

Ryan Cho

Full Stack Software Engineer

+1 608 360 1459 · Ryanmcho100@gmail.com · <https://www.linkedin.com/in/ryan-cho-2020/> · <https://github.com/Chomama> · New York, United States

PROFESSIONAL SUMMARY

Full stack software engineer with seven years building secure, cloud-hosted web applications and REST services across financial and SaaS domains. Proficient in Python, React, PostgreSQL, and Docker with hands-on AWS deployment experience. Delivers iterative features through trunk-based development, automated testing, and thorough code review. Combines accessible front-end interfaces with maintainable backend APIs and PostgreSQL data models. Experienced partnering with cross-functional engineering teams.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Architected and delivered **full-stack features** across React front-end and **Python REST services**, supporting portfolio management workflows used by internal teams daily.
- Built **PostgreSQL data models**, migration scripts, and optimized queries reducing report generation latency by **40%** for trading analytics dashboards.
- Containerized microservices with **Docker** and deployed to **AWS** (ECS, RDS, S3), establishing repeatable release pipelines across staging and production environments.
- Implemented **unit and integration test suites** covering critical API contracts, raising regression coverage from 62% to **89%** within two release cycles.
- Led **code review** practices and documentation standards for a squad of four engineers, reducing production defect escape rate by **30%**.
- Developed responsive, **accessible React interfaces** aligned with WCAG guidelines for client-facing investment reporting tools.
- Partnered with security and infrastructure teams to remediate vulnerabilities and harden **cloud-hosted application** configurations.
- Drove **trunk-based development** adoption with short-lived branches and feature flags, enabling weekly production releases without rollback incidents.
- Mentored junior developers on **API design**, database indexing strategies, and observability best practices during sprint planning and pairing sessions.

Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

Summer Analyst,

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Python backend services** and REST endpoints supporting trade settlement and reconciliation platforms processing **millions of transactions** monthly.
- Built **React.js dashboards** for operations teams to monitor batch workflows, cutting manual status checks by **50%**.
- Authored **PostgreSQL stored procedures** and ETL pipelines for regulatory reporting with strict audit trail requirements.
- Participated in **CI/CD pipeline** enhancements using GitHub and Jenkins, accelerating deployment frequency from bi-weekly to **twice weekly**.
- Wrote **technical documentation** and runbooks for application interfaces used by downstream risk and compliance teams.
- Conducted **regression testing** and defect triage for release candidates, maintaining **99.5% uptime** for tier-one banking applications.
- Collaborated with cross-functional stakeholders on **application migration** from legacy mainframe interfaces to modern web stacks.

- Implemented **Docker-based** local development environments standardizing onboarding for **15+ analysts** across the technology division.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React components** for inventory management interfaces consumed by restaurant clients across mobile and desktop viewports.
- Developed **RESTful API** integrations connecting front-end forms to backend order processing services.
- Contributed **unit tests** and participated in **code reviews**, catching edge cases in payment validation logic before release.
- Documented **API endpoints** and deployment steps supporting team knowledge transfer at internship completion.
- Assisted with **PostgreSQL schema** updates and seed data scripts for QA environment parity.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **responsive web pages** using HTML, CSS, and JavaScript for nonprofit fundraising campaigns.
- Integrated third-party **donation APIs** enabling secure payment collection with client-side validation.
- Optimized page load performance through **asset compression** and lazy loading, improving Lighthouse scores by **25%**.
- Collaborated with stakeholders to iterate on **UI mockups** and accessibility improvements for donor-facing content.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React.js, JavaScript, TypeScript, HTML5, CSS3, Responsive Design, Accessibility (WCAG)

Backend: Python, REST APIs, Microservices, API Design, Flask

Databases: PostgreSQL, SQL, Stored Procedures, Schema Migrations, Query Optimization

Cloud & DevOps: AWS (ECS, RDS, S3, CloudWatch), Docker, Terraform, CI/CD, GitHub Actions

Monitoring & Tools: GitHub, Jenkins, Docker Compose, CloudWatch, pytest, Postman

Workflow & PM: Agile, Trunk-Based Development, Code Review, Technical Documentation, Feature Flags
