

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Delivered **internal banking applications** supporting trade operations and client reporting for teams across fixed income and equities desks in a regulated environment
- Implemented **secure API integrations** between front-office systems and middleware services, enforcing encryption and audit logging aligned with enterprise compliance requirements
- Developed **React and TypeScript dashboards** surfacing real-time market and position data, reducing time-to-insight for technology and business analysts by consolidating disparate feeds
- Contributed to **shared platform services** for identity provisioning and session management used by multiple downstream applications across the technology organization
- Automated **database migration and deployment pipelines** within CI/CD workflows, improving release reliability across staging and production environments
- Collaborated with **cross-functional stakeholders** including risk, operations, and engineering leads to ship features under tight regulatory deadlines
- Supported **production incident response** for tier-one trading systems, diagnosing root causes and deploying hotfixes with minimal user disruption

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React components** for a restaurant technology product, implementing responsive UI patterns that improved checkout flow consistency across mobile and desktop
- Developed **Node.js REST endpoints** for order and inventory management, enabling reliable communication between frontend clients and persistent storage
- Wrote **unit and integration tests** covering core business logic, contributing to stable releases throughout the internship tenure
- Participated in **code reviews and agile ceremonies**, gaining hands-on experience with Git workflows and collaborative engineering practices
- Optimized **database queries** for reporting features, reducing page load latency on admin dashboards used by restaurant operators
- Assisted in **API documentation** and onboarding materials that accelerated integration efforts for new team contributors

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **WordPress and custom HTML/CSS** pages for a nonprofit foundation, delivering an accessible web presence aligned with organizational branding guidelines
- Implemented **responsive layouts** ensuring consistent rendering across mobile and desktop browsers for donor-facing content
- Configured **hosting and deployment workflows** for static and dynamic assets, enabling non-technical stakeholders to publish updates independently
- Collaborated with **foundation leadership** to gather content requirements and iterate on site structure ahead of public launch
- Optimized **page performance** through asset compression and caching, improving load times for community visitors

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, React Native, Electron

Backend: Node.js, Python, REST APIs, GraphQL, WebSockets, Microservices

Databases: PostgreSQL, MongoDB, Redis, SQL

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, GitHub Actions, Terraform

Monitoring & Tools: Playwright, Jest, Datadog, Sentry, Git

Workflow & PM: Agile/Scrum, Jira, Confluence, Technical Leadership, Mentorship
