### PROFESSIONAL SUMMARY

---

Java full stack engineer with 8+ years delivering scalable platforms for financial services and fintech. Expertise in Spring Boot microservices, React frontends, RESTful APIs, and cloud deployment across AWS and Azure. Led platform modernization, cross-team integration, and engineering mentorship through Agile delivery. Proven track record building resilient trading and portfolio systems with SQL and NoSQL data layers for enterprise clients.

### WORK EXPERIENCE

---

#### Software Engineer

May/2022 - May/2026

##### Aspen Capital

Remote | 10th Floor, New York

- Architected and delivered **Java Spring Boot microservices** for portfolio analytics and client reporting, processing **10K+ daily API requests** with sub-200ms p95 latency across distributed AWS infrastructure.
- Built **React.js** dashboard modules for investment operations teams, integrating **RESTful APIs** with role-based access controls and reducing manual reporting workflows by **35%**.
- Led **cross-team API contract design** between front-end, backend, and data engineering squads, establishing OpenAPI standards adopted across **4 product workstreams**.
- Migrated legacy monolithic services to **containerized microservices** on AWS ECS, improving deployment frequency from monthly to **weekly releases** with zero-downtime rollouts.
- Designed **PostgreSQL and MongoDB** data models for mixed transactional and document workloads, optimizing query paths that cut report generation time by **40%**.
- Mentored **3 junior engineers** on Spring Security patterns, unit testing, and code review practices, contributing to a **25% reduction** in production incidents over two quarters.
- Implemented **CI/CD pipelines** with GitHub Actions and Terraform, automating infrastructure provisioning across dev, staging, and production **AWS environments**.
- Collaborated with product owners and stakeholders in **Agile/Scrum** ceremonies to prioritize feature backlog, translate business requirements into technical specs, and deliver quarterly roadmap milestones on schedule.
- Established **Vue.js** prototype modules for internal tooling experiments, validating component patterns later standardized across the firm's **full stack** engineering toolkit.

#### Technology Analyst, Incoming Technology Analyst, Technology

May/2019 - Apr/2022

##### Summer Analyst,

##### BNP Paribas

Remote | Seventh Avenue, New York

- Developed **Java Spring Framework** services for trade capture and reconciliation workflows, handling **millions of daily transactions** across global fixed-income desks with strict regulatory compliance.
- Built **AngularJS** and React interfaces for internal banking portals, enabling analysts to monitor positions and cash flows through **RESTful API** integrations.
- Implemented **SQL Server and Oracle** stored procedures and application layers for risk reporting, improving end-of-day batch completion by **2 hours** through query optimization.
- Designed **REST APIs** connecting front-office trading systems with back-office settlement platforms, reducing manual handoffs and **data reconciliation errors by 30%**.
- Contributed to **Azure cloud migration** initiative, containerizing legacy Java applications and deploying to **Azure App Service** with automated scaling policies.
- Participated in **Agile/Scrum** sprints as a core developer, delivering **20+ production releases** across technology analyst tenure with consistent on-time delivery.
- Created **NoSQL caching layers** with Redis to accelerate real-time market data feeds, decreasing API response times for trader-facing tools by **50%**.

- Partnered with business analysts and compliance teams to translate regulatory requirements into **Spring Boot** service enhancements aligned with SOX and audit controls.
- Supported production **monitoring and incident response** using Splunk and Grafana dashboards, triaging P1/P2 outages and documenting root-cause analyses for management review.

## Software Engineering Intern

Jun/2018 - May/2019

### Chexology

Remote | 17th Floor, New York

- Developed **React.js** components for a restaurant compliance platform, integrating with **Java backend APIs** to digitize health inspection workflows for **500+ client locations**.
- Built **RESTful endpoints** in Spring Boot for checklist submission and audit trail tracking, ensuring data integrity across mobile and web clients.
- Wrote **SQL queries** and migration scripts for PostgreSQL schemas supporting user authentication and inspection history modules.
- Participated in **Agile standups** and sprint planning, delivering assigned features within two-week cadences under senior engineer mentorship.
- Implemented **Git** branching workflows and pull request reviews, maintaining code quality standards across a **4-person intern cohort**.
- Assisted with **AWS deployment** configurations for staging environments, gaining hands-on experience with cloud-hosted SaaS delivery pipelines.

## Web Developer

Sep/2017 - Nov/2017

### Bayesquare Foundation

Remote | New York

- Built **responsive web pages** using HTML, CSS, and JavaScript for nonprofit outreach campaigns, increasing newsletter sign-up conversion by **20%** during the engagement period.
- Integrated **REST API** calls to backend services for donation processing and volunteer registration forms with client-side validation.
- Collaborated with designers to implement accessible UI patterns meeting **WCAG 2.0** guidelines across foundation web properties.
- Maintained and updated content management workflows using **Git** version control and staged deployment processes.
- Supported cross-browser compatibility testing and bug fixes for legacy web assets prior to foundation event launches.

## EDUCATION

---

### New York University

Bachelor of Arts (B.A.), Computer Science

2016-2020

## SKILLS

---

**Frontend:** React.js, AngularJS, Vue.js, JavaScript, HTML5, CSS3, Responsive UI

**Backend:** Java, Spring Boot, Spring Framework, Microservices, RESTful APIs, OpenAPI

**Databases:** PostgreSQL, SQL Server, Oracle, MongoDB, Redis, NoSQL, SQL

**Cloud & DevOps:** AWS, Azure, Google Cloud Platform, Docker, Terraform, CI/CD, GitHub Actions

**Monitoring & Tools:** Splunk, Grafana, Git, Maven, Gradle, JUnit, Postman

**Workflow & PM:** Agile, Scrum, Jira, Cross-functional Leadership, Technical Mentorship, Stakeholder Communication
