PROFESSIONAL SUMMARY

Senior software engineer with 7+ years delivering enterprise web applications across finance and investment platforms. Experienced in Java back-end services, component-driven front ends with React, and content-managed digital experiences with structured templates and workflows. Skilled at API integrations, build automation, performance tuning, and partnering with designers, authors, and product stakeholders to ship secure, scalable sites.

WORK EXPERIENCE

Software Engineer

May/2022 - May/2026

Aspen Capital

Remote | 10th Floor, New York

- Led full-stack delivery of an **investor-facing web platform** using React, Java services, and REST integrations supporting 12K+ monthly active users across portfolio reporting workflows.
- Designed a reusable **UI component library** with responsive layouts and shared templates, reducing page build time for product teams by 35% and improving cross-browser consistency.
- Built **Java back-end modules** with Maven-managed services, implementing modular dependency boundaries and API layers for secure data exchange with downstream systems.
- Partnered with UX designers to translate mockups into **production-ready pages**, optimizing render paths and asset delivery to cut median load times by 28%.
- Implemented **content structure models** and publishing workflows that enabled business authors to update site sections without engineering releases, supporting 40+ page updates per quarter.
- Integrated enterprise applications through **RESTful APIs** and JSON payloads, including CRM and document systems used by relationship managers during client onboarding.
- Strengthened application security with input validation, auth hardening, and dependency scanning, resolving **15+ vulnerabilities** ahead of quarterly audit cycles.
- Mentored **two junior engineers** on code review practices, testing standards, and deployment workflows while coordinating sprint delivery across design, QA, and product stakeholders.

Technology Analyst, Incoming Technology Analyst, Technology Summer Analyst,

May/2019 - Apr/2022

BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Java-based web services** for internal banking portals, supporting transaction reporting modules used by 500+ analysts across North America offices.
- Extended **component templates** and server-side rendering flows for a regulated content platform, enabling compliance teams to publish policy updates with structured metadata.
- Automated build and release steps with **Jenkins pipelines** and Git branching strategies, reducing deployment lead time from days to hours for minor releases.
- Optimized repository queries and caching layers for **high-volume content stores**, improving page response times on heavily trafficked landing pages by 22%.
- Collaborated with front-end developers to implement **JavaScript and CSS** enhancements for responsive dashboards, ensuring accessibility and browser compatibility across enterprise devices.
- Delivered **third-party API integrations** with JSON and SOAP services for credit and market data feeds consumed by risk and operations applications.
- Authored technical documentation for **modular Java services**, onboarding three new team members to shared coding standards and release processes.
- Supported production troubleshooting and root-cause analysis for **content delivery issues**, restoring service availability within SLA targets during peak reporting periods.

Software Engineering Intern

Jun/2018 - May/2019

Chexology

Remote | 17th Floor, New York

- Built **React components** for inventory tracking interfaces used by warehouse staff, improving data entry accuracy through validated forms and inline error handling.
- Implemented **REST API clients** in JavaScript to synchronize product records with back-end services supporting nightly batch reconciliation.
- Assisted in **CSS refactoring** for mobile-first layouts, aligning UI patterns with design system tokens across customer-facing pages.
- Wrote unit and integration tests covering **core authentication flows**, helping the team catch regressions before weekly releases.
- Participated in code reviews and **Git-based feature workflows**, contributing documentation for local development setup used by subsequent interns.
- Resolved **cross-browser rendering defects** in legacy jQuery modules, closing 20+ UI tickets during the internship term.

Web Developer

Sep/2017 - Nov/2017

Bayesquare Foundation

Remote | New York

- Developed **static and dynamic web pages** for nonprofit fundraising campaigns, integrating donation forms with third-party payment endpoints.
- Applied **HTML5, CSS3, and JavaScript** to implement responsive layouts compatible with major mobile and desktop browsers.
- Configured **content templates** for event listings and volunteer sign-ups, allowing non-technical staff to update site copy independently.
- Fixed accessibility and SEO issues across key landing pages, improving **Lighthouse performance scores** by an average of 18 points.
- Coordinated with remote stakeholders to gather requirements and deliver iterative releases within **two-week sprint cycles**.

EDUCATION

New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

SKILLS

Frontend: React, JavaScript, TypeScript, HTML5, CSS3, jQuery, HTL/Sightly, Responsive Design, Component-Based UI

Backend: Java, Apache Sling, OSGi, Maven, Spring Boot, REST APIs, Node.js

Databases: MySQL, PostgreSQL, MongoDB, JCR, CRX

Cloud & DevOps: Jenkins, Git, JFrog Artifactory, Adobe Cloud Manager, Docker, CI/CD, AWS

Monitoring & Tools: Adobe Analytics, Adobe Target, SonarQube, Splunk, Chrome DevTools, Postman

Workflow & PM: Agile/Scrum, Jira, Confluence, Cross-Functional Collaboration, Technical Documentation
