PROFESSIONAL SUMMARY

Full stack software engineer with 8+ years delivering React, Next.js, Node.js, and Java Spring Boot microservices for content-rich web platforms. Owned feature design, API integrations, and core system enhancements supporting high-traffic user flows. Partnered with cross-team stakeholders on data pipeline reliability, scalability, and cohesive UX. Led small-to-medium initiatives from discovery through deployment while mentoring peers and driving continuous engineering improvements.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and maintained **full-stack features** on a **Next.js and React** platform serving **15K+ users**, improving page load performance by **35%** through server-side rendering and strategic caching.
- Built **REST and GraphQL APIs** with **Node.js and Java Spring Boot microservices**, enabling reliable **data flow** between CMS modules, third-party integrations, and downstream analytics pipelines.
- Designed **user interfaces and integration flows** for new product capabilities, partnering with product and design teams to deliver **cohesive cross-platform experiences** across web surfaces.
- Led **production troubleshooting** spanning frontend, backend, and infrastructure layers; reduced mean time to resolution by **40%** through runbooks and observability enhancements.
- Championed **software design principles** including modular architecture, security reviews, and scalable patterns adopted across **three engineering squads**.
- Guided **small-to-medium projects** from inception through delivery, coordinating with senior architects on **medium-complex initiatives** including CMS migration and API versioning.
- Introduced **CI/CD pipelines** and automated testing that increased deployment frequency from monthly to **weekly releases** with zero critical regressions over six months.
- Mentored **two junior engineers** on React patterns, Spring Boot service design, and code review practices, elevating team delivery velocity and code quality.
- Evaluated **emerging technologies** including SSR frameworks and API gateway patterns, presenting recommendations that informed the platform roadmap.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **React and Java Spring Boot** components for internal banking platforms, supporting **trade lifecycle workflows** used by operations teams across multiple business lines.
- Built **microservices** exposing REST interfaces for account data, implementing **secure authentication** and role-based access aligned with enterprise compliance standards.
- Collaborated with **cross-functional partner teams** including risk, operations, and infrastructure to ensure **consistent data flow** between front-office and back-office systems.
- Resolved **complex technical issues** in production environments, diagnosing root causes across distributed services and delivering fixes within SLA targets.
- Contributed to **internal content management tools** for knowledge bases, improving document discoverability and reducing support ticket volume by **25%**.
- Participated in **software design reviews**, advocating for scalability patterns and test coverage that reduced defect escape rate during quarterly releases.
- Supported **continuous improvement** initiatives by documenting integration patterns and sharing technical insights in team engineering forums.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Implemented **React components** and **Node.js API endpoints** for customer-facing features, supporting the core product used by **500+ restaurant clients**.
- Integrated **third-party payment and notification services**, ensuring reliable **data synchronization** between frontend dashboards and backend services.
- Wrote unit and integration tests that increased coverage to **80%** on assigned modules, catching regressions before production deployment.
- Participated in **Agile ceremonies** and code reviews, collaborating with senior engineers on feature specifications and technical approach.
- Fixed **production bugs** across the stack, improving application stability and reducing customer-reported issues during peak usage periods.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Built **responsive web pages** using HTML, CSS, and JavaScript for foundation marketing and donor outreach initiatives.
- Integrated **content management workflows** allowing non-technical staff to update site sections without developer intervention.
- Collaborated with stakeholders to translate **design mockups** into accessible, cross-browser compatible interfaces.
- Optimized page assets and markup, improving **mobile load times** and search visibility for key landing pages.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, Next.js, JavaScript, TypeScript, HTML5, CSS3, Redux, Responsive Design

Backend: Node.js, Java, Spring Boot, Microservices, REST APIs, GraphQL

Databases: PostgreSQL, MongoDB, Redis, MySQL

Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins, GitHub Actions, Terraform

Monitoring & Tools: Datadog, Splunk, Grafana, Postman, Swagger, Git

Workflow & PM: Agile, Scrum, Jira, Confluence, Cross-Team Collaboration
